Country Exposure Information Report

Effective September 2019

December 2022

DRAFT

INSTRUCTIONS FOR PREPARATION OF

Country Exposure Information Report

General Instructions

This report is a supplement to the Country Exposure Report (Form FFIEC 009) filed with the banking regulatory agencies for bank examination purposes. The purpose of the Country Exposure Information Report is to provide public disclosure of significant country exposures of U.S. banking institutions. Copies of the report are available to the public by accessing the following website <http://www.ffiec.gov/E16.htm>.

Who Must Report

This report must be filed by every institution that submits Form FFIEC 009 and that has exposure meeting the reporting requirements for Form FFIEC 009a as defined in these instructions.

This supplemental disclosure report (Form FFIEC 009a) has two parts: Part A and Part B. Part A will be completed when exposure, as defined for Column 4, Part A, to a single country, excluding the United States, exceeds one percent of the banking institution's total assets or exceeds 20 percent of the banking institution's total capital, whichever is less. All columns included in Part A should only be completed for the countries that exceed these thresholds. Part B will be used to report the names of the countries where the amount of exposure exceeds 0.75 percent but does not exceed 1 percent of the banking institution's total assets or is between 15 percent and 20 percent of the banking institution's total capital, whichever is less. The banking institution must only list the names of the countries and the aggregate amount of exposure for all countries listed under Part B. For the purposes of meeting these criteria, exposure is defined as the amount of total claims computed in accordance with the instructions to Column 4, Part A.

Total assets of reporting banks are those submitted on the Report of Condition to the federal bank supervisors as of the same date. For bank holding companies total assets are those submitted on the most recent Form FR Y-9C.

Total capital is as defined in the agencies' guidelines on capital adequacy and consists of Tier 1 plus Tier 2 capital.

Public Release of Country Exposure Information Reports

The individual FFIEC 009a reports are made publicly available.

A reporting institution may request confidential treatment for some or all of the portions of the FFIEC 009a if the institution is of the opinion that disclosure of specific commercial or financial information in the report would likely cause substantial harm to its competitive position. In certain limited circumstances, the reporting institution's primary federal supervisor may approve confidential treatment of some or all of the items for which such treatment has been requested if the institution has clearly provided a compelling justification for the request. A request for confidential treatment must be submitted in writing prior to the electronic submission of the report. The written request must identify the specific items for which confidential treatment is requested, provide justification for the confidential treatment requested for the identified items, and demonstrate the specific nature of the harm that would result from public release of the information. Merely stating that competitive harm would result is not sufficient. Information for which confidential treatment is requested may subsequently be released by the reporting institution's primary federal supervisor in accordance with the terms of 12 CFR 4.16 (OCC), 12 CFR 261.16 (Board),

FFIEC 009a

12 CFR 309.6 (FDIC), or as otherwise provided by law.

Filing of Reports

The report is to be prepared quarterly, as of the last calendar day of March, June, September, and December. All respondents should submit their completed report, each quarter they meet the reporting requirements, to the Federal Reserve Bank of New York (FRBNY), via the Federal Reserve System's Reporting Central system, within 45 calendar days after the March 31, June 30, and September 30 as-of date. The submission deadline is 50 calendar days after the December 31 as-of date.

Any FFIEC 009a respondent who needs filing guidance is encouraged to visit the Federal Reserve System Website <https://www.frb.services.org/central-bank/reporting-central/index.html> for additional information on Reporting Central. The Website also includes a link that respondents may use to contact the Federal Reserve Bank of New York.

Rounding

Round all amounts reported on this form to the nearest million dollars.

Legal Entity Identifier (LEI)

The LEI is a 20-digit alpha-numeric code that uniquely identifies entities that engage in financial transactions. A reporting institution must provide its LEI on the cover page of this report only if it already has an LEI. The LEI must be a currently issued, maintained, and valid LEI, not an LEI that has lapsed. If a reporting institution does not have an LEI, it is not required to obtain one for purposes of reporting it on this report.

Part A

The names of the countries reported should be as they appear on Form FFIEC 009. The United States should be excluded from this report.
