United States Food and Drug Administration

Current Good Manufacturing Practice Regulations for Medicated Feeds

OMB Control No. 0910-0152

SUPPORTING STATEMENT

Terms of Clearance: None.

Part A: Justification:

1. Circumstances Making the Collection of Information Necessary

This information collection supports Food and Drug Administration (FDA, Agency, us or we) regulations. Under section 501 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 351), FDA has the statutory authority to issue current good manufacturing practice (CGMP) regulations for drugs, including medicated feeds. Medicated feeds are administered to animals for the prevention, cure, mitigation, or treatment of disease, or growth promotion and feed efficiency. Statutory requirements for CGMPs have been codified under part 225 (21 CFR part 225). Medicated feeds that are not manufactured in accordance with these regulations are considered adulterated under section 501(a)(2)(B) of the FD&C Act. Under part 225, a manufacturer is required to establish, maintain, and retain records for a medicated feed, including records to document procedures required during the manufacturing process to assure that proper quality control is maintained. Such records would, for example, contain information concerning receipt and inventory of drug components, batch production, laboratory assay results (*i.e.*, batch and stability testing), labels, and product distribution.

This information is needed so that FDA can monitor drug usage and possible misformulation of medicated feeds to investigate violative drug residues in products from treated animals and to investigate product defects when a drug is recalled. In addition, FDA will use the CGMP criteria in part 225 to determine whether the systems and procedures used by manufacturers of medicated feeds are adequate to ensure that their feeds meet the requirements of the FD&C Act as to safety, and also that they meet their claimed identity, strength, quality, and purity, as required by section 501(a)(2)(B) of the FD&C Act.

A license is required when the manufacturer of a medicated feed involves the use of a drug or drugs that FDA has determined requires more control because of the need for a withdrawal period before slaughter or because of carcinogenic concerns. Conversely, a license is not required, and the recordkeeping requirements are less demanding, for those medicated feeds for which FDA has determined that the drugs used in their manufacture need less control. Respondents to this collection of information are commercial feed mills and mixer/feeders.

We therefore request OMB extension of OMB approval of the provisions found in 21 CFR part 225; Current Good Manufacturing Practice Regulations for Medicated Feed as discussed in this supporting statement.

2. Purpose and Use of the Information Collection

The required records are used by both the respondents and the FDA. The records are used by

manufacturers of medicated feeds to verify that appropriate control measures have been maintained, or that appropriate corrective actions were taken if the control measures were not maintained. Such verification activities are essential to ensure that the CGMP system is working as planned. We review the records during the conduct of periodic plant inspections. This permits us to determine whether the medicated feed products have been consistently processed in conformance with appropriate CGMP controls. We use the records required in part 225 to determine whether the systems and procedures used by manufacturers of medicated feeds are adequate to ensure that their feeds meet the requirements of the FD&C Act as to safety, and that they meet their claimed identity, strength, quality, and purity, as required by section 501(a)(2)(B) of the FD&C Act. We would examine the records during a periodic inspection or during an investigation.

3. <u>Use of Improved Information Technology and Burden Reduction</u>

The regulation does not specifically prescribe the use of automated, electronic, mechanical, or other technological techniques or other forms of information technology as necessary for use by firms. Companies are free to use whatever forms of information technology may best assist them in retaining the appropriate records and making them available to regulatory officials. We estimate that about ninety percent (90%) of respondents will keep some of the required records electronically in the next 3 years.

4. Efforts to Identify Duplication and Use of Similar Information

We are unaware of duplicative information collection.

5. <u>Impact on Small Businesses or Other Small Entities</u>

By feed mill size, most respondents (to the USDA study referenced below) had feed mills that produced from 1,000 to 9,999 tons per year. Only 56 feed mills had production of over 100,000 tons per year, yet they produced 53 percent of the total.¹ Based on this, we estimate that 75 percent of the 8,563 medicated feed manufacturers (reported in tables 1 through 4), or 6,422 respondents, are small businesses, and we have kept their particular needs in mind during the development of these regulations. The recordkeeping is no more burdensome for small businesses than for large. The requirements are the minimum requirements for CGMPs. We aid small businesses in complying with our requirements through our Regional Small Business Representatives and through the scientific and administrative staffs within the Agency. We have provided a Small Business Guide on our website at https://www.fda.gov/animal-veterinary/resources-you/cvm-small-business-assistance.

6. Consequences of Collecting the Information Less Frequently

Data collection occurs occasionally. Under a CGMP system, the frequency of data collection by each processor would occur periodically during medicated feed manufacturing operations, but that frequency of observation and recording would vary considerably for different manufacturers and different medicated feed products. Less frequent recordkeeping would reduce or nullify the effectiveness of the regulation to provide assurance to both the medicated feed manufacturer and FDA that the medicated feed meets standards for safety and meets the claimed identity, strength, quality, and purity standards. We do not collect

¹ "Feed Mill Operations of Agricultural Cooperatives," U.S. Department of Agriculture Research Report #207, September 2005

CGMP records as a routine matter. Records remain on file at each medicated feed manufacturing facility. We would examine the records during a periodic inspection or during an investigation.

