

future issuances of securities and assumptions of liability, is August 17, 2022.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

Dated: July 28, 2022.

Debbie-Anne A. Reese,
Deputy Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 15276-000]

Rye Hildebrand Hydroelectric, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 6, 2022, Rye Hildebrand Hydroelectric, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Hildebrand Lock/Dam Hydroelectric Project to be located at the existing U.S. Army Corps of Engineers Pittsburgh District Hildebrand Lock/Dam located on the Monongahela River at Hildebrand, Monongalia County, West Virginia. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) a 405-acre impoundment with a normal volume of 7,600 acre-feet at a normal maximum surface elevation of 835.0 feet mean sea level; (2) an existing 649-foot-long, 64-foot-high concrete gravity dam with a 600-foot-long, 84-foot-wide lock and six 60-foot-wide, 21-foot-high tainter gates; (3) a new 100-foot-long, 70-foot-wide intake section with trashracks; (4) two new 3-megawatt horizontal Kaplan bulb turbine/generator units; (5) a new 90-foot-long, 60-foot-wide concrete powerhouse; (6) a new three-phase, 36.7-kilovolt (kV), 1,000-foot-long transmission line; (7) a new 50-foot-long, 50-foot-wide substation with a new 10-megavolt-amperes 4.16/36.7-kV three-phase step-up transformer; (8) a new 150-foot-long, 70-foot-wide tailrace; and (9) appurtenant facilities. The proposed project would have an annual generation of 28,000 megawatt-hours.

Applicant Contact: Michael Rooney, Rye Hildebrand Hydroelectric, LLC, 100 S Olive Street, West Palm Beach, FL 33401; phone: (412) 400-4186.

FERC Contact: Woohee Choi; email: woohee.choi@ferc.gov; phone: (202) 502-6336.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice.

Competing applications and notices of intent must meet the requirements of 18 CFR 4.36.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, notices of intent, and competing applications using the Commission's eFiling system at <https://ferconline.ferc.gov/eFiling.aspx>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <https://ferconline.ferc.gov/QuickComment.aspx>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P-15276-000.

More information about this project, including a copy of the application, can be viewed or printed on the "eLibrary" link of the Commission's website at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-15276) in the docket number field to access the document. For assistance, contact FERC Online Support.

Dated: July 28, 2022.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC22-24-000]

Commission Information Collection Activities (FERC-725Z); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently

approved information collection, FERC–725Z (Mandatory Reliability Standards: IRO Reliability Standards).

DATES: Comments on the collection of information are due October 3, 2022.

ADDRESSES: You may submit your comments (identified by Docket No. IC22–24–000) by one of the following methods:

Electronic filing through <https://www.ferc.gov>, is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.

- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:

- *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

- *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, Office of the Secretary, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: <https://www.ferc.gov>. For user assistance, contact FERC Online Support by email at ferconlinesupport@ferc.gov, or by phone at (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at <https://www.ferc.gov>.

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at DataClearance@FERC.gov, telephone at (202) 502–8663.

SUPPLEMENTARY INFORMATION:

Title: FERC–725Z (Mandatory Reliability Standards: IRO Reliability Standards).

OMB Control No.: 1902–0276.

Type of Request: Extension to this currently approved information collection.

Abstract: On August 8, 2005, The Electricity Modernization Act of 2005, which is Title XII of the Energy Policy Act of 2005 (EPA 2005), was enacted into law.¹ Under section 215 of the Federal Power Act (FPA) implemented in 18 CFR 40, the Commission requires a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards², which are

subject to Commission review and approval. In 2006, the Commission established a process to select and certify an ERO and, subsequently, certified the North American Electric Reliability Corporation (NERC) as the ERO.³

The ERO develops proposed Reliability Standards⁴ and, if approved by NERC, submits them to the Commission for review and approval. When the standards are approved by the Commission, the Reliability Standards become mandatory and must be enforced by the ERO, subject to Commission oversight.

NERC established the following IRO standards within FERC–725Z:

IRO–001–4 purpose is to establish the responsibility of Reliability Coordinators to act or direct other entities to act.

