In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection: Conference, Meeting, Workshop, Registration and Challenges Generic Clearance, –0925–0740—REVISION, expiration date 07/31/2022, National Institutes of Health (NIH).

Need and Use of Information Collection: This is a revision of a currently approved generic clearance to include Challenges and Competitions as a means of promoting innovative solutions. As a result of including Challenges and Competitions, the title of this generic has been revised. This generic will continue to provide a quick and efficient process to create registration forms for NIH sponsored conference, meetings, workshops, poster sessions, presentations, and panels. NIH directly sponsors, organizes, and conducts research-related activities such as conferences, workshops, meetings, poster sessions, and training courses. These activities are designed to be relevant to the current state of research in a given field or to the current state of participant’s research projects or careers, and other resource limitations and determine the number of possible participants. For such activities to be timely and to optimally use available resources to address needs and opportunities within the research community, it is necessary for NIH to have a means to register and select the most appropriate participants, according to the type or purpose of a given activity.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 10,375.

ESTIMATED ANNUALIZED BURDEN TABLE