7. Special Circumstances Relating to the Guidelines of 5 CFR 1320.5

There are no special circumstances associated with this collection of information.

8. <u>Comments in Response to the Federal Register Notice and Efforts to Consult Outside the Agency</u>

FDA published a 60-day notice for public comment in the *Federal Register* of February 6, 2023 (88 FR 7741). One comment was received, but it did not address the information collection topics, as requested.

9. Explanation of Any Payment or Gift to Respondents

There are no incentives, payments or gifts associated with this information collection.

10. Assurance of Confidentiality Provided to Respondents

In preparing this Supporting Statement, we consulted our Privacy Office to ensure appropriate identification and handling of information collected.

This ICR collects personally identifiable information (PII). PII is collected in the context of the subject individuals' professional capacity and the FDA-related work they perform for their employer (e.g., point of contact at a regulated entity). The PII submitted is name, address, email address, phone number, and fax number. Information collected is maintained in a Privacy Act system of records as described in HHS/FDA System of Records Notice (SORN) 09-10-0002 for Regulated Industry Employee Enforcement Records. Through appropriate instruction, FDA limited submission fields and minimized the PII collected to protect the privacy of the individuals.

Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), the public has broad access to government documents. However, FOIA provides certain exemptions from mandatory public disclosure of government records (5 U.S.C. 552(b)(1-9)). FDA will make the fullest possible disclosure of records to the public, consistent with the rights of individuals to privacy, the property rights of persons in trade and confidential commercial or financial information.

11. Justification for Sensitive Questions

The collection of information does not involve sensitive questions.

12. Estimates of Annualized Burden Hours and Cost

12a. Annualized Hour Burden Estimate

Table 1. – Estimated Annual Recordkeeping Burden (Registered Licensed Commercial Feed Mills)¹

21 CFR Section	No. of	No. of Records	Total	Average	Total Hours
21 GIR Section	Recordkeepers	per	Annual	Burden per	10tai 110tai 3
	recordicepers	Recordkeeper	Records	Recordkeeping	
		-		1 0	
225.42(b)(5) through (8)	791	260	205,660	1	205,660
requires records of receipt,					
storage, and inventory control					
of medicated feeds.

storage, and inventory control of				minutes)	
labeling in a manner that				ĺ	
prevents label mix-ups and					
assures that correct labels are					
used for medicated feeds.					
225.202 requires records of	3,400	260	884,000	0.33 (20	291,720
formulation, production, and				minutes)	
distribution of medicated feeds.					
Total			16,493,487		331,976

¹There are no capital costs or operating and maintenance costs associated with this collection of information.

12b. Annualized Cost Burden Estimate

Type of Respondent	Total Burden	Hourly Wage	Total Respondent	
	Hours	Rate	Costs	
Feed Mill Worker ¹	2,162,817.74	29.20	\$63,154,278	

¹May 2021 National Industry-Specific Occupational Employment and Wage Estimates, Bureau of Labor Statistics and including 30% for benefits (https://www.bls.gov/OES/Current/oes434199.htm)

13. Estimates of Other Total Annual Costs to Respondents/Recordkeepers or Capital Costs

There are no capital, start-up, operating or maintenance costs associated with this collection.

14. Annualized Cost to the Federal Government

Our review of the records would generally occur as part of our inspection activities. We estimate that our review of the records would take 2 hours per inspection. We have adjusted the number of hours an inspector spends reviewing records based on our experience since the implementation of FSMA and the necessary hazard analysis that now occurs. We estimate the hourly cost for the review to be \$51.15 per hour, based on the GS-12/Step-5 rate in the pay area of Washington-Baltimore-Arlington, DC-MD-VA-WV-PA for the year 2023. Thus, we estimate the cost to the Federal Government for the review of records to be \$\$102.30 per review (\$51.15 /hour x 2 hours). Assuming we review records for 200 inspections per year, we estimate that the total annual cost to the Federal Government would be \$20,460.00 (\$102.30 x 200 inspections).

15. Explanation for Program Changes or Adjustments

Our estimated burden for the information collection reflects an over decrease of 10,435 hours and a corresponding increase of 831,545 records. We attribute this adjustment to an increase in the voluntary withdrawal of medicated feed mill licenses.

16. Plans for Tabulation and Publication and Project Time Schedule

This information collected will not be published or tabulated.

17. Reason(s) Display of OMB Expiration Date is Inappropriate

The OMB expiration date will be displayed

18. Exceptions to Certification for Paperwork Reduction Act Submissions

There are no exceptions to the certification.
