- **Location** – The position of the field on the record
- **Length** – The number of characters allowed in the field
- **A/N** – The type of field:
 - Alphabetic (A)

 - Alphanumeric (A/N)
- **Comments** – Shows if the field is required for the transaction and includes an explanation of the field and the field's relationship to other fields or records

When sending input records, the NDNH Transmission Header record must be the first record in the transmission. If the Header record is not the first record in the transmission, the system rejects all records until a Header record is located.
