

INITIAL SCREENING and PUBLIC HEALTH ASSESSMENT: Steps for CBP and QS Staff

STEP 1- INITIAL SCREENING

- a. Visual inspection - if ill appearing with a RING card sign or symptom, refer immediately for PUBLIC HEALTH ASSESSMENT (step 2), if not, go to step 1b
- b. Temp check - if elevated (>100.4), refer immediately (do not do temp re-check) for PUBLIC HEALTH ASSESSMENT (step 2), if not, go to step 1c
- c. Ask traveler whether they have been in any of the outbreak areas in the past 21 days (Note - if they answer yes, mark the district. If all other screening is negative, they DO NOT need a PHA).
- d. Screening questions - See "Ebola Screening Script" below. If pax answers yes to any of these questions, refer for PUBLIC HEALTH ASSESSMENT (step 2)
- e. Confirmation of contact information transmitted by the airline to CBP
 - a. Confirm the name, date of birth, street address, city, state, primary phone number, and email address are correct. *If no information available, collect these five fields of information.*
- f. Provide traveler with information to monitor for signs and symptoms and steps to take if ill

STEP 2 -PUBLIC HEALTH ASSESSMENT:

- a. If step 1 identified evidence of illness, conduct illness response using Air Illness and Death Form and repeat temperature measurement.
