Statistical Adjustment for Multiplicity Virtual Workshop

REGISTER HERE

The Division of Cancer Prevention is hosting the **Statistical Adjustment for Multiplicity Virtual Workshop** from **October 26-27, 2022**.

The goal of this workshop is to bring together researchers, statisticians, and academics representing a broad range of expertise and experiences to:

- Discuss traditional, new, and emerging methods of statistical adjustment
- Assess suitability of techniques in different situations in pursuit of protected inference to aid both rigor and reproducibility
- Review best practices for multiplicity adjustment
- Foster idea exchange and new collaborative interactions to address current gaps in the knowledge base

This workshop will provide helpful guidelines that will enable investigators in the external community to conduct protected inference.
