# Annual Reporting Tool (ART) – Strategic Prevention Framework for Prescription Drugs (SPF Rx)

Program Evaluation for Prevention (PEPC) – Cross-Site Evaluation

OMB No. 0930-0377 Expiration Date 02/29/2024

**Burden Statement:** This information is being collected to assist the Substance Abuse and Mental Health Services Administration (SAMHSA) for the purpose of program monitoring of the Strategic Prevention Framework for Prescription Drugs (SPF Rx) grant program. This information collection will be used at an aggregate level to assess implementation of Strategic Prevention Framework steps, including related barriers and the reach of the SPF Rx interventions. Under the Privacy Act of 1974 any personally identifying information obtained will be kept private to the extent of the law. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number for this project is 0930-0377. Public reporting burden for this collection of information is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 5600 Fishers Ln, Room 15 E57B, Rockville, MD 20857.

# **Timing of Instrument Items:**

- E = Every time (annually)

#### Information and Directions

#### **Purpose**

The Annual Reporting Tool (ART) collects data annually from primary SPF Rx grantees and their subrecipient communities about SPF Rx implementation, including:

- Subrecipient communities' progress through the Strategic Prevention Framework (SPF); and
- The specific prevention interventions being implemented by subrecipient communities and primary grantees.

For SPF Rx, interventions may be implemented by primary grantees as well as their community subrecipients. Subrecipient communities will complete the whole survey, while primary grantees will mainly report on prevention interventions that they implement. Data collected from the survey will be used to monitor subrecipient and state, tribal entity, or jurisdiction performance and evaluate the effectiveness of the Strategic Prevention Framework for Prescription Drugs (SPF Rx) program across states, tribal entities, and jurisdictions. The overall goal of the cross-site evaluation is to document and assess the effectiveness of the SPF Rx approach to SAMHSA's mission of reducing prescription drug misuse.

#### Requirements

Completion of this survey is a requirement of accepting funding from CSAP through your state, tribal entity, or jurisdiction under the SPF Rx grant initiative.

#### **Organization of the Survey**

Make sure to read all of the directions and examples. Primary grantees and subrecipient communities will complete this form once for each Federal fiscal year (annually). To minimize respondent burden and decrease completion time, this web-based survey allows information entered in previous reporting periods to be prefilled where possible and uses skip patterns to take you automatically to the appropriate question on the basis of your responses.

You will need to complete separate forms related to implementation information for each set of prevention intervention activities implemented. For example, if your community/jurisdiction implements both a participant-based education prevention intervention and an environmental prevention intervention, you will complete implementation information for both of those interventions. Similarly, if your community implements two different participant-based prevention education intervention strategies, you will complete implementation information for both of those interventions.

Information provided in this instrument focuses on communities, so no individuals will be identified in the reporting of results.

Throughout this instrument, the term "you" refers to the primary SPF Rx grantee (state/tribal entity/jurisdiction) or the subrecipient community that has received SPF Rx funding from the state/tribal entity/jurisdiction. The SPF Rx subrecipient community could be an organization, coalition, or other entity.

#### **Inclusion of Key Informants**

You are strongly encouraged to obtain input from others involved with the SPF Rx-funded project at the grantee and/or subrecipient level. As part of this process, we encourage you to print out a hard copy of the instrument and review it with key individuals, as appropriate and relevant for your SPF Rx grant.

People you may want to include in responding to this survey (if these positions are applicable to your grant)—

- Project Director
- Project Coordinator
- Person with responsibility or knowledge of financial issues
- State or Tribal Epidemiology and Outcomes Workgroup (SEOW) Liaison
- Data Coordinator
- Local Evaluator
- Intervention delivery staff
- Coalition representatives
- Key stakeholders or partners

# **Helpful Materials**

Before completing the survey, you may find it helpful to gather the following materials to help answer questions:

- budgets;
- results of needs and resources assessments:
- strategic plans;
- meeting minutes;
- memoranda of understanding;
- prevention intervention implementation materials (curricula, programs, etc.);
- evaluation findings and reports; and
- organizational policies.

#### **Entering and Saving Data**

As you enter your data, you will be able to save your work and come back to it at another time. We recommend that you write your responses to the open-ended questions requiring narrative information in advance using a word processor and copy and paste them into the web-based survey.

# **Survey Assistance**

If you need assistance in using the web-based data entry system, contact the Help Desk by leaving a message at 866-245-8079 or by email at <a href="mailto:pepc@rti.org">pepc@rti.org</a>. You can request assistance at any time, and someone will respond to you within 24 hours or the next business day.

#### **Definition of Terms**

The following are definitions for several terms used throughout this instrument. Links to the definitions list can also be found on each page of the web-based survey.

- Capacity refers to the quality and/or level of skills (e.g., workforce) and resources needed to achieve a desired outcome. For SPF Rx, capacity refers to the demonstrated ability of subrecipients to implement each SPF step effectively (e.g., implementation of evidence-based interventions) and the resources (human, organizational, and fiscal) to support the implementation of the SPF model.
- Capacity building refers to activities conducted to improve the ability of an organization or community to deliver prescription drug misuse prevention services, such as improving organizational resources; improving awareness about prescription drug misuse problems; building new relationships or strengthening existing relationships among coalitions, groups, and organizations involved in prescription drug misuse prevention; and working to ensure that prevention intervention activities and outcomes continue after funding ends.
- **Community** refers to the politically or geographically defined area or culturally or epidemiologically defined population of focus that the subrecipient chooses for each prevention intervention.
- Community needs and resources assessments examine needs and resources external to the
  organization and include community readiness (definition below), rates of prescription drug and
  opioid misuse, prevention resources (e.g., call centers, trained implementers), partnerships,
  community prevention experience, and other monetary and nonmonetary resources.
- Community readiness is the community's level of awareness of, interest in, and ability and willingness to support prescription drug misuse prevention initiatives. More broadly, it connotes readiness for changes in community knowledge, attitudes, motives, policies, and actions.
- **Consequences** are defined as the social, economic, and health problems associated with misuse of prescription drugs—for example, overdoses and deaths related to prescription drugs.
- Consumption patterns are the ways in which people misuse prescription drugs.
- Directly served refers to individual-based prevention strategies or services directly delivered to individuals, either on a one-on-one basis or in a group format. Typically, the service provider and the participant are at the same location during the service encounter, but these activities may also take place virtually. Examples include training sessions and educational classes.
- Environmental strategies are efforts to establish or change community standards, codes, and attitudes and thus reduce the incidence and prevalence of prescription drug misuse. Approaches can center on legal and regulatory issues or can relate to service and action-oriented initiatives. Examples include technical assistance (TA) to communities to increase health care provider's use of prescription drug monitoring program data when prescribing opioid pain medication.
- Federal fiscal year goes from October 1 through September 30 of the following year.
- Indirectly reached describes population-based prevention strategies aimed at impacting an entire population. Since there is no direct interaction between the populations impacted by the services, counts of people reached are typically estimates obtained from sources such as the Census or media outlets. Common indirect strategies include information dissemination and environmental strategies.
- Intervening variables are risk or protective factors that have been identified through research as being strongly related to and influencing the occurrence and magnitude of prescription drug misuse and related risk behaviors and their consequences. These variables are the focus of prevention interventions, changes in which are then expected to affect consumption and consequences.

- In-kind resources include labor that supports the SPF Rx grant at subsidized or no cost to the grant or other resources donated to the SPF Rx grant, such as equipment, supplies, or office space.
- *Interventions* are funded activities carried out under the auspices of the SPF Rx grant. They target a variety of subpopulations with the objective of improving outcomes related to prescription drug and opioid misuse.
- **Key stakeholders** are all the members of the community who have a vested interest (a stake) in the activities or outcomes of the SPF Rx prevention intervention.
- Leveraging resources is the process of combining SPF Rx-funded resources with other resources to augment prevention intervention delivery (i.e., to do more together than with SPF Rx resources alone). For example, subrecipients combine SPF Rx funding with funding from another source [e.g., Comprehensive Addiction and Recovery Act (CARA) or CDC Overdose to Action grants) to augment the implementation of their SPF Rx intervention. In many instances, leveraging functions through collaborative relationships.
- *Participants* are the recipients of the SPF Rx prevention interventions.
- Primary grantee or grantee refers to the administrative entity (such as the state, tribal entity, or jurisdiction) receiving SPF Rx funds for delivery of prescription drug misuse prevention interventions.
- **Social marketing** uses the principles of commercial marketing to develop, implement, and evaluate interventions designed to influence the behavior of a target audience.
- **Subrecipients** are the entities (usually community-based organizations, schools, or coalitions) that receive funds from the grantee and carry out SPF Rx activities or prevention interventions.
- Sustainability is the process through which a prevention system becomes a norm and is integrated into ongoing operations. Sustainability is vital to ensuring that prevention values and processes are firmly established, that partnerships are strengthened, and that financial and other resources are secured over the long term.

# **Section 1: Administrative Survey**

[GRANTEES SKIP TO QUESTION 8 AND COMPLETE TARGETED POPULATIONS AND OUTCOMES SUBSECTION]

This section asks questions that describe your subrecipient organization. Your subrecipient organization should be identified as the entity that is carrying out the activities/interventions of the SPF Rx program.

Organization Type (Subrecipients only)

Subrecipient Name (System prefill) (locked)

1.	ider	at type of organization would you say your subrecipient organization is? You should nify your organization as the entity that will be carrying out the activities of the SPF Rx gram. (Select the one response that best describes your organization.) <sup>B</sup>
		Community coalition (If selected, you will skip Question 2.)
		Local public health/mental health government agency responsible for substance use prevention
		Local health/mental health care service provider or facility (e.g., local hospital, community mental health center)
		Youth-focused local grassroots or community-based service or advocacy organization (e.g., local chapter of Students Against Destructive Decisions [SADD], local youth councils)
		Non-youth-focused, local grassroots or community-based service or advocacy organization (e.g., substance use prevention organizations)
		Faith-based organization
		School or school district
		Law enforcement organization
		College or university
		Tribal entity or organization
		Other government agency, not listed above (Describe.)
		Other nonprofit organization, not listed above (Describe.)
		Other (Describe.)
2.	orga acti with	you partnering with a community coalition (an existing group that brings together diverse anizations and individuals to collaborate on shared prevention goals) on your SPF Rx vities? By partnering, we mean that you have a formal relationship that is documented a memorandum of understanding or similar agreement and/or that you provide SPF Rx ding to support activities of the coalition. (Select one response.) B, F

No Funding History (Subrecipients only) 3. Has your subrecipient organization (i.e., entity that will be leading the activities of the SPF Rx) received Strategic Prevention Framework Partnerships for Success (SPF PFS) funding? (Select one response.)<sup>B</sup> Yes (If selected, you will skip Question 4.)  $\Box$ No Don't know∏ Has your subrecipient organization (i.e., entity that will be leading the activities of the SPF Rx) 4. been part of a coalition or group or organizations that received SPF PFS funding in the past? (Select one response.)<sup>B</sup> Yes No Don't know∏

# **Section 2: Strategic Prevention Framework**

This section asks for information related to the <u>Strategic Prevention Framework</u> steps. You will be asked to describe your activities related to the following steps:

- needs, population of focus, and resources assessments;
- capacity building and sustainability;
- prevention intervention implementation; and
- monitoring and evaluation.

