TOTAL			18,234

(a) We will select a subsample of programs to participate in individual/household-level data collection and the parents of those groups from among the eligible consents.

(b) Activities marked with (b) identify those that contribute to the total number of individuals who will to participate is 18,234: 5,880 parents/guardians of children, 774 parents/guardians of teens, 695 parents/guardians of adolescents, 1,705 parents/guardians of children, 5,359 individuals who will not respond to any of the activities is 5,359: 1,705 parents/guardians of children,

(c) In addition to the estimated 5,359 individuals who will not respond to any of the activities, some in preceding activity. The estimated cumulative number of non-respondents is 7,260: 2,572 parents/guardians of children, 1,705 parents/guardians of children, 549 parents/guardians of adolescents, 422 provider staff.

(d) We assume that parent nonrespondents will not provide information requested in the Parent Consent Form.

(e) Parents are more likely to complete the Parent Interview than the ASA24 dietary recall for the in-center.

(f) Not all individuals who agree to participate in the study will ultimately complete a data collection activity. The number of individuals who complete at least one data collection activity is 10,310: 2,160 parents/guardians of children, 1,705 parents/guardians of children, 549 parents/guardians of adolescents, 422 provider staff.

(g) The sample size is determined by sampling from the completed eligible consents.

(h) The estimated weighted average burden for all respondents visiting the recruitment website is 0.5 hours.

(i) Some parents/guardians included in the parents/guardians of children recruitment will have children, some parents/guardians of teen recruitment so as not to double count. The number of parents/guardians of children and parents/guardians of teens are equal proportions of each year of age in those centers.

(j) It is expected that more children will complete their height and weight measurements than their parents/guardians.

(k) All providers that are not independent will have sponsors.

(l) The burden for sponsor recruitment nonrespondents includes time to review the study materials and provide consent.

(m) The burden for provider recruitment nonrespondents includes time to review the study materials email.

(n) The total number of recruited providers includes some that we expect will later be found ineligible

(o) We assume 40 percent of Directors will participate in the Provider Survey Reminder Call Script.

(p) The Menu Survey and Infant Menu Survey burden estimates include the time required for training

(q) Provider staff will complete one Infant Intake Form for each sampled infant. Each form will take 10

(r) Either the sponsor or center director will complete these interviews/forms. The sample size is the

Additional notes:

Average hourly wage rates used included Directors (Directors, Religious Activities and Education) - \$27.07, State Agency Managers (Administrative Services and Facilities Managers) - \$51.00 represent fully loaded wages.

Appendix C1 (FNS Email Notification to Regional Offices) is directed to Federal employees. Because no Appendix F19 (Environmental Observation Form) will be completed by field interviewers. Because no Appendices H9/H10 (Food Model Booklet) will be used as part of Appendices H3/H4 and H11/H12 (P:

Change in estimated burden

	Number	Time/response (sec)
Cost sample (sponsors w/ ≥ 1 provider in cost study)	239	45
Total sample (sponsored providers)	531	30
Total		

Explanation of the change in estimated burden: The SNACS-II sample has four subgroups defined by the set (Appendix E1) to help prepare for a data collection visit. All child care providers in the study will complete a so that planned subgroup analyses based on sponsorship type (for example, affiliated versus unaffiliated) ca

We estimate moving the two questions from the Pre-Visit Cost Interview to the Provider Survey will increase
 - We estimate it will take sponsors 45 seconds to answer both questions in the Pre-Visit Cost Interview and p versus self-administration for providers.

- We estimate 239 sponsors would get the questions in the Pre-Visit Cost Interview (cell G8, above). This is b average of 2.4 providers in the released sample. Because not all of the providers per sponsor are selected in subtracted the time per response (cell E19, above) for the estimated number of sponsor respondents. This c

- We estimate 531 providers will get the questions in the Provider Survey (cell G15, above). This is based on respondents. This change is in row 70.
