

# Biomonitoring Quality Assurance Support Program

Analytical Method Report

## Phthalates

### Laboratory Information

1 State Report:

2 Results for Method:

### Sample Preparation Information:

3 Does your method use automation:

4 Does your sample preparation method include:

5 Solid phase extraction platform:

Additional information on sample prep procedure:

6 What is the method sample volume size:

7 Name of enzyme:

Enzyme Vendor

Enzyme Concentration

Amount

How long do you incubate the samples

Temperature during incubations

### HPLC Configuration:

8 Instrument manufacturer

9 What is the flow rate:

10 What is the method run time:

11 What is the sample injection volume:

12 Column name and Manufacture

13 Column dimensions

14 Elution Type:

15 Mobile Phase A Composition

16 Mobile Phase B Composition

### Mass Spectrometer Configuration

Have you optimized the MS Parameters for your method? (Analytes,

17 Precursor and Product Ions, Collision Energy)

18 What is the ionization mode:

20 Please complete the table for each analytes LOD, precursor and product ion transitions:

**Analytical and Internal Standards**

**Please complete the table for metabolite standards:**

- 25 How do you prepare your standards?
- 27 How many points are in the calibration curve?
- 28 Is the calibration curve weighted?
- 29 What integration software do you use?

**Additional Method Questions**

- 30 Which proficiency testing programs do you participate in?  
what is the average number of samples analyzed per month for this
- 31 method?
- 32 Have you checked the accuracy of the method using NIST SRMs?
- 33 What volume of sample is required for BQASP Analysis?

Please provide a screenshot of your results chromatography:

CDC estimates the average public reporting burden for this collection of information, including reviewing instructions, searching existing data/information sources, gathering and maintaining the collection of information, reviewing instructions, searching existing data/information sources, gathering and maintaining the collection of information. An agency may not conduct or sponsor, and a person does not have to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection (0920-xxxx); ATTN: PRA (0920-xxxx).

By submitting this form, we attest that the results reported were produced in this laboratory from the proficiency testing samples that were introduced into the routine workflow of the laboratory and analyzed using the same methods, protocols and procedures with the same frequency routinely applied to patient specimens.

We further attest that the laboratory did not discuss or engage in any communications with anyone outside the laboratory regarding the proficiency test or the results obtained.