#### Section 2A. Needs, Population of Focus, and Resources Assessments

#### [GRANTEES SKIP TO QUESTION 8, POPULATION OF FOCUS AND OUTCOMES]

This section collects information on <u>organizational and community needs and resources</u> <u>assessments</u> you conducted during this reporting period. First, you are asked whether or not the needs and resources of your community have been assessed. In this section, please also describe any data you have available and the data you used to conduct your needs and resources assessment. This section also asks about the <u>consumption patterns</u>, <u>consequences</u>, <u>intervening variables</u>, and populations you identified to target for your SPF Rx activities.

# **Needs Assessment (Subrecipients only)**

5.	the nee cor trai	syour organization completed an assessment of community needs and resources during past Federal fiscal year? A community needs and resources assessment examines eds external to the organization and includes rates of substance use and related sequences (e.g., overdose), as well as community readiness, prevention resources (e.g., need intervention implementers), partnerships, community prevention experience, and other netary and nonmonetary resources. <sup>E</sup>
		Yes
		No (If selected, skip Questions 6 and 7 on data sources and barriers to needs assessments.)

#### **Data Sources (Subrecipients only)**

This set of questions asks about the availability of community-level prescription drug-related data for data-driven planning (e.g., needs assessments, identifying priority issues and intervening variables to target, performance monitoring). We want you to focus on **local-level data that are available for** your <u>target community or communities</u>.

6. For each of the types of data listed below, check the boxes to indicate (a) whether or not you have access to the data for your target communities (or closest available substate area), and (b) whether you used the data to conduct your <u>community needs</u> and resources assessment. Do NOT check "Yes" if the data are only available at the state level. E (autofill once completed initially)

	commur	Have access to community-level data		were used eeds sment
Data Type	Yes	No	Yes	No
Consumption				
6.1. Prescription drug misuse in the past 30 days or past year				
6.2. Prescription pain reliever misuse in the past 30 days or past year				
6.3. Lifetime prescription drug misuse (ever misused)				
6.4. Lifetime prescription pain reliever misuse (ever misused)				
6.5. Other (Describe.)				
Consequences		'	<u>'</u>	
6.6. Mortality rates due to opioid overdose				
6.7. Emergency department visits/hospital admissions related to opioid misuse/overdose				
6.8. Calls to poison control center related to opioid misuse				
6.9. Other (Describe.)				
Intervening Variables	·			
6.10. Rate of registration of physicians with prescription drug monitoring program (PDMP)				
6.11. Use of PDMP by physicians (number of queries; percentage of physicians making queries)				
6.12. Rate of opioid prescribing				
6.13. Rate of high-dose opioid prescribing (e.g., > 90MME/day or > 100MME/day)				
6.14. Rate of opioid and benzodiazepine coprescribing				
6.15. Rate of multiple prescriber episodes for opioid pain medication (as indicator of possible "doctor shopping")				

	Have access to community-level data		The data were used for needs assessment	
Data Type	Yes	No	Yes	No
6.16. Rate of multiple pharmacy episodes for opioid pain medication				
6.17. Other PDMP measure of opioid prescribing (Describe.)				
6.18. Consumers' perceived risk of prescription drug misuse				
6.19. Parent/peer attitudes about prescription drug misuse				
6.20. Communication with parents about drug use				
6.21. Social availability (e.g., through friends or family members)				
6.22. Physicians' attitudes and knowledge				
6.23. Law enforcement practices (e.g., to address diversion; having police use Narcan to prevent overdose)				
6.24. Other (Describe.)				

# **Needs Assessment Barriers (Subrecipients only)**

In this section, we would like to learn about barriers and challenges that had an impact on assessing the needs, population of focus, and resources in your <u>community</u>, state, tribal area, <u>or jurisdiction</u> during this reporting period.

7. How much did the following factors impact the progress or results of your SPF Rx efforts related to conducting an assessment of community needs and resources <u>in</u> <u>the past Federal fiscal year</u>?

Note: If a specific item is not yet applicable or you do not know the answer based on your stage of implementation, you should check "No impact."

Factor	rs Impacting Needs Assessment <sup>E</sup>	No impact	Low impact	Moderate impact	High impact
7.1.	Inadequate training/technical assistance to assess community needs and resources				
7.2.	Difficulty staffing assessment activities (e.g., delays in hiring, delays in training, turnover)				
7.3.	Limited time for staff and team members to devote to assessment activities				
7.4.	Too broad a geographic area across which to assess needs and resources				
7.5.	Not enough grant funds to support assessment activities				
7.6.	Limited ability to leverage other funds or in-kind donations to support assessment activities				
7.7.	Difficulty coordinating or collaborating with our grantee organization (state/tribe/jurisdiction)				
7.8.	Difficulty coordinating or collaborating with other (non-grantee) public health and substance use agencies and coalitions				
7.9.	Difficulty accessing data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				
7.10.	Difficulty obtaining data specific to disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
7.11.	Difficulty obtaining data specific to high-need subpopulations (e.g., based on age, residential area, socioeconomic status [SES], or other factors)				
7.12.	Mismatch between level of disaggregation of available data (e.g., at state level) and level of project implementation (e.g., in counties within state)				
7.13.	Difficulty analyzing data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				

Facto	rs Impacting Needs Assessment <sup>E</sup>	No impact	Low impact	Moderate impact	High impact
7.14.	Poor quality of data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				
7.15.	Difficulty engaging health care providers and pharmacists				
7.16.	Difficulty engaging disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
7.17.	Difficulty engaging high-need subpopulations (e.g., based on age, residential area, SES)				
7.18.	Stressful events affecting large portions of the community (e.g., natural disasters, COVID-19 related closures, other unexpected traumatic events) (Describe.)				
7.19.	Other (Describe.)				
7.20.	Other (Describe.)				
7.21.	Other (Describe.)				

# **Targeted Populations and Outcomes (Both grantees and subrecipients)**

This set of questions asks about the specific populations and outcomes your community, state, tribal entity, or jurisdiction has identified for your SPF Rx efforts. (Note: Grantees should report their overall targets for their state, jurisdiction, or tribal area) *Complete at baseline and update annually if you have any changes*.

8.	Indi that	cate the <u>consumption pattern(s)</u> you are targeting for your SPF Rx activities. <i>(Select all apply.)</i> <sup>E (autofill once completed initially)</sup>
		Have not identified a consumption pattern to target
		Misuse of any prescription drugs
		Misuse of prescription pain relievers
		Misuse of prescription stimulants
		Misuse of prescription benzodiazepines
		Other consumption pattern (Describe.)
9.	Indi app	cate the <u>consequence(s)</u> you are targeting for your SPF Rx activities. <i>(Select all that ly.)</i> <sup>E (autofill once completed initially)</sup>
		Have not identified a consequence to target
		Emergency department visits or hospitalizations related to prescription drug overdose
		Emergency department visits or hospitalizations related to opioid overdose
		Poison control center calls related to prescription drug overdose
		Poison control center calls related to opioid overdose
		Prescription drug-related overdose deaths
		Opioid-related overdose deaths
		Motor vehicle crashes related to prescription drug or opioid misuse
		Crime related to prescription drug or opioid misuse
		Other consequences (Describe.)

10. Indicate the population(s) you will be focusing on for your SPF Rx prevention activities. In the first column, we would like to know if you have very specific groups of people you are focusing on for your prevention interventions. For example, if you are delivering a prevention intervention to all middle schools in an area, then you would select only "middle school students"; you would not have to select all the possible race/ethnicity categories that might be enrolled in the schools. If, however, you are delivering a prevention intervention specifically designed to target high school-aged Latinos, then you would select Hispanic and high school students. (Note: If you are targeting the whole community or jurisdiction, then choose that answer option [10.1], and do not check all the subpopulations.) (These categories are not mutually exclusive. Use your judgment to select all responses that describe your population of focus.) (Eautofill once completed initially)

In the second column, check any specific subpopulation your SPF Rx prevention activities are focused on to reduce prescription drug misuse-related behavioral health disparities. According to Healthy People 2030, "Health disparities adversely affect groups of people who have systematically experienced greater obstacles to health based on their racial or ethnic group; religion; socioeconomic status; gender; age; mental health; cognitive, sensory, or physical disability; sexual orientation or gender identity; geographic location; or other characteristics historically linked to discrimination or exclusion." We are asking you to specify which of the population(s) you are targeting for your SPR-Rx activities because they experience disparities within your community or communities.

Population	Check if you are specifically focusing on this subpopulation	Check if this subpopulation represents your behavioral health disparities population of focus
10.1. We are targeting community-wide or statewide population, not any specific subpopulations		N/A
10.2. Males		
10.3. Females		
10.4. LGBTQ		
10.5. African Americans		
10.6. American Indians		
10.7. Alaska Natives		
10.8. Asian/Pacific Islanders		
10.9. Hispanics		
10.10. Whites		
10.11. Ages 12–17		
10.12. Ages 18–25		
10.13. Ages 26 and over		
10.14. Other age group (Specify Describe.)		
10.15. Middle school students		
10.16. High school students		

Population	Check if you are specifically focusing on this subpopulation	Check if this subpopulation represents your behavioral health disparities population of focus
10.17. College students		
10.18. Parents		N/A
10.19. Current or former military or military families		
10.20. Individuals living in poverty		
10.21. Individuals whose native language is other than English		
10.22. Individuals with low literacy		
10.23. Individuals with mental illness		
10.24. Individuals with disabilities (e.g., hearing, visually, or physically impaired)		
10.25. Physicians/health care providers/prescribers		N/A
10.26. Pharmacists/dispensers		N/A
10.27. Other population of focus (Specify.)		
10.28. Other population of focus (Specify.)		
10.29. Other population of focus (Specify.)		