In a joint petition dated May 30, 2019, the North American Electric Reliability Corporation (“NERC”) and Western Electricity Coordinating Council (“WECC”) requested Commission approval for Reliability Standard IRO–002–6 (now IRO–002–7) (Reliability Coordination, Monitoring and Analysis). NERC and WECC stated that the “Reliability Standard IRO–002–7 reflects the addition of a regional Variance containing additional requirements applicable to Reliability Coordinators providing service to entities in the Western Interconnection.” NERC maintains that the data exchange capability requirement in Reliability Standard IRO–002–7, Requirement R1 is covered by Reliability Standard IRO–008–2, Requirement R1, which obligates the reliability coordinator to perform operational planning analyses to assess whether the planned operations for the next-day will exceed System Operating Limits and Interconnection Reliability

means a requirement, approved by the Commission under this section, to provide for reliable operation of the bulk-power system. The term includes requirements for the operation of existing bulk-power system facilities, including cybersecurity protection, and the design of planned additions or modifications to such facilities to the extent necessary to provide for reliable operation of the bulk-power system, but the term does not include any requirement to enlarge such facilities or to construct new transmission capacity or generation capacity.”

³ North American Electric Reliability Corp., 116 FERC ¶ 61,062, order on reh’g and compliance, 117 FERC ¶ 61,126 (2006), order on compliance, 118 FERC ¶ 61,190, order on reh’g, 119 FERC ¶ 61,046 (2007), aff’d sub nom. *Alcoa Inc. v. FERC*, 564 F.3d 1342 (D.C. Cir. 2009).

⁴ The NERC Standard Processes Manual, Appendix 3A of the NERC Rules Of Procedure, (posted at https://www.nerc.com/FilingsOrders/us/RuleOfProcedureDL/SPM_Clean_Mar2019.pdf) describes the process for developing, modifying, withdrawing, or retiring a Reliability Standard.

Operating Limits within its Wide Area. NERC asserts that “to perform the required operational planning analyses, the Reliability Coordinator must have the data it deems necessary from those entities that possess it.”

Currently effective IRO–009–2 applicable to reliability coordinators and the purpose of the standard is to prevent instability, uncontrolled separation, or cascading outages that adversely impact the reliability of the interconnection by ensuring prompt action to prevent or mitigate instances of exceeding Interconnection Reliability Operating Limits (IROLs).

Additionally, regarding data exchange, NERC cites Reliability Standard IRO–010–2 (Reliability Coordinator Data Specification and Collection) and its stated purpose of preventing instability, uncontrolled separation, or cascading outages “by ensuring the Reliability Coordinator has the data it needs to monitor and assess the operation of its Reliability Coordinator Area.” NERC states that under Reliability Standard IRO–010–2, Requirements R1, R2 and R3, the reliability coordinator must specify the data necessary for it to perform its operational planning analyses and provide the specifications to the entities from which it needs data who then must comply with the data request using a mutually agreeable format and security protocols.

IRO–014–3 purpose is to ensure that each Reliability Coordinator’s operations are coordinated such that they will not adversely impact other Reliability Coordinator Areas and to preserve the reliability benefits of interconnected operations.

IRO–017–1 (Outage Coordination) purpose is to ensure that outages are properly coordinated in the Operations Planning time horizon and Near-Term Transmission Planning Horizon. Reliability coordinators, planning coordinators, balancing authorities, transmission owners and transmission planners are applicable entities for IRO–017–1.

IRO–018–1 (Reliability Coordinator Real-time Reliability Monitoring and Analysis Capabilities), submitted by North American Electric Reliability Corporation (NERC). Requirement R3 requires reliability coordinators to have an alarm process monitor that provides notification to system operators when the failure of a real-time monitoring alarm processor has occurred. In this order, the Reliability Standards build on monitoring, real-time assessments and support effective situational awareness. The Reliability Standards accomplish this by requiring applicable entities to:

¹ The Energy Policy Act of 2005 (EPA 2005), Public Law No 109–58, Title XII, Subtitle A, 119 Stat. 594, 941 (2005), codified at 16 U.S.C. 824o (2000).

² The Federal Power Act (as modified by the EPA 2005) states “[t]he terms “reliability standard”

(1) provide notification to operators of real-time monitoring alarm failures; (2) provide operators with indications of the quality of information being provided by their monitoring and analysis capabilities; and (3) address deficiencies in the quality of information being provided by their monitoring and analysis capabilities.

