## Requested Change

Adding a question: Have any of your clients had suspected or confirmed monkeypox infection since May 1, 2022?

Adding a question: What types of monkeypox education or communication do you provide your clients? (check all that apply)

- Website
- Community education/outreach
- Social media
- Billboards
- Public transport placards
- Public service announcements
- Health portal/app
- Waiting room video
- Posters
- Printed handouts
- Other \_\_\_\_\_
- None

Adding a question: What is the source of monkeypox information you provide your clients? (check all that apply)

- CDC
- State health department
- Local health department
- Academic Institution
- HIV non-profit organization
- Federally Qualified Health Center
- STD clinic
- Healthcare clinic
- Physician practice
- Hospital system
- Other \_\_\_\_\_
- None

Adding a question: Does your CBO provide clinical services?

- Yes
- No (skip to Q36)

Adding a question: For clients with suspected or confirmed monkeypox, do you have protective/isolation procedures for the clients and staff? (check all that apply)

- Personal protective equipment (PPE) for staff
- Separate waiting room
- Dedicated monkeypox examination room
- Other \_\_\_\_\_
- None

Adding a question: Do you perform testing for monkeypox?

- Yes
- No

Adding a question: If you do not perform testing for monkeypox, where do you refer clients for testing? (check all that apply)

- Local health department
- Federally Qualified Health Center
- STD Clinic
- Healthcare Clinic
- Physician practice
- Hospital system
- Other \_\_\_\_\_
- None

Adding a question: Do you offer vaccination for monkeypox?

- Yes
- No

Adding a question: Did you receive vaccine as participant in the Health Department Heath Equity pilot?

- Yes
- No

Adding a question: If you offer vaccination, how do you administer it? (check all that apply)

- Subcutaneous injection
- Intradermal injection

Adding a question: If you do not vaccinate for monkeypox, where do you refer clients for vaccination? (check all that apply)

- Local health department
- Federally Qualified Health Center
- STD clinic
- Healthcare Clinic
- Physician practice
- Hospital system
- Other \_\_\_\_\_
- None

Adding a question: Do you provide medications to treat monkeypox?

- Yes
- No

Adding a question: If you do not provide medication, where do you refer clients for treatment? (check all that apply)

- Federally Qualified Health Center
- Healthcare clinic
- Physician practice
- Hospital system
- Other \_\_\_\_\_
- None

Adding a question: Please describe your organization's experience with monkeypox not previously asked in this survey. (1000 characters limit)

Adding a question: Please describe challenges and successes with meeting your clients' needs for services related to monkeypox. (1000 characters limit)

**Justification/brief explanation for the change requested**

To better understand the CBOs' experiences related to monkeypox outbreak. This information will help CDC identify areas for capacity building of CBOs as well as to develop education materials on how CBOs can scale-up their services during an outbreak.

These added questions do not impact or change the project's methodology and purpose, and are within the scope of the original approval because CBOs are critical to deliver the HIV and monkeypox services due to their reach to key populations.