11.	Indi app	cate the <u>intervening variable(s)</u> you will be targeting for SPF Rx prevention. (Select all that bly.) <sup>E (autofill once completed initially)</sup>
		Have not yet selected an intervening variable to target
		Laws or regulations related to prescription drug monitoring program (PDMP) data (access, use, timeliness, or quality)
		Laws or policies related to prescriber or dispenser training or practices
		Other laws or policies related to prescription drugs/pain medications
		Law enforcement practices (e.g., to address diversion, having police use Narcan to treat suspected overdose)
		Social access to prescription drugs (e.g., through friends or family members)
		Physician attitudes and knowledge about safe prescribing practices
		Physician/prescriber registration with prescription drug monitoring program
		Physician/prescriber use of prescription drug monitoring program (number of queries; percentage of physicians making queries)
		Rate of opioid prescribing
		Rate of high-dose (> 90 MME/day) opioid prescribing
		Rate of opioid and benzodiazepine co-prescribing
		Rate of multiple prescriber episodes for opioid pain medications (or other indicators of possible "doctor shopping")
		Rate of multiple pharmacy episodes for opioid pain medication
		Norms—perceived parent or peer attitudes or both (toward prescription drug misuse)
		Norms—perceived peer or friend misuse of prescription drugs
		Consumers' perceived risk of harm of prescription drug misuse
		Consumers' perceived risk of getting caught misusing prescription drugs
		Family communication around prescription drug misuse
		Resistance or life skills or both
		Availability of prosocial activities
		Other intervening variable (Describe.)
		Other intervening variable (Describe.)
		Other intervening variable (Describe.)
12.	Hov Rx	w would you describe the community or communities that you are targeting for your SPF prescription drug misuse prevention activities? (Select all that apply.) <sup>E (autofill once completed initially)</sup>
		Entire state/jurisdiction
		Large urban area(s) (population of more than 500,000)
		Smaller urban area(s) (population of 50,001 to 500,000)
		Small town or urban cluster(s) (population of 2,500 to 50,000)
		Rural area(s)
		Other (Describe.)

#### [GRANTEES SKIP TO SECTION 2C PREVENTION INTERVENTION IMPLEMENTATION]

# Section 2B. Capacity Building and Sustainability (Subrecipients only)

In this section, we ask you about your activities related to capacity and sustainability. <u>Capacity</u> refers to the quality and level of skills (e.g., workforce) and resources needed to achieve a desired outcome. For SPF Rx, capacity refers to the demonstrated ability of <u>subrecipients</u> to effectively implement each SPF step (i.e., assess needs, build capacity, plan, implement, and evaluate) and the resources (human, organizational, and fiscal) to support the implementation of the SPF model. <u>Capacity building</u> refers to activities conducted to improve the ability of an organization or <u>community</u> to deliver prescription drug misuse prevention services, such as improving organizational resources, seeking and receiving relevant training and technical assistance (T/TA), building new relationships or strengthening existing relationships among groups and organizations involved in prescription drug misuse prevention, and ensuring that prevention intervention activities and outcomes continue after SPF Rx funding ends.

# **Current Capacity (Subrecipients only)**

13. How much would you agree or disagree that your organization currently has enough capacity in each of the following areas to effectively implement your SPF Rx prevention efforts? (*Note:* At baseline, the questions should be answered with regard to your organization's capacity at the time you received SPF Rx funds.) <sup>E</sup>

Capa	city Areas	Strongly disagree	Disagree	Agree	Strongly agree
13.1.	Capability and experience using the 5 SPF steps				
13.2.	Experience with the populations of focus for prescription drug misuse prevention				
13.3.	Experience working with health care providers and pharmacists for prescription drug misuse prevention				
13.4.	Experience with relevant interventions for prevention of prescription drug misuse				
13.5.	Experience collaborating with other organizations on interventions to prevent prescription drug misuse				
13.6.	Capability to use prescription drug monitoring program (PDMP) data for prevention planning, surveillance, and evaluation				
13.7.	Staff with the right skills to effectively implement SPF Rx prevention efforts				
13.8.	Enough staff to effectively implement SPF Rx prevention efforts				
13.9.	Enough fiscal/financial resources to effectively implement SPF Rx prevention efforts				
13.10	. Capability to sustain the prevention efforts				

Capacity Areas	Strongly disagree	Disagree	Agree	Strongly agree
over time				
13.11. Experience addressing behavioral health disparities in prevention efforts				

# **Training and Technical Assistance (Subrecipients only)**

- 14. Select the area(s) in which your organization or staff needed and/or received SPF Rx-related guidance or training and technical assistance (T/TA) during **the past Federal fiscal year**. We are specifically asking about guidance and T/TA that contributed to your SPF Rx activities. (Select all that apply.) <sup>E</sup>
  - ☐ We did not need or receive any guidance or T/TA that contributed to SPF Rx activities

_	activities		
Traini	ng/technical assistance (T/TA) areas	Needed or need T/TA in this area during the past Federal fiscal year	Received T/TA in this area during the past Federal fiscal year
14.1.	Assessing community needs and resources		
14.2.	Using prescription drug monitoring program (PDMP) data for prevention surveillance, planning, or evaluation		
14.3.	Using other data sources for prevention assessment, planning, and evaluation		
14.4.	Understanding opioid misuse and epidemiology, including risk and protective factors		
14.5.	Developing a strategic plan for substance use prevention		
14.6.	Building collaborative relationships with stakeholders and partner agencies		
14.7.	Working with medical and pharmaceutical communities to prevent prescription drug misuse

# PDMP Data Access (Subrecipients only)

20.		your community have access to community-level prescription drug monitoring program MP) data/reports for prevention planning <u>prior to the SPF Rx 2021 grant</u> ? <sup>B</sup>
		Yes, we had access to community-level PDMP data but did not normally use it for prevention planning.
		Yes, we had access to and normally used community-level PDMP data for prevention planning.
		No, we did not have access to community-level PDMP data.
21.	upd	ing the past Federal fiscal year, approximately how often did you receive or access ated PDMP data/reports for your SPF Rx target communities (or the closest available state area)? (Select one) <sup>E</sup>
		We did not receive or access any PDMP data/reports in the past fiscal year
		Once
		Semi-annually (twice per year)
		Quarterly
		Every other month
		Monthly
		Other (Specify.)
22.	For (updat	what geographic area are PDMP data/reports available to you? (Select all that apply.) <sup>E</sup>
		PDMP data are not available to us yet
		Community
		County
		District or Region
		State
		Other (Specify.)
23.		privacy or HIPAA concerns a major barrier to receiving community-level PDMP reports? <sup>E</sup>
		Yes
		No

24.		w has your access to and use of community-level PDMP data/reports as part of your SPF effort affected your local prevention efforts? (Select all that apply.) F
		We did not get access to any community-level PDMP data/reports during the grant
		We had access to community-level PDMP data/reports, but we were not able to use them
		PDMP data did not significantly change our prevention approach
		PDMP data changed our understanding of the problem
		PDMP data guided local prevention strategies in new directions
		PDMP data enabled us to better monitor risky prescribing and dispensing patterns
		PDMP data informed enforcement efforts in new ways
	П	Other (Describe)

# **Capacity Building Barriers (Subrecipients only)**

In this section, we would like to learn about barriers and challenges that had an impact on **building capacity** in your <u>community</u>, <u>state</u>, <u>tribal area</u>, <u>or jurisdiction</u> during this reporting period.

25. How much did the following factors impact the progress or results of your SPF Rx efforts related to improving the ability of your organization or <u>community</u> to deliver prescription drug misuse prevention services <u>in the past Federal fiscal year</u>?<sup>E</sup>

Note: If a specific item is not yet applicable or you do not know the answer based on your stage of implementation, you should check the box "No impact."

Facto	rs Impacting Capacity Building	No impact	Low impact	Moderate impact	High impact
25.1.	Inadequate training/technical assistance to build capacity				
25.2.	Difficulty staffing capacity-building activities (e.g., delays in hiring, delays in training, turnover)				
25.3.	Limited time for staff and team members to devote to capacity building				
25.4.	Building capacity across too broad a geographic area				
25.5.	Not enough grant funds to support capacity-building activities				
25.6.	Limited ability to leverage other funds or in-kind donations to support capacity-building activities				
25.7.	Difficulty coordinating or collaborating between grantee organization and subrecipients				
25.8.	Difficulty coordinating or collaborating with other (non-grantee) public health and substance use agencies and coalitions				

Factor	rs Impacting Capacity Building	No impact	Low impact	Moderate impact	High impact
25.9.	Public health and substance abuse agencies and coalitions prioritize prescription drug/opioid misuse treatment over prevention				
25.10.	Lack of prioritization of prescription drug/opioid misuse prevention by state leadership (e.g., governor's office, legislature)				
25.11.	Difficulty getting buy-in and support from the medical community (e.g., health care professionals, medical or pharmacy boards and associations)				
25.12.	Difficulty engaging health care providers and pharmacists				
25.13.	Difficulty engaging disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
25.14.	Difficulty engaging high-need subpopulations (e.g., based on age, residential area, SES)				
25.15.	Stressful events affecting large portions of the community (e.g., natural disasters, COVID-19 related closures, other unexpected traumatic events) (Describe.)				
25.16.	Other (Describe.)				
25.17.	Other (Describe.)				
25.18.	Other (Describe.)				

# **Sustainability (Subrecipients only)**

This section asks about things you have done to ensure that SPF Rx-related prevention intervention activities and outcomes continue once SPF Rx funding ends. These efforts might focus on ensuring continued funding, structures, networks, partnerships, leadership, and resources.

26.	mis	ring the past Federal fiscal year, how have you worked to ensure that prescription drug cuse prevention intervention activities and outcomes continue after SPF Rx funding has led? (Select all that apply.) <sup>E</sup>
		Have not done work in the past year to ensure that prescription drug misuse prevention intervention activities and outcomes continue after SPF Rx funding has ended
		Leveraged, redirected, or realigned other funding sources or in-kind resources to carry on SPF Rx efforts
		Obtained new funding (e.g., used the success of the SPF Rx efforts to secure other funds)
		Worked to ensure that prescription drug misuse prevention intervention activities are incorporated into the missions/goals and activities of other organizations (e.g., medical boards, local pharmacies, school districts, law enforcement agency)
		Worked to ensure that prescription drug misuse prevention staff positions are integrated into other organizations (e.g., health departments, school districts, community agencies

Worked to gain <i>formal</i> adoption of prescription drug misuse prevention intervention activities into other organizations' practices (e.g., health care provider organizations, pharmacies, medical school curriculum, school district curriculum, organizational policy change)
Worked to inform, help implement, or provide education related to new laws, policies, or regulations to guarantee the continuation of prescription drug misuse prevention intervention activities or outcomes
Worked on developing a prescription drug misuse partnership structure that will continue to function beyond the end of the SPF Rx grant period
Worked to create sustainable data infrastructure and staffing to continue to monitor PDMP and other surveillance data after SPF Rx grant ends
Other (Describe.)

