<b><u>NEW ADDS</u></b>			
PATH ADDITION	New path AG-11500 (Support Activities for Crop and Animal Production) is being added to cover NAICS 1151 and 1152 - NAPCS will not be included as part of path, but there will be a new SI to collect write-in data on products or services provided in order to develop NAPCS lines for possible collection in 2027	UTASB	Collect basic items on new AG-11500 path - No NAPCS (but proposed possible SI to collect NAPCS Write-Ins for top products/services provided)
Trade Specific Special Item	Proposed SI to be added to the new AG-11500 path to collect 'top three agricultural products or services provided'	UTASB	Proposed Special Item to be added to new AG-11500 path
PATH ADDITION	ARU path for Credit Unions (Consolidated)	Sector 52 - NAICS 52213010 and NAICS 52213090	Credit Unions typically combine report much like the commercial banking industry. Creating an ARU path for this industry would eliminate the manual corrections by analysts and reduce the burden on respondents.
PATH ADDITION	ARU path for Investment Banking and Securities Dealing and/or Brokerage (Consolidated)	Sector 52 - NAICS 52311000	Respondents in this naics cannot break out for location and consolidate report anyway. The addition of this path would reduce respondent burden.
PATH ADDITION	ARU path for Investment Banking and Securities Dealing and/or Brokerage (Consolidated)	Sector 52 - NAICS 52312000	Respondents in this naics cannot break out for location and consolidate report anyway. The addition of this path would reduce respondent burden.
PATH ADDITION	ARU path for Commodity Contracts Dealing and/or Brokerage (Consolidated)	Sector 52 - NAICS 52313000	Respondents in this naics cannot break out for location and consolidate report anyway. The addition of this path would reduce respondent burden.
PATH ADDITION	ARU path for Commodity Contracts Dealing and/or Brokerage (Consolidated)	Sector 52 - NAICS 52314000	Respondents in this naics cannot break out for location and consolidate report anyway. The addition of this path would reduce respondent burden.
PATH ADDITION	ARU path for Investment Advice (Consolidated)	Sector 52 - NAICS 52393000	Revenue is accounted for at a company level. These largest companies report terrible at the establishment. Since they operate much like a bank they should have an ARU to reduce respondent burden.
PATH ADDITION	ARU path for Portfolio Management (Consolidated)	Sector 52 - NAICS 52392000	Revenue is accounted for at a company level. These largest companies report terrible at the establishment. Since they operate much like a bank they should have an ARU to reduce respondent burden.
PATH ADDITION	Classification path for Financial Activities (Classification)	Sector 52 excluding 524	There was no classification card for these because they were on 99023 and 99026 in previous Census.

18	<p>"We suggest adding a few lines at the end of this schedule, asking respondents to break out their direct imports and purchases from domestic entities for the top three categories (by value) in the schedule and to further break out their purchases by the source of production: domestically produced, foreign produced, or unknown source of production."</p>	MFG	<p>per "Updated BEA Initial Comments", this additional information would support a project to develop input-output tables.</p> <p>Given the poor quality of Item 18 reporting, I would not recommend additional specificity in material collection. Potentially could break this out as an SI? E.g. "what percentages of the value of materials reported in Item 16A1 were domestically produced, foreign produced/imported, or unknown source of production"? Would need tested to see if this is even something facilities could report - do they know where inputs originate from? Are they acquiring directly or from wholesalers? Not optimistic (James Day)</p>
4	Days and hours in operation	MFG	<p>From FRB Data Gaps.xls file</p> <p>Presumably Item 4 would be best spot for this. Sounds more like a special tab to send to FRB on a micro level</p>

