BELUGA LOG

Please complete a new log for each group of belugas you observe during a monitoring session.					
Site & Beluga Information					
Date (MM/DD/YY):/ Site (circle): SC MM95.3 TM TP KE KA					
Group ID (A,B,C): Observation Start::AM / PM Observation End::AM / PM					AM / PM
Estimated Group Size: Did you take photos of belugas (if yes, please upload with data): Yes / No					
Beluga Color/Age:	# white (adult)	#gray (subadult)	_ # calves #	#neonates#	unknown
Group Distance from Site Shore (circle):		Close (< 50 yd)	Near (50 to 100 yd)	Middle (100 to 200 yd)	Far (> 200 yd)
Behavior(s) Observed (circle all that apply)					
Traveling *	Snorkeling	Feeding Suspected	Tail Slapping	Other (plea	ase describe):
Milling	Bubbling	Feeding Observed	Tail Waving		
Diving	Vocalizing	Avoiding Predation	Mating		
Resting	Spyhopping	Side Scanning	Unknown		
* If traveling, where to (e.g., up river, down river, toward Girdwood, across inlet, up Knik Arm)?					
Human Activity (only when beluga whales are in area)					
Human Activity	only when belugated	a whales are in area)

BELUGA LOG

Use this space to record a timeline of important events related to your observation of simultaneous whale and human activity (e.g., when the group was first and last observed; when notable changes in group behavior took place, when human activity entered and departed the monitoring area, etc.)