# Section 2C. Prevention Intervention Implementation (Both grantees and subrecipients complete)

This section collects information about the SPF Rx prevention interventions you selected for implementation in your service area. A prevention intervention is an activity or set of activities to which a group or community is exposed to in order to change their behavior. For SPF Rx, these activities should aim to prevent or lower the rate of prescription drug misuse and related problems. Interventions include activities related to:

- Community-based processes (e.g., holding meetings or training with community members, reallocating funds to prevention activities in the community, reorganizing local agencies and organizations to address prevention of prescription drug misuse)
- Prevention education (e.g., mentoring, school-based youth education programs, parenting programs)
- Alternative activities (e.g., free social and recreational events, events at community drop-in centers or youth centers),
- Problem identification and referral (e.g., student screening and referral)
- Environmental strategies (e.g., training of environmental influencers, policy change, enforcement)
- Information dissemination and other communication activities (e.g., conducting media campaigns, distribution of materials at health fairs)

Refer to the Annual Reporting Tool (ART) manual for more information on prevention interventions.

27.	Did you or your community partners deliver any SPF Rx-related prevention interventions during the past Federal fiscal year? (Select one response.) <sup>E</sup>			
		Yes		
		No (If selected, you will skip Questions 28–146.)		

# **Implemented Prevention Interventions**

28. Name all the prevention interventions you or your partners delivered during this reporting period as part of your SPF Rx efforts. Refer to the Annual Reporting Tool (ART) Manual before you complete this section. That document will help you understand what to report as a prevention intervention; which activities you should list as separate service types related to that intervention; and how to determine the appropriate CSAP strategy type, Institute of Medicine category, and so on. [6] (autofill for interventions previously reported, except for active/linactive status)

You will need to complete a separate implementation information sub-form for each prevention intervention-service type you name below that was active during the past Federal fiscal year. The CSAP strategy type will determine a subset of questions you must complete for the prevention intervention and service type.

28a. Intervention name	28b. Service type	28c. Service type name	28d. Date started	28e. CSAP strategy type	28f. Institute of Medicine (IOM) category	28g. Status	28h. Date completed or discontinued
down menu, select the name of each prevention intervention you are implementing, or select "other" and write in the name. To review a full list of the intervention names, refer to the Intervention	the service type for each major set of services or activities you are implementing under this prevention intervention, or select "other" and write in the name.	services or activities that you implemented as part of your	Date you began funding this intervention- service type through your SPF Rx initiative (MM/YYYY)	Select the CSAP strategy type that best describes this intervention-service type:  Community-based processes Environmental strategy Prevention education (of the public) Alternative activities Problem identification and referral Environmental strategy Information dissemination (and other communication activities)	Select the IOM category for this intervention-service type:  Universal direct Universal indirect Selective Indicated	Check whether the intervention- service type was Active, Inactive, Completed, or Discontinued during the past Federal fiscal year.	For intervention- service types completed or discontinued during the past year, indicate the date completed or discontinued (MM/YYYY).

# Sample Table:

28a. Intervention name	28b. Service type	28c. Service type name	28d. Date started	28e. CSAP strategy type	28f. Institute of Medicine (IOM) category	28g. Status	28h. Date completed or discontinued
Train/educate health care providers on safe prescribing/CDC guidelines	Training/ educating environmental influencers	Training/ educating environmental influencers	03/2022	Environmental	Universal indirect	Completed	09/2023

# **Prevention Intervention and Service Type Information**

Questions in this section are only asked for each intervention active, completed or discontinued in the past federal fiscal year (see Q28g)

N	ame	of Prevention Intervention:	E (autofill from Question 26)
Inter	vent	tion questions	
29.	Wh inte	at specific consumption pattern(s) or consequence(s) (or both) are the rvention intended to target? <i>(Select all that apply.)</i> E(autofill after first complete	ne prevention
		Misuse of any prescription drugs	
		Misuse of prescription pain relievers	
		Misuse of prescription stimulants	
		Misuse of prescription benzodiazepines	
		Prescription drug/opioid-related deaths	
		Emergency department visits or hospitalizations related to prescript overdose	tion drug/opioid
		Poisoning center calls related to prescription drug/opioid overdoses	3
		Motor vehicle crashes related to prescription drug/opioid misuse	
		Crime related to prescription drug/opioid misuse	
		Other consumption pattern (Describe.)	
		Other consequence (Describe.)	
30.	Wh	at specific intervening variable(s) is the prevention intervention intenthat apply.) <sup>E (autofill after first completed)</sup>	ded to target? (Select
		This intervention is not targeting a specific intervening variable	
		Laws or regulations related to prescription drug monitoring program (access, use, timeliness, or quality)	n (PDMP) data
		Laws or policies related to prescriber or dispenser training or practi	ces
		Other laws or policies related to prescription drugs/pain medication	S
		Law enforcement practices (e.g., to address diversion, having polic suspected overdose)	e use Narcan to treat
		Social access to prescription drugs (e.g., through family and friends	s)
		Physicians' attitudes and knowledge about safe prescribing practice	es
		Physician/prescriber registration with PDMP	
		Physician/prescriber use of PDMP (number of queries; percentage queries)	of physicians making
		Rate of opioid prescribing	
		Rates of high-dose opioid prescribing (> 90MME/day)	
		Rate of opioid and benzodiazepine co-prescribing	

		Rates of multiple prescriber episodes for opioid pain relievers (as indicator of possible "doctor shopping")
		Rates of multiple pharmacy episodes for opioid pain medication
		Norms—perceived parent or peer attitudes or both (toward prescription drug misuse)
		Norms—perceived friend or peer misuse of prescription drugs
		Consumers' perceived risk of harm of prescription drug misuse
		Consumers' perceived risk of getting caught misusing prescription drugs
		Family communication around prescription drug misuse
		Resistance or life skills or both
		Availability of prosocial activities
		Other intervening variable (Describe.)
		Other intervening variable (Describe.)
		Other intervening variable (Describe.)
31.	(EB	your knowledge, is this intervention an evidence-based program, policy, or practice PPP)? EBPPPs are defined as interventions that come from a Federal Registry, were orted as effective for your target substance in a published scientific journal article, were ed on a documented theory of change, or were deemed effective by a panel of experts lect one response.) (autofill after first completed)
		Yes
		No
		Don't know
32.	Hov	v did you select your intervention? (Select all that apply.) (Select all that apply.) (Select all that apply.)
		Inclusion in a Federal registry of evidence-based interventions
		Found to be effective (on the primary targeted outcome) in a <b>published</b> , <b>scientific journal</b>
		Similar in <b>content and structure</b> to interventions that appear in registries or peer-reviewed literature
		Supported by <b>documentation of effective implementation</b> multiple times in the past (showing consistent pattern of positive effects)
		Reviewed by a <b>panel of informed experts</b> including qualified prevention researchers, local prevention practitioners, and key community leaders (e.g., law enforcement and education representatives, elders within indigenous cultures)
		Recommended by evidence-based practice workgroup (EPBW)
		Appeared on a <b>list of recommended</b> promising or evidence-based programs, policies, and practices provided by our state, tribal entity, or jurisdiction
		Recommended by the SPF Rx grantee (state, tribe, or jurisdiction) but not on a formal list of promising or evidence-based programs, policies, and practices
		Is based on guidelines, protocols, standards, or preferred practice patterns that have been proven to lead to effective prevention outcomes
		Based on a <b>theory of change</b> that is documented in a clear logic or conceptual model
		Other (Describe.)

33.	Hav imp	/e you renamed the existing promising or evidence-based program, policy, or practice to lement it in your community? (Select one response.) E (autofill after first completed)
		Yes (Provide the original name.)
		No
34.	Whi inte	ich of the following best describes the implementation history of this prevention rvention in your community? (Select one response.) <sup>E (autofill after first completed)</sup>
		Not implemented in the community before SPF Rx 2021 funding
		Continuation of a PFS or SPF Rx 2016 prevention intervention
		Continuation of a non-PFS or non-SPF Rx 2016 prevention intervention
35.	inte exa	re any adaptations made to address the <b>cultural appropriateness</b> of the prevention rvention for a particular group (e.g., modifying the language or slang used, modifying the imples, including visuals of individuals who represent your population of focus) <b>in the past leral fiscal year</b> ? (Select one response.) <sup>E</sup>
		Yes (Describe the adaptations.)
		No
36.		you collaborate with any organizations or individuals to implement this intervention for Rx <u>in the past Federal fiscal year</u> ? <sup>E</sup>
		Yes
		No
		Don't know

#### Service type questions

Questions in this section are only asked for each intervention active, completed or discontinued in the past federal fiscal year (see Q28g)

Name of Prevention Intervention: _	(autofill from Question 26)
Service Type:	(autofill from Question 26)

37. For Questions 37.1–37.5, indicate the locations and population of focus being served by this prevention intervention-service type. *If you are implementing in separate settings (e.g., schools, workplaces), list each setting separately. (Note: If you are implementing a media campaign that reaches the whole county, you may enter "countywide" for location [Question 37.1].)* 

Use one line to describe each location served by the intervention-service type. Other than estimated population of focus (Question 37.5), you need to complete only those categories that are appropriate for this prevention intervention-service type and  $\underline{\text{community}}$  served.  $^{\text{E}}$  (autofill after first completed)

	37.1. Location (e.g., school name, business, community center)	37.2. City/tow n	37.3. County / parish	37.4. Population of focus description (Describe; 500-character limit)	37.5. What is the estimated number of individuals within your population of focus within the location listed?
1.					
2.					
3.					
4.					
5.					
6.					
7.					
8.					
9.					
10					

<sup>&</sup>lt;sup>a</sup> The number of individuals within your population of focus is likely smaller than the total population in the location. For example, if 10,000 individuals live in the area (total population), but only 3,000 of those are in the target 12- to 20-year-old age group for this prevention intervention, your estimated target population is 3,000. If your target population for this prevention intervention is more specific (e.g., Hispanic high school students or non-college youth aged 18 to 20), your population of focus number would be even smaller (e.g., 200). Report your population of focus size as accurately as possible.

