

Patient Safety Component—Annual Facility Survey for LTAC

Instructions for this form are available at: http://www.cdc.gov/nhsn/forms/instr/TOI-57.150-LTAC.pdf				
*required for saving		Tracking #:		
*Facility ID:		*Survey Year:		
Facility Characteristics (completed by Infection Preventionis	st)		
*Ownership (check one):				
☐ For profit	☐ Not for profit, including church	☐ Government	☐ Veterans Affairs	
*Affiliation (check one): ☐ Hospital system	☐ Independent	☐ Multi-facility organizat	ion (specialty hospital network)	
*Setting/classification:	Free-standing	Within a hospital		
If classified as "Free-stand facilities or units (check al	ding," does your LTAC hospital share Il that apply)?	physical housing with one	or more of the following on-site	
□ No		☐ Inpatient rehabilita	tion facility	
☐ Skilled nursing fa	acility (SNF)/nursing home	\square Neuro-behavioral ι	unit or facility	
☐ Residential facilit	ry (assisted living)	☐ Other (specify:)	
If classified as "Within a h	ospital," is your LTAC hospital located	i:		
	es not provide acute care services (fo		☐ Yes ☐ No	
· ') an acute care hospital?		□ Yes □ No	
In the previous calendar y	,			
,	days:			
*Number of admissi				
*Average daily cens	sus:			
*Numbers of LTAC beds in	n the following categories (categories s	should equal total):		
a. Intensive care un	nit (ICU) or critical care beds:			
b. High observation	/special care/high acuity beds (not ICI	U):		
c. General LTAC be	eds:			
*Total number	of LTAC beds (licensed capacity):			
*Number of single occupar *Number of double occupar *Number of triple occupand *Number of quadruple occ	ancy rooms: cy rooms:			
	ons with one of the following conditions tay): (Note: These categories are not r		present on admission, not	
If helpful for your facility in identifying these conditions on admission, review a list of ICD-10 and DRG codes commonly associated with these conditions found here: http://www.cdc.gov/nhsn/xls/DRGs-ICD-9s-NHSN-LTAC-Survey.xlsx				
a. Ventilator depende b. Hemodialysis:				
Facility Microbiology Lab	poratory Practices (completed with	input from Microbiology	Laboratory Lead)	

*1. Does your facility have its own on-site laboratory that performs bacterial antimicrobial susceptibility testing?					
1a. If No, where is your fa	cility's antimicrobial susceptibility testing	performed? (check one))		
☐ Affiliated medical cen	ter	ry	•	n-affiliated	
*2. For the following organisms, indicate which methods are used for: (1) Primary susceptibility testing and (2) Secondary, supplemental, or confirmatory testing (if performed). If your laboratory does not perform susceptibility testing, indicate the methods used at the outside laboratory. Use the testing codes listed below the table.					
Pathogen	(1) Primary	(2) Secondary	Comi	ments	
Staphylococcus aureus				· · · · · · · · · · · · · · · · · · ·	
Enterobacterales				 	
1 = Kirby-Bauer disk diffusion	4 = Sensititre	7 = Agar dilution metho	d		
2 = Vitek (Legacy)	5.1 = MicroScan WalkAway	10 = E test			
2.1 = Vitek 2	5.2 = MicroScan autoSCAN	12 = Vancomycin agar	screen (Bl	HI + vancomycin)	
3.1 = BD Phoenix	6 = Other broth microdilution method	13 = Other (describe in	Comment	s section)	
*3. Does either the primary or secondary/supplemental antimicrobial susceptibility testing (AST) of <i>Pseudomonas</i> spp., include ceftolozane- Secondary/supplemental antimicrobial Susceptibility testing (AST) of <i>Pseudomonas</i> spp., include ceftolozane- Secondary/supplemental antimicrobial Susceptibility testing (AST) of <i>Pseudomonas</i> spp., include ceftolozane- Secondary/supplemental antimicrobial Susceptibility testing (AST) of <i>Pseudomonas</i> spp., include ceftolozane- Secondary/supplemental antimicrobial Secondary/supplemental secondary/supplemental antimicrobial Secondary/supplemental seco					
*4. Has the laboratory imple	emented revised breakpoints recommend	ded by CLSI for the follow	wing:		
a. Cephalosporin and ı	monobactam breakpoints for <i>Enterobact</i>	erales <u>in</u> 2010	☐ Yes	□ No	
b. Carbapenem breakpoints for <i>Enterobacterales</i> in 2010					
c. Ertapenem breakpoints for <i>Enterobacterales</i> $\underline{\text{in}}$ 2012 $\qquad \qquad \square$ Yes $\qquad \square$ No					
d. Carbapenem break	points for Pseudomonas aeruginosa <u>in</u> 2	012	☐ Yes	□ No	
e. Fluroquinolone brea	kpoints for Pseudomonas aeruginosa <u>in</u>	2019	☐ Yes	□ No	
f. Fluroquinolone break	kpoints for <i>Enterobacterales</i> in 2019		☐ Yes	□ No	
*5. Does the laboratory test isolates for presence of carbapenemase? (this does not include automated testing instrument expert rules)					
5a. If Yes, indicate what	is done if carbapenemase production is	detected: (check one)			
\square Change susceptibl	le carbapenem results to resistant				
	m MIC results without an interpretation				
☐ No changes are m or infection control	ade in the interpretation of carbapenems practices	s, the test is used for epi	demiologic	al	
Facility Microbiology Labo	Facility Microbiology Laboratory Practices (continued)				

