Form Approved OMB Control No.: 0920-XXXX Expiration date: XX/XX/XXXX

## Knowledge, Attitudes, and Practices (KAP) about body lice- and flea-borne diseases: Survey for Shelter Workers

**Instructions to Interviewer:** Please read the italicized information to the participant before starting the block of survey questions. Read the participant the entire question and then ask the participant to choose the answer. If needed, you may prompt them with the answer options. If any material is in **bold** within the question box, please do not read that portion to the participant (**bolded text** is instructional for you). You may also need to remind participants that questions about lice are about **BODY** lice, not head lice. Some homeless service sites prefer the term "guests" rather than "clients"; please adjust your terminology accordingly. As a reminder, participants can choose to skip any question that they prefer not to answer.