## **Community-Based Processes Sub-Form**

Questions in this section are only asked for each intervention categorized as a community-based process (see Q28e) and also categorized as active, completed or discontinued in the past federal fiscal year (see Q28g)

Name of Prevention Intervention: \_\_\_\_\_

	Service Type:	E (autofill from Question 28)
	you expect will enhance the ability of the use. Community-based processes you demeetings with or training key stakeholders organizations; developing prevention prov	mmunity-based intervention-service type activities that community or prevention system to influence substance escribe here might include holding more specific is and partners or other community members and wider networks; reorganizing local agencies; reallocating changing how local organizations work together to
	stakeholder or partner relationships) or th coalition meetings) should not be included section earlier in this instrument. Also, yo	y building (e.g., training prevention staff, building e general functioning of your organization (e.g., d here and are better described in the capacity-building u should categorize trainings of environmental sts as environmental strategies for CSAP strategy type
38.	(e.g., stakeholder/partner meetings, T/	you do any work related to community-based processes TA for community, reorganization of local agencies, or escription misuse prevention) during the past Federal
	□ Yes	
	□ □No (If selected, you will automat	ically proceed to the end of this sub-form.)
39.		rtner meetings you held <b>during the past Federal fiscal</b> if any. <i>This response should be written as a whole</i>
	meetings (If none, en	ter "0.")
40.		artners you trained <b>during the past Federal fiscal</b> if any. <i>This response should be written as a whole</i>
	stakeholders/partner	s trained (If none, enter "0.")
41.		mbers, other than stakeholders/partners, you trained or this intervention-service type, if any. <i>This response</i> $(e.g., 4)$ .
	community members	trained (If none, enter "0.")

E (autofill from Question 28)

42.	Indicate the number of community organizations to whom you provided training or technical assistance <b>during the past Federal fiscal year</b> for this intervention-service type, if any. <i>This response should be written as a whole number</i> $(e.g., 4)$ .
	community organizations (If none, enter "0.")
43.	Did you develop a prescription drug misuse prevention provider network <b>during the past Federal fiscal year</b> for this intervention-service type? For example, you may have established a prescriber and dispenser group that meets regularly. ( <i>Select one response</i> .) <sup>E</sup>
	□ Yes
	□ □No, we do not yet have a network
	□ No, a network was already in place
44.	For this intervention-service type, <b>during the past Federal fiscal year</b> , did you help with reorganizing agencies to promote efficiency in delivering prescription drug misuse prevention services? (Select one response.) <sup>E</sup>
	□ Yes
45.	For this intervention-service type, <b>during the past Federal fiscal year</b> , did you reallocate other (non-SPF Rx) sources of funding to help support the goals of your SPF Rx effort? (Select one response.) <sup>E</sup>
	□ Yes
	□ □No
46.	For this intervention-service type, <b>during the past Federal fiscal year</b> , did you formally change the ways organizations work together to prevent prescription drug misuse —for example, by documenting specific policies or practices for working together? (Select one response.) <sup>E</sup>
	□ Yes
47.	For this intervention-service type, did you conduct other community activities <b>during the past</b> Federal fiscal year? (Select one response.) <sup>E</sup>
	☐ Yes (Describe.)
	□ No

# Overall Population of Focus reached by this intervention-service type

(Sum of reported populations of focus in item 37.5 for this service type: Preserved by the estimated number of individuals in the population of focus in affected by your implementation of this community-based process int during the past Federal fiscal year. #### **Environmental Strategies Sub-Form**

Questions in this section are only asked for each intervention categorized as an environmental strategy intervention (see Q28e) and also categorized as active, completed or discontinued in the past federal fiscal year (see Q28g)

Name of Prevention Intervention:	E (autofill from Question 28)
Service Type:	E (autofill from Question 28)

This sub-form should focus on environmental strategies that establish or change community conditions to influence substance misuse. Approaches may center on policy, regulatory, or legal changes or implementation; efforts to maximize enforcement of laws or policies related to prescription drugs; organizational-level policy change; safe storage and disposal activities; or training of those able to directly influence environmental conditions, such as health care professionals, pharmacists, and law enforcement.

Note that you should report all media and communication campaigns as information dissemination and all parent education programs as prevention education for CSAP strategy type in item 28. Note that if you conduct an information dissemination campaign to promote use of existing prescription drug drop boxes, you would report that in the information dissemination subform. In this section, you would report on the installation of new drop boxes.

Throughout this section, refer to your organization or partners with your organization. For example, if you worked with the police department on diversion, you would report it on this form.

#### I. Training and educating environmental influencers

In this section, report strategies that include providing training and individual education for those in positions to affect prescription drug misuse through policy, prescribing and dispensing practices, enforcement, communication, and so on (e.g., health care providers, pharmacists, law enforcement officers, school employees). Include only training and individual education related to the <a href="mailto:specific environmental">specific environmental</a> strategy on which you are reporting in this sub-form. Do not include training conducted for other environmental strategies that you have listed as separate environmental strategies.

environmental Influencers—those in positions to affect prescription drug misuse policy, enforcement, communication, and so on (e.g., health care providers, phar		this environmental strategy include training or individual education (e.g., "detailing") with ironmental Influencers—those in positions to affect prescription drug misuse through cy, enforcement, communication, and so on (e.g., health care providers, pharmacists, law preement officers, school employees)—during the past Federal fiscal year? (Select all tapply.) <sup>E</sup>
		Yes, group training of environmental influencers (If not selected, you will skip questions 82-83.)
		Yes, individual one-on-one education of environmental influencers (If not selected, you will skip Question 84.)
		No (If selected, you will skip Questions 81-85.)

81.	affe	which types of environmental influencers did you provide training or individual education to ect prescription drug misuse through policy, enforcement, communication, and so on in the past Federal fiscal year? (Select all that apply.) [6] (autofill after first completed)
		Health care providers/medical community
		Dentists/dental community
		Veterinarians/veterinary community
		Pharmacists/pharmacy community
		Insurers
		School employees or administrators
		Law enforcement
		Other policymakers such as elected officials

		hours
85.	env	w many <b>total individuals</b> participated in group training or individual education of ironmental influencers <b>during the past Federal fiscal year?</b> <i>This response should be ten as a whole number</i> (e.g., 4). <sup>E</sup>
		individuals participated in group training of environmental influencers
		individuals participated in individual education of environmental influencers

## II. Policy, regulation, or law enactment or implementation

In this section report on what you did through this SPF Rx environmental strategy related to policy, regulation, or law enactment or implementation at either the state level or with organizations at the local level. Include only activities related to the specific environmental strategy on which you are reporting in this sub-form. Do not include activities for other environmental strategies that you have listed as separate environmental strategies.

86.	<b>During the past Federal fiscal year</b> , did your SPF Rx environmental strategy include any policy, regulation, or law enactment or implementation? This would include changing, implementing, or strengthening the implementation of new laws at the state level or working with organizations at the local level to develop or implement policies to advance the goals of SPF Rx (e.g., help health care provider organization institute policies to follow CDC guidelines for prescribing opioids). (Select one response.) <sup>E</sup>			
	☐ Yes ☐ No (If selected, you will skip Questions 87-93.)			
87.	<b>During the past Federal fiscal year</b> , did you do any work related to changing or implementing laws, regulations, government policies, or licensing requirements as part of your SPF Rx efforts? For example, this could involve state laws related to the use of PDMP data or to opioid prescribing practices. <sup>E</sup>			
	<ul><li>☐ Yes</li><li>☐ No (If selected, you will skip Questions 88-90.)</li></ul>			

88.	ena	what types of activities were you engaged in <b>during the past Federal fiscal year</b> to support enactment or implementation of laws, regulations, governmental policies, or licensing requirements? (Select all that apply.) <sup>E</sup>		
		Met with elected officials or policymakers to educate them on the policy issues		
		Conducted research or analysis of policy options for officials or policymakers		
		Informed key stakeholders and institutions about the new policy, law, or requirement		
		Coordinated activities or meetings with key stakeholders and organizations		
		Developed informational materials (fliers, postcards, websites) related to the new policy, law, or requirement		
		Distributed informational materials (fliers, postcards, websites) related to the new law/policy/requirement		
		Other activities (Describe.)		
		Other activities (Describe.)		
		Other activities (Describe.)		

89. Indicate which of the following laws, regulations, government policies, or licensing requirements you worked on **during the past Federal fiscal year** as part of your SPF Rx effort. Include only activities related to the specific environmental strategy on which you are reporting in this sub-form. Do not include activities that are part of other environmental strategies that you have listed as separate interventions. Note that some items will only be applicable to the primary grantee or the subrecipient, depending on whether they are state or local types of activities. For example, state-level grantees may be more involved in state-level legislative issues (e.g., prescription drug monitoring program [PDMP] laws) than subrecipient communities are.

Please check the boxes below for any specific laws, regulations, government policies, or licensing requirements that you worked on during the past year. Then indicate whether your activities related to change (enactment) or implementation of the new law, regulation, governmental policy, or licensing requirement (or both). (Select all that apply.)<sup>E</sup>

#### PDMP-related government policies, regulations, or laws at the state level:

Require universal prescriber registration with the PDMP
☐ Involved with changing policy or law
☐ Involved with implementation
Allow doctors to assign authorized delegates to access PDMP data
☐ Involved with changing policy or law
☐ Involved with implementation
Require participation in the PDMP for new types of prescribers (e.g., dentists, veterinarians)
☐ Involved with changing policy or law
☐ Involved with implementation
Have state rules that delineate circumstances when prescribers must query the PDMP for their patients' history of opioid prescriptions
☐ Involved with changing policy or law
☐ Involved with implementation
Require that pharmacists upload opioid dispensing data more quickly (e.g., within 24 hours)
☐ Involved with changing policy or law
☐ Involved with implementation
Expand the scope of data reported to PDMP by pharmacists (e.g., source of payment)
☐ Involved with changing policy or law
☐ Involved with implementation
Allow expansion of PDMP data access to allow use for public health surveillance, prevention, and research
☐ Involved with changing policy or law
☐ Involved with implementation

		Develop interstate agreements to share PDMP data (e.g., facilitate providers' ability to query PDMPs of neighboring states)
		☐ Involved with developing policy
		☐ Involved with implementation of new policy
		Create a linkage between patients' PDMP records and their electronic health records
		☐ Involved with developing policy
		☐ Involved with implementation of new policy
PDMF	P-rel	ated data aggregation and reporting:
		Change the algorithm by which patients with similar names and other characteristics are aggregated
		☐ Involved with developing policy
		☐ Involved with implementation of new policy
		Produce regular reports from the PDMP that summarize key state, regional, or local statistics of interest
		☐ Involved with developing policy
		☐ Involved with implementation of new policy
		Produce unsolicited reports from the PDMP
		☐ Involved with developing policy
		☐ Involved with implementation of new policy
		For which group are the new unsolicited reports? (check all that apply):
		□ Prescribers (Describe purpose.)
		□ Dispensers (Describe purpose.)
		☐ Licensing boards (Describe purpose.)
		☐ Law enforcement agencies (Describe purpose.)
		☐ Other group (Specify and describe purpose.)
Preso	ribii	ng-related government policies, regulations, or laws:
		Mandate prescriber training on safe opioid prescribing
		☐ Involved with changing policy, regulation, or medical licensing board requirement
		☐ Involved with implementation of new requirement
		Limit dose of opioid prescription (e.g., 90 MME/day) without special approval
		$\hfill\square$ Involved with changing state guidelines or state insurance/Medicaid pharmacy policy
		☐ Involved with implementation of new guidelines/policies
		Limit duration of opioid prescription for chronic noncancer pain patients without special approval
		☐ Involved with changing state guidelines or state insurance pharmacy policies
		☐ Involved with implementation of new guidelines/policies

