

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave refields questions on how long people plan to wait and see to get vaccinated. New or modified questions include parents' conversations with pediatricians, frequency of information seeking, how long participants plan to wait to get boosted and reasons why, reasons for waiting to get vaccinated, and pandemic fatigue.
