Study Overview

The purpose of this study is to learn about the health, well-being, and nutrition needs of households in Puerto Rico. The results of this study will help the U.S. Department of Agriculture (USDA) and the Administración de Desarrollo Socioeconómico de la Familia (ADSEF) improve programs and services offered to Puerto Rican households, such as the Nutrition Assistance Program (NAP).

The study team will be in Puerto Rico to conduct the following activities:

- A household survey on the health and well-being of Puerto Rico residents
- In-person interviews to better understand how Puerto Rico residents cope with natural disasters such as hurricanes and earthquakes and how existing programs can help

Survey distribution and in-person interviews will be conducted in spring and summer 2023.

Public Burden Statement

This information is being collected to assist the Food and Nutrition Service (FNS) in understanding food security status and economic well-being among Puerto Rico residents. This is a voluntary collection. FNS will use the information as a baseline for future assessments of food security and the Nutrition Assistance Program, particularly in the context of natural disasters. This collection does not request personally identifiable information under the Privacy Act of 1974. According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0584-XXXX. The time required to read this information is estimated to average 5 minutes. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Agriculture, Food and Nutrition Service, Office of Policy Support, 1320 Braddock Place, Alexandria, VA 22314. ATTN: PRA (0584-XXXX). Do not return the completed form to this address.