NERC observes that the performance of the requirements it cites is premised on the existence of data exchange capabilities, regardless of whether a separate requirement expressly requires the reliability coordinator to have data

exchange capabilities in place. In review the 725Z collection for the IRO Reliability Standards, the number of entities/respondents was checked and broken down into the applicable type of entity for each reliability standard. In the past combining reliability standards caused the same reliability standard to be accounted for multiple times, resulting in the previously recorded 6,686 responses. These numbers were revised and updated to be the new calculated total of 953 responses. Staff looked at each reliability standard as its

own unique project and in doing so eliminated the multiple entity count by making a more accurate representation of the number of responses.

Type of Respondents: Reliability coordinators (RC), planning coordinators (PC), balancing authorities (BA), transmission owners (TO), transmission planners (TP), Transmission Operators (TOP) are included entities for *Estimate of Annual Burden*.⁵ The Commission estimates the changes in the annual public reporting burden and cost⁶ as follows.

FERC-725Z—REPORTING AND RECORDKEEPING REQUIREMENTS FOR RELIABILITY STANDARDS IRO-001, IRO-002, IRO-008, IRO-009, IRO-010, IRO-014, IRO-017, AND IRO-018

| Information collection requirements | Number of respondents & type of entity | Annual number of responses per respondent | Total number of responses | Average burden hours & cost per response (\$) | Total annual burden hours & total annual cost (\$) | Total annual burden cost |
|-------------------------------------|--|---|---------------------------|---|--|--------------------------|
| | (1) | (2) | (1) * (2) = (3) | (4) | (3) * (4) = (5) | (5)/(1) |
| IRO-001-4 | 12 (RC) | 1 | 12 | 24 hrs. \$1,731.6 | 288 hrs. \$20,779.2 | \$1,731.6 |
| | 168 (TOP) | 1 | 168 | 12 hrs. 865.8 | 2,016 hrs. 145,454.4 | 865.8 |
| IRO-002-7 | 12 (RC) | 1 | 12 | 24 hrs., 1,731.6 | 288 hrs., 20,779.2 | 1,731.6 |
| IRO-008-2 | 12 (RC) | 1 | 12 | 160 hrs., 11,544 | 1,920 hrs., 138,528 | 11,544 |
| IRO-009-2 | 12 (RC) | 1 | 12 | 12 hrs. 865.8 | 144 hrs. 10,389.6 | 865.8 |
| IRO-010-3 | 12 (RC) | 1 | 12 | 24 hrs., 1,731.6 | 288 hrs., 20,779.2 | 1,731.6 |
| IRO-014-3 | 12 (RC) | 1 | 12 | 12 hrs., 865.8 | 144 hrs., 10,389.6 | 865.8 |
| IRO-017-1 | 12 (RC) | 1 | 12 | 1,200 hrs., 86,580 | 14,400 hrs., 1,038,960. | 86,580 |
| | 63 (PC) | 1 | 63 | 96 hrs., 6,926.4 | 6,048 hrs., 436,363.2 | 6,926.4 |
| | 204 (TP) | 1 | 204 | 96 hrs., 6,926.4 | 19,584 hrs., 1,412,985.6. | 6,926.4 |
| | 326 (TO) | 1 | 326 | 8 hrs. 577.2 | 2,608 Hrs., 188,167.2 | 577.2 |
| | 96 (BA) | 1 | 96 | 8 hr., 577.2 | 758 hrs., 54,689.7 | 577.2 |
| IRO-018-1 | 12 (RC) | 1 | 12 | 34 hrs., 2,453.1 | 288 hrs., 20,779.2 | \$2,453.1 |
| Total for FERC-725Z | | | 953 | | 48,774 hrs., 3,519,044.1. | |

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: July 28, 2022.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC22-25-000]

Commission Information Collection Activities (FERC-725P1); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

collection burden, refer to 5 Code of Federal Regulations 1320.3.

⁶The hourly cost figures, for salary plus benefits, for the new standards are based on Bureau of Labor Statistics (BLS) information (at http://www.bls.gov/oes/current/naics2_22.htm), as of May 2021, and

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC-725P1 (Mandatory Reliability Standards: PRC-005-6 Reliability Standard).

DATES: Comments on the collection of information are due October 3, 2022.

ADDRESSES: You may submit your comments (identified by Docket No. IC22-25-000) by one of the following methods:

benefits information for March 2021 (at <https://www.bls.gov/news.release/eccec.nr0.htm>). For salary plus benefits, for reporting requirements, an electrical engineer (code 17-2071) is \$72.15/hour; for the recordkeeping requirements.

⁵ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. For further explanation of what is included in the information