28	<p>Creating new NAPCS Detail Lines</p> <p>OR</p> <p>Asking the % of shipments from remanufactured and rebuilt goods for targeted manufacturing industries</p>	MFG	<p>See "USBC-2020-0004-0012-Remanufacturing_G4_ECPC" document for full proposal. Stakeholder requested NAICS sector for this (denied). Recommendation :</p> <p>"Additional NAPCS collection products could be considered for the 2022 Economic Census based on the ability to collect and publish the data, focusing on selected manufacturing groupings specifically highlighted in the proposal. In some cases, the related products by use in the collection structure would be too numerous to split into separate products for rebuilt and remanufactured goods. For the following broad lines, assuming no other changes are needed due to low reporting coverage (to be determined after publication in November 2020), consider adding detail lines for new vs. rebuilt/remanufactured."</p> <p>As a final alternative, for a comprehensive sector-wide measure of output for remanufactured and rebuilt products, a special inquiry could be considered for targeted manufacturing industries in the economic census for the percent of shipments from remanufactured and rebuilt goods.</p>
7A	<p>To the payroll and employment complex for mfg/ASM, the one new item planning to move forward will be the EMPQ1.</p>	MFG	<p>One aspect of our 2020 ASM updated payroll and employment complex that is planning to continue into the econ census is the collection of EMPQ1 (as opposed to EMPSMAO). Beginning with 2020 and moving forward for manufacturing, we will be collecting this variable as essentially our 'total employment' item. We'll still collect the individual details of 'other employees' EMPQ1OM and the first quarter of production workers (EMPQ1PW). In addition to EMPSMAO, we have removed the sum of production workers and the average production workers, EMPSMPW and EMPAVPW respectively. Keep format from ASM into the EC 2022</p> <p>8/4 update - Production Worker EMP for Q2-Q4 will also be removed as of EC22 - this is not needed for edit/processing purposes. Q1 will be collected for both production workers and other workers, total is EMPQ1</p>

17B	Type of Operation -(this row is placeholder for further work by subject matter staff)	MFG	We have Item 17A, Primary Business or Activity, that asks respondents for primary NAICS. Given that, which Type of Operation questions in ADDITION to this are necessary for classification purposes and used by staff when making classification decisions? We want to eliminate those that are duplicative of Item 17A/PBA/SDKB, and also eliminate those that staff do not use when making classification decisions. Many were added in 2017 as a result of NAPCS eliminating the industry distinction from products, BUT that distinction should be able to be collected by use of Item 17A.
26	A cooperative is a business or organization owned by, controlled by, and operated for the benefit of members using its services. 27	Item 27 - Manufacturing Activities - series of questions related to Factoryless Goods Producers	MFG, WH, Services	Was tabled for "further discussion" on justification/uses. Per email thread with Fay Dorsett/Diane W "ECPC briefly discussed this topic during deliberations for 2022 NAICS, and there are no plans to carry out further classification-related research on FGPs. Subject-matter and classification staff did not use the responses for classification during the 2017 Economic Census. Diane's area released a post-collection study on respondent interpretation of the questions, but there are no tabulations of responses and no analyses beyond that. Generally, the research appears to confirm that the questions are more suited to the enterprise rather than the establishment, but there is high variability in interpretation of the questions used in the 2017 EC."

<b><u>Proposed Changes to existing questions</u></b>			
Trade Specific Special Inquiry	Merchandise Sales	Sector 54	Merchandise Sales should be kept on Class paths and can be dropped from AUX paths so long as those AUX forms still have Item 22.  Item 22 is not being dropped from any paths so Merchandise Sales will be kept on Class paths and dropped from AUX forms.
Question	Respondents select one of the following before Item 5A:  -Administrative location with revenue-generating activities (continue with current 5a and 5b, revenue and exports) -Administrative location with no revenue-generating activities (skip to Item 7)	551111, 551112, 551114	Include the consolidated revenue question and the two new questions on the same screen, Item 5A.
Auxiliary	The industry served question for Auxiliaries is going from write-ins to a three screen approach asking the following:  -Does this establishment have the same primary kind of business as 2017? (Y/N) -If no, select the sector corresponding to the primary business or activity performed by the establishment -Based on the sector selected, please select the primary business or activity performed by this establishment from a list of AUX codes	Sectors 48-49, 51, 54, 55, 56, 81	This is not being revised after going through cognitive testing. We are working to use BEACON to code write-ins to this question to their correct PBA on the back end. No changes to QDM will be required. The hope is to add something similar to the BEACON search in Item 4 to this Item in EC27.

IA Puerto Rico forms	This would be a reinstatement of a question on IA forms prior to 2012.
IA Construction forms	This was on the 2012 IA forms but removed due to NAPCS collection. But NAPCS is being removed from some forms, and the information is needed by BEA.
Various	Some industries are too small in some territories to collect and publish NAPCS.
All	Requires slight changes to the categories collected on some of the forms.
