

### ICR Summary Information

Hours per Response	54
Number of Respondents	660
Total Estimated Burden Hours	71,500
Total Estimated Costs	\$18,500,000
Annualized Capital O&M	\$9,900,000
Total Annual Responses	1,320

**Assumptions:**

<sup>a</sup> We have assumed that the average number of respondents that will be subject to the rule will be 660. There will be no subject to the rule over the three-year period of this ICR.

<sup>b</sup> This ICR uses the following labor rates: \$157.61 per hour for Executive, Administrative, and Managerial labor; \$123.9 \$62.52 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statisti Workers, by Occupational and Industry group.” The rates are from column 1, “Total Compensation.” The rates have be benefit packages available to those employed by private industry.

<sup>c</sup> We assume that all respondents will have to familiarize with the regulatory requirements and it will take 1 hour per res;

<sup>d</sup> There have been no new subpart D units since 1986, and new units are not expected over the three-year period of this I applicable.

<sup>e</sup> We assume that each source will submit a semiannual report due to excess emission and monitoring systems performar

<sup>f</sup> We assume that respondents conduct this activity on a daily basis, and that plant operations occur 365 days per year.

<sup>g</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding

**Units (40 CFR Part 60,**

(F) Management person hours per year (F=Ex0.05)	(G) Clerical person hours per year (G=Ex0.1)	(H) Cost, (\$) <sup>b</sup>

<b>Total Annual Burden and Cost (rounded) <sup>f</sup></b>					

**Assumptions:**

<sup>a</sup> We have assumed that the average number of respondents that will be subject to the rule will be 660. There will become subject to the rule over the three-year period of this ICR.

<sup>b</sup> This cost is based on the following labor rates which incorporates a 1.6 benefits multiplication factor to account for Managerial rate of \$70.56 (GS-13, Step 5, \$41.07 + 60%), Technical rate of \$52.37 (GS-12, Step 1, \$30.47 + 60%), \$16.49 + 60%). These rates are from the Office of Personnel Management (OPM) “2020 General Schedule” which

<sup>c</sup> There have been no new subpart D units since 1986, and new units are not expected over the three-year period of applicable.

<sup>d</sup> We assume that approximately 70 percent of the sources monitor via CEM and that approximately 30 percent use

<sup>e</sup> Units using fuel sampling and analysis submit sulfur dioxide compliance reports instead of excess emission report figures used in this category are based on research performed during regulation revision.

<sup>f</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding

ts, which are based on CEM data. The

22 to match the rates from the Office of Personnel Management (OPM), 2022 General Schedule.

<b>Capital/Startup vs. Operation and Maintenance (O&amp;M) Co</b>				
(A)	(B)	(C)	(D)	(E)
Continuous Monitoring Device	Capital/Startup Cost for One Respondent	Number of New Respondents	Total Capital/Startup Cost, (B X C)	Annual O&M Costs for One Respondent
