SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of an existing information collection.

NOAA's National Ocean Service's U.S. Integrated Ocean Observing System (IOOS) Office is requesting approval to continue a web-based survey of employers who provide either services or infrastructure to IOOS or organizations that add value to the IOOS data and other outputs by tailoring them for specific end uses. The purpose of the survey and overall project is to gather data to articulate the collective and derived value of the IOOS enterprise and to create a profile of businesses and organizations who are involved with providing services or utilizing the data for other specific end uses. This survey was conducted in FY2015 and FY2020, and is intended to be repeated on a regular basis in order to track the growth of the U.S. Ocean Enterprise. The survey is a critical data collection piece of the project and is necessary in order to collect demographic, financial, and functional information for each organization with regard to their involvement with IOOS. The final deliverable of this project is an analytic report detailing the findings of the web survey and the analysis of the employer database. The results will demonstrate the size and economic impact of IOOS data to the United States marine ocean sector.