5b. If Yes, which test is routinely perfo	ormed to dete	tect carbape	nemase: (check al	l that apply)		
□ PCR □	☐ MBL Scre	en]	☐ mCIM/CIM		
☐ Modified Hodge Test	☐ Carba NP					
\square Rapid CARB Blue	☐ Cepheid, E	BioFire arra	y,			
☐ E test	\square Other (spe	ecify):				
5c. If Yes, which of the following are re \Box <i>Enterobacterales</i> spp. \Box <i>Pseud</i>	outinely test domonas aer		resence of carbape \square Acinetobacter b	•	eck all that a	apply)
*6. Does your facility perform extended-s and/or <i>Klebsiella</i> spp. either routinely	-		, ,	r E. coli	☐ Yes	□ No
6a. If Yes, indicate what is done if ESI	BL is detecte	ed: (check d	ne)			
\square Change susceptible Cefotaxime/0	Ceftriaxone/	Cefepime re	esults to resistant			
\square No changes are made in the inter	rpretation of	cephalospo	orins with a note of	ESBL		
\square Suppress cephalosporin suscepti	ibility results	5				
*7. Where is yeast identification performe	ed for specin	nens collect	ed at your facility?	(check one)		
\square On-site laboratory						
\square Affiliated medical center						
\square Commercial referral laboratory						
\square Other local/regional, non-affiliated \square	reference lat	boratory				
\square Yeast identification not available (s affiliate/commercial/other laboratory) [med onsite or	at any	
Answer questions 8–13 for the lab	oratory tha	at <i>perform</i>	s yeast identific	ation for you	<u>ur facility</u> :	
*8. Which of the following methods are us	sed for yeas	st identificati	on? (check all that	apply)		
☐ MALDI-TOF MS System (Vitek MS)) [☐ MicroSca	n			
☐ MALDI-TOF MS System (Bruker Bi	CHALL	□ Non-auto Tube, PNA-l	mated Manual Kit (FISH, etc.)	for example, A	PI 20C, Raj	oID, Germ
☐ Vitek-2		ີ DNA seqເ	iencing			
☐ BD Phoenix		\square Other (sp	ecify)		-	
*9. Does the laboratory routinely use Chr	romagar for t	the identific	ation or differentiat	ion of Candida	isolates?	
☐ Yes ☐ No		□Unkno	wn			
Facility Microbiology Laboratory Pract	tices (conti	nued)				

