

Understanding the Role of Intrinsically Disordered Proteins (IDPs) in Cancer Biology:

*Biophysical Challenges, Novel Approaches, and
Functional Investigations*

September 26, 2022

OMB No.: 0925-0740
Expiration Date: 09/30/2025

Public reporting burden for this collection of information is estimated to average 3 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. **An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.** Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0740). Do not return the completed form to this address.

Please use this form to register for the "Understanding the Role of Intrinsically Disordered Proteins (IDP) " meeting.