Pain (	clinic	c-related government policies, regulations, or laws:
		Require pain clinics to be regularly certified by state medical board
		☐ Involved with changing law/regulations, policy, or medical board requirement
		☐ Involved with implementation of new requirement
		Require pain clinics to be owned and operated by licensed physicians
		$\ \square$ Involved with changing law/regulations, policy, or medical board requirement
		☐ Involved with implementation of new requirement
Other	cha	nges to laws, regulations, or government policies
		Other regulations, laws, or government policies related to SPF Rx that you worked on in the past year. (Describe. 3,000-character limit)
		☐ Involved with changing law/policy
		☐ Involved with implementation
90.	ena	cribe any new laws, regulations, licensing requirements, or government policies that were cted, established, or implemented during the past Federal fiscal year related to this icular environmental strategy. (3,000-character limit)
Orgai	nizat	ional Policies
91.	orga	you work with individual organizations (e.g., local hospitals, local primary care anizations, pharmacies, insurers) <b>during the past Federal fiscal year</b> to help them to elop or implement organizational policies related to SPF Rx goals? <sup>E</sup>
		Yes
		No (If selected, you will skip Questions 92 and 93.)
92.	duri	ase check the boxes below to indicate any SPF Rx program activities you carried out ing the past Federal fiscal year related to helping institutions develop or implement anizational policies. (Select all that apply.) <sup>E</sup>

PDMP data organizational policy		
	Worked with medical organizations to incorporate or implement policies to register health care providers/prescribers with the PDMP	
	Worked with medical organizations to incorporate or implement policies requiring their medical providers to query their patients' PDMP records before prescribing opioids	
	Worked with pharmacy organizations to incorporate or implement policies to improve timeliness of PDMP upload	
	Worked with organizations to incorporate or implement policies to improve scope or quality of PDMP data	
	Worked with organizations to establish policies or agreements related to linkage of patient PDMP records with patient electronic health records (EHRs)	
	Worked with organizations to establish or implement policies or agreements related to linkage of PDMP data with vital records (deaths) or overdose data (e.g., emergency room visits or hospital admissions)	
	Worked with organizations to incorporate or implement policies to increase PDMP access or ease of use	
Safe pres	scribing organizational policy	
	Helped institutions implement/incorporate national CDC (or similar state) prescribing guidelines into their rules and codes	
	Helped institutions incorporate alternatives to opioids for pain treatment	
	Helped medical or pharmacy schools to incorporate prescription drug/opioid misuse prevention-related education into their curricula	
Pharmac	y organizational policy	
	Helped organizations with pharmacy benefit strategy change (e.g., institute drug utilization reviews for high-dose opioids)	
	Helped pharmacies with policies related to querying PDMP for risky prescription patterns	
Social access organizational policy		
	Helped with organizational policies related to social access, including safe storage and disposal of prescription drugs (e.g., help develop policies to facilitate broader distribution of home lock boxes to individuals filling prescriptions for opioids/controlled substances) (Describe.)	
Developr	ment of enforcement organizational policy	
	Collaborated with organizations (e.g., medical regulatory bodies, law enforcement) to develop enforcement policies related to pain clinics	
	Collaborated with medical authorities (e.g., medical board/association) to develop policies to send letters to health care providers with higher-than-usual opioid prescribing rates or risky prescribing behaviors based on PDMP data	

93.		scribe any other work you did in the <b>past Federal fiscal year</b> related to helping individual anizations develop or implement policies that advance SPF Rx goals. (3,000-character t). <sup>E</sup>
III.	En	forcement implementation
enford to the activit	eme spec ies c	on relates to the implementation of enforcement activities. (Development of new ent-related policies should be reported in the policy section.) Include only activities related cific environmental strategy on which you are reporting in this sub-form. Do not include conducted for other environmental strategies that you have listed as separate ental strategies.
94.	coll pos	your environmental strategy include implementation of enforcement efforts (e.g., aboration with law enforcement or medical/pharmaceutical authorities to respond to sible prescription drug diversion) during the past Federal fiscal year? (Select one poonse.) <sup>E</sup>
		Yes
		No (If selected, you will skip Questions 95 and 96.)
95.		icate which of the following activities you worked to implement <b>during the past Federal</b> cal year related to enforcement (Select all that apply.). <sup>E</sup>
		Collaborated with organizations (e.g., pharmacies, law enforcement) to prevent or respond to suspected diversion
		Collaborated with organizations to enforce policies, laws, or regulations related to pain clinics
		Collaborated with organizations to enforce policies or guidelines related to opioid prescribing
		Collaborated with organizations to send letters or reports to health care providers with higher-than-usual opioid prescribing rates or risky prescribing behaviors based on PDMP data
		Other major enforcement-related practices or activities in the past year (Describe;

96. For this environmental strategy of enforcement, did you **collaborate with law enforcement** (e.g., work with law enforcement to familiarize them with high-risk areas of the community) **during the past Federal fiscal year?** (*Select one response.*)<sup>E</sup>

☐ Yes

□ No

#### IV. Safe Storage and Disposal Strategies

3,000-character limit.)\_\_

This section relates to the implementation of environmental strategies related to safe storage or disposal of prescription drugs. Include only activities related to the specific environmental strategy on which you are reporting in this sub-form. Do not include activities conducted for other environmental strategies that you have listed as separate environmental strategies

97.	<b>During the past Federal fiscal year</b> , did you work on any environmental strategies related to safe storage or disposal of prescription drugs? <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Questions 98-101.)
98.	How many prescription drop boxes were already in your target geographic area before you began your SPF Rx 2021 grant)? E (autofill after first completed)
99.	<b>During the past Federal fiscal year</b> , how many prescription drug boxes did you install in law enforcement agencies, pharmacies, and other locations? Enter total for each type of location. <sup>E</sup>
	installed in law enforcement agencies
	installed in pharmacies
	installed other locations
100.	How many prescription drug take-back events did you organize, support, or participate in <b>during the past Federal fiscal year?</b> This response should be written as a whole number $(e.g., 4)$ .
101.	<b>During the past Federal fiscal year</b> , did you engage in any other safe storage or disposal activities related to prescription drugs (e.g., increase the distribution or access to home lock boxes or Deterra bags)? <sup>E</sup>
	☐ Yes (Describe; 3,000-character limit.) ☐ No
V.	Other Environmental Strategies
102.	<b>During the past Federal fiscal year</b> , did you engage in any other environmental strategies that did not fall into the categories of safe storage/disposal, policy, enforcement, or training of environmental influencers? Describe any other environmental strategy you worked to or did implement during the past year. <sup>E</sup>
	☐ Yes (Describe; 3,000-character limit.)
	□ No

#### Overall Population of Focus reached by this intervention-service type

The questions in this section collect information on the individuals ultimately reached or affected through your training of environmental influencers, enforcement efforts, policy-related activities, safe storage/disposal, or other environmental strategies. This goes beyond the number of individuals directly involved in the training, policy change, or enforcement to estimate the numbers affected in the targeted population in your entire community. This set of questions specifically refers to [NAME OF INTERVENTION-SERVICE TYPE ACTIVITY].

103.	Estimate the <b>total number of individuals</b> who were reached or affected by your environmental strategy <b>during the past Federal fiscal year</b> . If you are unsure of the exact number of individuals affected, respond with your best estimate. This response should be written as a whole number (e.g., 4). (Note: this number should not exceed the sum of the populations of focus you reported in item 37.5 for this service type.) <sup>E</sup>
	(Sum of reported populations of focus in item 37.5 for this service type: Prepopulate)
	total individuals (If none, enter "0"—you will automatically proceed to the end of this sub-form.)
104.	Of the total number of participants reached by this environmental strategy intervention <b>during the past Federal fiscal year</b> (reported in Question 103), indicate how many were female, male, and transgender. <i>The number of females, males, transgender people, other, and unknown should add up to the total of participants reported in Question 103. These responses should be written as a whole numbers (e.g., 4) and not as percentages. <sup>E</sup></i>
	104.1. Females:
	104.2. Males:
	104.3. Transgender:
	104.4. Other (Describe.): (Specify:)
	104.5. Gender unknown:
105.	Of the total number of <u>participants</u> reached by this environmental strategy intervention <b>during the past Federal fiscal year</b> (reported in Question 103), indicate how many were in each of the age groups listed below. The number of children, youth, young adults, adults, and unknown should add up to the total of participants reported in Question 103. These responses should be written as whole numbers (e.g., 4) and not as percentages. <sup>E</sup>
	105.1. Children aged 0 to 11:
	105.2. Youth aged 12 to 17:
	105.3. Young adults aged 18 to 25:
	105.4. Adults aged 26 and older:
	105.5. Age unknown:

106. Of the total number of <u>participants</u> reached by this environmental strategy intervention **during the past Federal fiscal year** (reported in Question 103), indicate how many were in each of the racial groups listed below. Ethnicity is counted separately from race; you will have an opportunity to report ethnicity in the next question. For example, if you served African Americans of Hispanic ethnicity, they would be counted in both the Hispanic ethnicity category and the African American race category. The number of American Indian/Alaskan Native, Asian, Black, Pacific Islander, and White, multiracial, other, and unknown should add up to the total of participants reported in Question 103. These responses should be written as whole numbers (e.g., 4) and not as percentages.<sup>E</sup>

	106.1. American Indian or Alaska Native:
	106.2. Black or African American:
	106.3. White:
	106.4. Asian:
	106.5. Native Hawaiian or Other Pacific Islander:
	106.6. Multiracial:
	106.7. Other:
	50.8. Race unknown:
107.	Of the total number of <u>participants</u> reached by this environmental strategy intervention <b>during the past Federal fiscal year</b> (reported in Question 103), indicate how many were Hispanic/Latino and how many were non-Hispanic/Latino. <i>The number of Non-Hispanic/Latino, Hispanic/Latino, and unknown should add up to the total of participants reported in Question</i> 103. <i>These responses should be written as whole numbers</i> (e.g., 4) and not as percentages. <sup>E</sup>
	107.1. Hispanic, Latino/a, or of Spanish origin:
	107.2. Non-Hispanic, non-Latino/a, and not of Spanish origin:
	107.3. Hispanic ethnicity unknown:

