NFAAS captures accounting status, contact and location information. NFAAS is also used to assess the impact of the disaster on Navy affiliated personnel and provide support to help families return to a steady state. NFAAS is used on a regular basis to track contact and data on sailors on Individual Augmentation orders. PII collected: Name, SSN (full and truncated), DoD ID number, gender, birth date, personal cell telephone number, home telephone number, personal email address, mailing/home address, DoD affiliation, branch of service, military status, rank/rate, duty station, name of sponsor, sponsor SSN; Spouse/child information: Name, Relationship, DOB, Address, phone, email, number of children; Medical Information: medical history, illness/diagnosis, and medical treatment; Education Information: current grade level, provider/school name, school district, provider/school address, provider/school office/fax numbers; Emergency contact information: Name, Relationship (type in, optional), Address, phone (home, cell, work), email. Surveys are to include the date of assessment, the type of event and category classification, contacts with the military family, and a Federal Emergency Management Agency (FEMA) Number (if issued). f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

(3) Retention Instructions.

Collection, Use, Processing: Individual privacy risk is minimized to the greatest extent possible. The data is collected from 2 sources, DMDC and Navy personnel, via secure protocols and encrypted channels. Data is protected at each stage and is only available to DoD and DON authorized users responsible for the status and whereabouts of Navy personnel following a disaster or for recording exceptional family member program enrollments. Privacy data (contact information) is available to users who are expected to observe Privacy Data from unauthorized disclosure. Therefore, the only affect to an individual's privacy would be from unauthorized disclosure by an authorized user.

Retention and Disclosure: Data in the system is stored in a database that encrypts and hashes information to protect any direct access, or human readable access to the data. The areas where the equipment with which this data resides on are monitored and have controlled access. Access to records or information in the Database is limit to those officials who have been properly screened and trained or have a need to know consistent with the purpose for which the information was collected. The threshold for need to know is strictly limited to those personnel who are responsible for personnel Accountability, family support, and exceptional family program officials. Information maintained in computer databases requires password protection and/or Common Access Card (CAC) access. Data is protected from unauthorized access by using role-based access permissions. Privacy data (contact information) is available to users who are expected to observe Privacy Data from unauthorized disclosure. Therefore, the only affect to an individual's privacy would be from unauthorized disclosure by an authorized user. All contact data is retained indefinitely, or until the authorized user (individual, family, command, etc) updates it. DEERs data for the individual is overwritten with each data refresh (every 30 days).

Destruction: Data is destroyed in accordance with the Navy's Record Management Manual; longer retention is authorized if needed for business use. <https://www.archives.gov/records-mgmt/grs.html>

m. What is the authority to collect information? A Federal law or Executive Order must authorize the collection and maintenance of a system of records. For PII not collected or maintained in a system of records, the collection or maintenance of the PII must be necessary to discharge the requirements of a statute or Executive Order.

(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be similar.

(2) If a SORN does not apply, cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (If multiple authorities are cited, provide all that apply).

(a) Cite the specific provisions of the statute and/or EO that authorizes the operation of the system and the collection of PII.

(b) If direct statutory authority or an Executive Order does not exist, indirect statutory authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.

(c) If direct or indirect authority does not exist, DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component must be identified.