#### **Information Dissemination Sub-Form**

Questions in this section are only asked for each intervention categorized as an information dissemination intervention (see Q28e) and also categorized as active, completed or discontinued in the past federal fiscal year (see Q28g)

Ν	lame	of Prevention Intervention:	E (autofill from Question 28)
S	Servic	e Type:	E (autofill from Question 28)
b B R	uild a ehavi	ub-form focuses on information dissemination activities to char wareness of substance use issues to reduce their incidence a or. The strategy is characterized by one-way communication to all media and communication campaigns (e.g., social market on.	and prevalence, and change from source to audience.
p ty s b <b>y</b> <b>p</b>	olicyr /pe in trateg ack d	report on information dissemination activities that directly relanders about policies, laws, or regulations as environmental sitem 28 and complete that sub-form. Note that publicity for spies (e.g., fliers to promote the installation of a new prescription ay) should not be reported as a separate information dissemination an information dissemination campaign to promote that in this lnform.	trategies for CSAP strategy pecific environmental n drug box or a drug takenation activity. <b>However</b> , if the use of existing
108.		at was/were the intended purpose(s) of the communication or seminated for this service type? (Select all that apply.) <sup>E</sup>	information that you
		To raise awareness of prescription drug misuse problems in	the community
		To gain support from the community for prescription drug mis	suse prevention efforts
		To provide information on community norms related to presc	ription drug misuse
		To provide information on the dangers of sharing medication drugs	s and misusing prescription
		To provide prescription drug misuse prevention information (prescription drugs in the household, information on resisting prescription/pharmaceutical drugs)	
		To change individual behaviors with regard to prescription dr	rug misuse
		To provide prevention intervention program information (e.g. meeting times)	, contact information,
		To provide surveillance and monitoring information (e.g., info contact if you suspect prescription drug diversion)	ormation about whom to
		To provide a directory of community resources for prevention	n of prescription drug misuse
		Other (Describe.)	

109.	targ	this intervention-service type activity, indicate the community members and groups (i.e., et audience) to whom you disseminated the information <b>during the past Federal fiscal r</b> . (Select all that apply.) <sup>E</sup>
		Health care providers/medical community
		Pharmacists/pharmacy community
		The general public
		Youth groups or representatives
		Schools or school districts
		Youth-serving organizations other than schools (e.g., Big Brothers/Big Sisters, Boy Scouts/Girl Scouts)
		Parents, family, or caregiver groups
		Organizations serving seniors/older population
		Advocacy volunteers
		Business community
		Media (e.g., radio and television stations, newspapers and magazines)
		Faith-based organizations (e.g., churches, charitable organizations with religious affiliations such as Catholic Charities)
		Civic or volunteer organizations (e.g., Kiwanis, Fraternal Order of Police, Women's League, local sports or neighborhood associations)
		LGBTQ-supportive organization
		Military or veteran organization
		Law enforcement agencies (e.g., local, tribal, state, and Federal law enforcement agencies, including the police, the Federal Bureau of Investigation [FBI], and the Drug Enforcement Administration [DEA],
		Local or state, tribal, or jurisdiction courts
		State departments of justice (e.g., judicial department, department of juvenile justice, department of criminal justice, attorney general's office)
		State, tribal, or local jails and prisons
		State, tribal, jurisdiction, or local public health departments
		Mental health professionals or agencies
		Other state, tribal, or jurisdiction government agencies (e.g., public health, public safety, social services, American Indian tribal government)
		Local, village, or tribal agencies (mayor's office, city council, tribal council, Alaska Native Corporation agencies)
		Other (Describe.)
110.	Indic the	cate the type(s) of individuals targeted by this information dissemination activity <b>during</b> past Federal fiscal year. (Select all that apply.) <sup>E (autofill after first completed)</sup>
		☐ Middle school students
		☐ High school students
		☐ College students
		Π Parents

	☐ Health care providers
	☐ Employees
	☐ Current or former military members
	☐ Military family members
	☐ Lesbian/gay/bisexual/transgender/questioning individuals (LGBTQ)
	☐ Individuals living in poverty
	☐ Individuals whose native language is other than English
	☐ Individuals with low literacy
	☐ Individuals with mental illness
	☐ Individuals with disabilities (e.g., hearing, visually, or physically impaired)
	☐ Other (Describe.)
111.	For this information dissemination activity, did you create or air television ads <b>during the past Federal fiscal year</b> ? (Select one response.) <sup>E</sup> Yes
	□ No (If selected, you will skip Questions 112-115.)
112.	How many individual times did the television ads air <b>during the past Federal fiscal year</b> ? <i>Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., 4).</i> <sup>E</sup>
	times
113.	How many weeks did the television ads air <b>during the past Federal fiscal year</b> ? Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., 4). <sup>E</sup>
	weeks
114.	How many different televisions stations aired the ads air during the past Federal fiscal year? Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., $4$ ).
	stations
115.	Provide any information you have on the reach of the television ads aired <b>during the past Federal fiscal year</b> . This could include information provided by the television stations or advertising agency on ratings points; the average number of viewers at the time the ads aired; the geographic area where the ads aired; and the target audience of the related television programs. <sup>E</sup>
	(Describe; 3,000-character limit.)
116.	For this information dissemination activity, did you create or air radio ads <b>during the past</b> Federal fiscal year? (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Questions 117-120.)

117.	How many individual times did the radio ads air <b>during the past Federal fiscal year?</b> Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., 4). <sup>E</sup>
	times
118.	How many weeks did the radio ads air <b>during the past Federal fiscal year?</b> Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., 4). <sup>E</sup>
	weeks
119.	How many different radio stations aired the ads air <b>during the past Federal fiscal year?</b> Insert "0" if ads were created but not aired during the period. This response should be written as a whole number (e.g., $4$ ).
	stations
120.	Provide any information you have on the reach of the radio ads aired <b>during the past Federal fiscal year</b> . This could include information provided by the radio stations or advertising agency on ratings points; the average number of listeners at the time the ads aired; the geographic area where the ads aired; and the target audience of the related radio broadcast. <sup>E</sup>
	(Describe; 3,000-character limit.)
121.	For this information dissemination activity, did you create or publish print ads <b>during the past</b> Federal fiscal year? (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Questions 122-124.)
122.	How many individual times did the print ads run during the past Federal fiscal year? (Select one response.) $^{\rm E}$
	times
123.	How many different newspapers or magazines displayed the ads <b>during the past Federal fiscal year</b> ? <i>Insert "0" if ads were created but not distributed during the period. This response should be written as a whole number (e.g., 4).</i> <sup>E</sup>
	newspapers or magazines
124.	Provide any information you have on the reach of the print ads run <b>during the past Federal fiscal year</b> . This could include information provided by the newspaper or magazine on its average readership; the geographic area in which the publication was distributed; and the target audience of the publication. <sup>E</sup>
	(Describe; 3,000-character limit.)

125.	For this information dissemination activity, how many special events (e.g., invited speakers) were hosted <b>during the past Federal fiscal year</b> ? <i>This response should be written as a whole number (e.g., 4).</i> <sup>E</sup>
	special events
126.	For this information dissemination activity, how many other promotional activities (e.g., distributing prescription drug take-back information at a health fair) were implemented <b>during the past Federal fiscal year</b> ? <i>This response should be written as a whole number (e.g., 4)</i> . <sup>E</sup>
	promotional activities
127.	For this information dissemination activity, did you present at community meetings (e.g., parent-teacher association [PTA] meetings, town hall meetings, school assemblies) during the past Federal fiscal year? Community meetings do not include regularly scheduled coalition meetings or coalition meetings held for planning purposes. (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Questions 128 and 129.)
128.	How many community meetings did you present at <b>during the past Federal fiscal year</b> ? This response should be written as a whole number $(e.g., 4)$ .
	meetings
129.	What was the total number of participants at all community meetings where you presented during the past Federal fiscal year? This response should be written as a whole number (e.g., 4). <sup>E</sup>
	participants
130.	For this information dissemination activity, did you send any letters to the editor of the local newspaper or community newsletters <b>during the past Federal fiscal year</b> ? (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Question 131.)
131.	How many letters were published <b>during the past Federal fiscal year</b> ? This response should be written as a whole number (e.g., $4$ ).
	letters
132.	For this information dissemination activity, did you produce or distribute prescription drug misuse prevention posters <b>during the past Federal fiscal year?</b> (Select one response.) <sup>E</sup> — Yes
	□ No (If selected, you will skip Question 133.)

133.	How many posters were distributed <b>during the past Federal fiscal year?</b> This response should be written as a whole number (e.g., $4$ ). <sup><math>E</math></sup>
	posters
134.	For this information dissemination activity, did you produce or distribute prescription drug misuse prevention brochures <b>during the past Federal fiscal year?</b> (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Question 135.)
135.	How many brochures were distributed <b>during the past Federal fiscal year</b> ? <i>This response</i> should be written as a whole number (e.g., $50$ ).
	brochures
136.	For this information dissemination activity, did you provide a related information line or hotline in the past Federal fiscal year? (Select one response.) <sup>E</sup>
	□ Yes
	□ No (If selected, you will skip Question 136.)
136.	How many individuals called into the information line or hotline <b>in the past Federal fiscal year?</b> This response should be written as a whole number (e.g., 50). <sup>E</sup>
	individuals
137.	For this information dissemination activity, did you develop or run a prescription drug misuse prevention-focused clearinghouse or information resource center <b>in the past Federal fiscal year?</b> (Select one response.) <sup>E</sup>
	□ Yes
	□ No
138.	For this information dissemination activity, <b>during the past Federal fiscal year</b> , did you launch or maintain any web sites or post information on social media platforms focused on prescription drug misuse prevention? (Select all that apply.) <sup>E</sup>
	☐ Web site(s)
	□ Facebook
	☐ Twitter
	□ Instagram
	□ TikTok
	□ Tumblr
	□ Snapchat
	□ Other (Specify.)
	□ No (If selected, you will skip Question 139.)

139.	What is the number of visitor sessions (visits) or interactions (e.g., likes, retweets, shares) that the web sites and platforms, had <b>during the past Federal fiscal year?</b> This response should be written as a whole number (e.g., $4$ ).
	□ Specify number of visits/interactions □ Do not know
140.	For this information dissemination activity, did you conduct other communication activities during the past Federal fiscal year? $^{\rm E}$
	<ul><li>☐ Yes (Describe; 3,000-character limit.)</li><li>☐ No</li></ul>
Overa	all Population of Focus reached by this intervention-service type
141.	Estimate the total number of individuals who were reached or affected by this information dissemination activities for <b>during the past Federal fiscal year</b> . If you are unsure of the exact number of individuals affected, respond with your best estimate. This response should be written as a whole number (e.g., 4). (Note: this number should not exceed the sum of the populations of focus you reported in item 37.5 for this service type.) <sup>E</sup>
	(Sum of reported populations of focus in item 37.5 for this service type: Prepopulate)
	total individuals (If none, enter "0.")
142.	Of the total number of participants reached or affected by this information dissemination intervention <b>during the past Federal fiscal year</b> (reported in Question 141), indicate how many were female, male, and transgender. <i>The number of females, males, transgender people, other, and unknown should add up to the total of participants reported in Question 141. These responses should be written as a whole numbers (e.g., 4) and not as percentages.<sup>E</sup></i>
	142.1. Females:
	142.2. Males:
	142.3. Transgender:
	142.4. Other (Describe.): (Specify:)
	142.5. Gender unknown:

143.	Of the total number of <u>participants</u> reached or affected by this information dissemination intervention <b>during the past Federal fiscal year</b> (reported in Question 141), indicate how many were in each of the age groups listed below. <i>The number of children, youth, young adults, adults, and unknown should add up to the total of participants reported in Question</i> 141. <i>These responses should be written as whole numbers</i> (e.g., 4) and not as percentages. <sup>E</sup>
	143.1. Children aged 0 to 11:
	143.2. Youth aged 12 to 17:
	143.3. Young adults aged 18 to 25:
	143.4. Adults aged 26 and older:
	143.5. Age unknown:
144.	Of the total number of <u>participants</u> reached or affected by this information dissemination intervention <b>during the past Federal fiscal year</b> (reported in Question 141), indicate how many were in each of the racial groups listed below. Ethnicity is counted separately from race; you will have an opportunity to report ethnicity in the next question. For example, if you served African Americans of Hispanic ethnicity, they would be counted in both the Hispanic ethnicity category and the African American race category. <i>The number of American Indian/Alaskan Native, Asian, Black, Pacific Islander, and White, multiracial, other, and unknown should add up to the total of participants reported in Question 141. These responses should be written as whole numbers (e.g., 4) and not as percentages.<sup>E</sup></i>
	144.1. American Indian or Alaska Native:
	144.2. Black or African American:
	144.3. White:
	144.4. Asian:
	144.5. Native Hawaiian or Other Pacific Islander:
	144.6. Multiracial:
	144.7. Other:
	144.8. Race unknown:
145.	Of the total number of <u>participants</u> reached or affected by this information dissemination intervention during the past Federal fiscal year (reported in Question 141), indicate how many were Hispanic/Latino and how many were non-Hispanic/Latino. The number of Non-Hispanic/Latino, Hispanic/Latino, and unknown should add up to the total of participants reported in Question 141. These responses should be written as whole numbers (e.g., 4) and not as percentages. <sup>E</sup>
	145.1. Hispanic, Latino/a, or of Spanish origin:
	145.2. Non-Hispanic, non-Latino/a, and not of Spanish origin:
	145.3. Hispanic ethnicity unknown:

## Implementation Barriers (Subrecipients Only)

Questions in this section are only asked if at least one intervention is categorized as active, completed or discontinued in the past federal fiscal year (see Q28g)

In this section, we would like to learn about challenges that had an impact on implementing SPF Rx interventions in your <u>community</u> during this reporting period.

146. How much did the following factors impact the progress or results of your SPF Rx efforts related to implementing interventions listed below **in the past Federal fiscal year?**<sup>E</sup>

Note: If a specific item is not yet applicable or you do not know the answer yet based on your stage of implementation, you should check the box "No impact."

Factors Impacting Intervention Implementation <sup>E</sup>	No impact	Low impact	Moderate impact	High impact
146.1. Inadequate training/technical assistance to implement intervention				
146.2. Difficulty staffing implementation activities (e.g., delays in hiring, delays in training, turnover)				
146.3. Limited time for staff and team members to devote to implementation				
146.4. Implementing across too broad a geographic area				
146.5. Not enough grant funds to support implementation				
146.6. Limited ability to leverage other funds or in-kind donations to support implementation				
146.7. Difficulty coordinating or collaborating between grantee organization and subrecipients				
146.8. Difficulty coordinating or collaborating with other (non-grantee) public health and substance use agencies and coalitions				
146.9. Prioritization of prescription drug/opioid misuse treatment over prevention by public health and substance use agencies and coalitions				
146.10. Lack of prioritization of prescription drug/opioid misuse prevention by state leadership (e.g., governor's office, legislature)				
146.11. Difficulty getting buy-in and support from the medical community (e.g., health care professionals, medical or pharmacy boards and associations)				
146.12. Difficulty engaging health care providers or pharmacists				
146.13. Health care provider or pharmacist difficulty using PDMP data				
146.14. Health care provider or pharmacist perceptions about quality of PDMP data				

Factors Impacting Intervention Implementation <sup>E</sup>	No impact	Low impact	Moderate impact	High impact
146.15. Difficulty getting schools, law enforcement, medical facilities, or other organizations on board to facilitate interventions				
146.16. Lack of relevant prevention interventions for specific disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
146.17. Lack of relevant prevention interventions for specific high-need subpopulations (e.g., based on age, residential area, SES)				
146.18. Difficulty engaging disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
146.19. Difficulty engaging high-need subpopulations (e.g., based on age, residential area, SES)				
146.20. Language barriers				
146.21. Cultural barriers				
146.22. Logistical barriers (e.g., space to delivery intervention, community member transportation to intervention)				
146.23. Cost of intervention (e.g., naloxone kits, prescription drug lock boxes)				
146.24. Lack of data to monitor interventions				
146.25. Stressful events affecting large portions of the community (e.g., natural disasters, Covid-19 related closures, other unexpected traumatic events) (Describe.)				
146.26. Other (Describe.)				
146.27. Other (Describe.)				
146.28. Other (Describe.)				

# Section 2D. Monitoring and Evaluation (Subrecipients only)

This section collects information on how you used your monitoring and evaluation findings.

#### **Evaluation Barriers**

Questions in this section are only asked if at least one evaluation activity is marked as having been worked on in the past Federal Fiscal year (see Q149)

In this section, we would like to learn about barriers and challenges that impacted **evaluation of prevention interventions** in your <u>community</u>, <u>state</u>, <u>tribal area</u>, <u>or jurisdiction</u> during this reporting period.

150. How much did the following factors impact the progress or results of your SPF Rx efforts related to evaluating prevention interventions in the past Federal fiscal year?

Note: If a specific item is not yet applicable or you do not know the answer yet based on your stage of implementation, you should check "No impact."

		No	Low	Moderate	High
Factor	rs Impacting Intervention Evaluation <sup>E</sup>	impact	impact	impact	impact
150.1.	Inadequate training/technical assistance to evaluate interventions				
150.2.	Difficulty staffing evaluation activities (e.g., delays in hiring, delays in training, turnover)				
150.3.	Limited time for staff and team members to devote to evaluation activities				
150.4.	Evaluating across too broad a geographic area				
150.5.	Not enough grant funds to support evaluation activities				
150.6.	Limited ability to leverage other funds or in-kind donations to support evaluation activities				
150.7.	Difficulty coordinating or collaborating between grantee organization and subrecipients				
150.8.	Difficulty coordinating or collaborating with other (non-grantee) public health and substance use agencies and coalitions				
150.9.	Difficulty accessing data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				
150.10	Difficulty obtaining data specific to disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
150.11	Difficulty obtaining data specific to high-need subpopulations (e.g., based on age, residential area, SES)				
150.12	Mismatch between level of disaggregation of available data (e.g., at state level) and level of project implementation (e.g., in counties within state)				

Factors Impacting Intervention Evaluation <sup>E</sup>	No impact	Low impact	Moderate impact	High impact
150.13. Difficulty analyzing data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				
150.14. Poor quality of data on outcomes and consequences (e.g., PDMP data, hospital overdose data)				
150.15. Difficulty engaging health care providers and pharmacists				
150.16. Difficulty engaging disparate populations (e.g., based on race, ethnicity, sex, LGBTQ status)				
150.17. Difficulty engaging high-need subpopulations (e.g., based on age, residential area, SES)				
150.18. Lack of data to evaluate interventions				
150.19. Stressful events affecting large portions of the community (e.g., natural disasters, COVID-19 related closures, other unexpected traumatic events) (Describe.)				
150.20. Other (Describe.)				
150.21. Other (Describe.)				
150.22. Other (Describe.)				

# Section 3: Broad Contextual Factors (Both grantees and subrecipients complete)

In this section, we would like to learn about broad contextual factors that have had an impact on SPF Rx activities and outcomes in your community, state, tribal area, or jurisdiction during this reporting period.

151. How much impact did the following factors have on the progress or results of your SPF Rx efforts during the **past Federal fiscal year**? (*Select one level of impact for each factor*.)<sup>E</sup>

Note: If a specific item is not yet applicable or you do not know the answer yet based on your stage of implementation, you should check the box "No impact."

SPF R	×108. Broader Contextual Factors	No impact	Low impact	Moderate impact	High impact
151.1.	Lack of available mental health treatment (i.e., leading to self-medicating)				
151.2.	Lack of available substance use treatment				
151.3.	Lack of access to medical care and better treatment options for chronic medical conditions, including pain				
151.4.	Lack of community awareness of the risk factors, extent, or consequences of prescription drug/opioid misuse				
151.5.	Easy access to prescription drugs for misuse				
151.6.	Lack of trust in government agencies (i.e., public health authorities, social services, or law enforcement)				
151.7.	High poverty rates/low SES				
151.8.	High unemployment, underemployment, or economic dislocation				
151.9.	Low literacy or low education levels				
151.10	. Community social disorganization				
151.11.	. Social isolation				
151.12	. Lack of opportunities for area youth				
151.13	. Cultural norms, attitudes, or practices favoring substance use				
151.14	Cultural norms, attitudes, or practices that are resistant to identifying and serving individuals involved with substance use				
151.15	Stigmatization of individuals involved in substance use in the community				
151.16	Stressful events affecting large portions of the population of focus (e.g., natural disasters, COVID-19 related closures, other unexpected traumatic community events) (Describe.)				

SPF Rx108. Broader Contextual Factors	No impact	Low impact	Moderate impact	High impact
151.17. Historical trauma experienced by racial/ethnic groups				
151.18. Other (Describe.)				
151.19. Other (Describe.)				
151.20. Other (Describe.)				

# **Section 4: Closing Questions (Both grantees and subrecipients complete)**

- 152. Provide any additional comments about your SPF Rx–related prevention intervention activities here. (*Describe; 3,000-character limit.*) <sup>E</sup>
- 153. Do you have any additional comments about any aspects of the SPF Rx Initiative? (Describe; 3,000-character limit.)  $^{\rm E}$