*10. Candida isolated from whicapply)	ch of the following body	sites are usually fully id	lentified to the spec	ies level? (check all that
□ Blood		Respiratory		
☐ Other normally sterile body CSF)	y site (for example, \Box	Other (specify):		_
☐ Urine		None are fully identifi	ed to the species le	vel
*11. Does the laboratory employ specimens?	y any culture-independe	ent diagnostic tests (CIE	OTs) to identify <i>Can</i>	dida from blood
□Yes □Ne	o [Unknown		
11a. If yes, which culture-ir (check all that apply)	ndependent diagnostic t	ests (CIDTs) are used	to identify Candida	from blood specimens?
\square T2Candida Panel				
☐ BioFire				
\square Other, specify:				
☐ Unknown *12. Are any culture-independe specimens?	ent diagnostic tests (CID	T) used to specifically i	identify Candida au	ris from clinical
□Yes	No	☐ Unknown		
12a. If yes, which culture-inconspecimens? (check all that a ☐ T2Cauris Panel ☐ PCR ☐ Other, specify: ☐ Unknown	apply)	sts (CIDT) are used to i	identify <i>Candida au</i>	ris from clinical
*13. Where is antifungal suscep	otibility testing (AFST) pe	erformed for specimens	s collected at your fa	acility? (check one)
\square On-site laboratory	☐ Other	· local/regional, non-affi	liated reference lab	oratory
\square Affiliated medical center	☐ AFST	not available (specifica	ally, AFST is not pe	rformed onsite or at any
\square Commercial referral labora	ee:1:	commercial/other labora	-	
Answer questions 14–18 for *14. What method is used for an	<u>-</u>	-	-	3? (check all that apply)
\square Broth microdilution \square	YeastOne colorimetric	microdilution	☐ E test	\square Vitek 2 card
☐ Disk diffusion ☐	Other (specify):		Unknown	
*15. What method is used for a	ntifungal susceptibility te	esting (AFST) of Amph	otericin B? (check	all that apply)
☐ Broth microdilution ☐	YeastOne colorimetric		☐ E test	☐ Vitek 2 card
☐ Disk diffusion ☐	Other (specify):		☐ Unknown	
Facility Microbiology Laborat		ed)		

*16. If Vitek is used for AFS	T, which <i>Candida</i> species	do you test with it? (c	heck all that apply)	ŭ
☐ C. albicans	\square C. parapsilosis			
☐ C. glabrata	\square Other <i>Candida</i> spp.			
*17. AFST is performed for	which of the following antif	ungal drugs? (check	all that apply)	
☐ Fluconazole	☐ Micafungin		☐ Flucytosine	
□ Voriconazole	\square Anidulafungin		\square Other, specify:	
☐ Itraconazole	\square Caspofungin		☐ Unknown	
☐ Posaconazole	☐ Amphotericin B			
*18. AFST is performed on	fungal isolates in which of t	the following situation	ns? (check only one b	ox per row)
'	Performed	Performed with a	Not performed	Unknown
Disad	automatically	clinician's order	Tvot periorineu	
Blood Other normally sterile				
body site (for example,				
CSF) Urine				
Respiratory Other (specify):				
Other (specify).				
*19. What is the primary tes	sting method for <i>C. difficile</i>	used most often by ye	our facility's laborator	y or the outside
laboratory where your facilit	y's testing is performed? (d	check one)		
\square Enzyme immunoassay	(EIA) for toxin			
☐ Cell cytotoxicity neutral	lization assay			
☐ Nucleic acid amplificati	on test (NAAT) (for examp	le, PCR, LAMP)		
☐ NAAT plus EIA, if NAA	T positive (2-step algorithm	1)		
\square Glutamate dehydrogen	ase (GDH) antigen plus El	A for toxin (2-step alg	gorithm)	
☐ GDH plus NAAT (2-ste	p algorithm)			
☐ GDH plus EIA for toxin	, followed by NAAT for disc	crepant results		
☐ Toxigenic culture (C. difficile culture followed by detection of toxins)				
Other (specify):				
Facility Microbiology Labor	oratory Practices (continu	ued)		

Facility Microbiology Laboratory Practices (continued)

*20. Indicate the primary and definitive method used to identify microbes from blood cultures collected in your facility.

(check one)	3
☐ MALDI-TOF MS System (Vitek MS)	
☐ MALDI-TOF MS System (Bruker Biotyper)	
\square Automated Instrument (for example, Vitek, MicroScan, Phoenix, OmniLog, Sherlock, ϵ	etc.)
\square Non-automated Manual Kit (for example, API, Crystal, RapID, etc.)	
\square Rapid Identification (for example, Verigene, BioFire FilmArray, PNA-FISH, Gene Xper	t, etc.)
☐ 16S rRNA Sequencing	
☐ Other (specify):	
□ None	
*21. Indicate any additional secondary methods used for microbe identification from blood (for example, a rapid method that is confirmed with the primary method, a secondary methodive an identification, or a method that is used in conjunction with the primary method). (c	od if the primary method fails to
☐ MALDI-TOF MS System (Vitek MS)	
☐ MALDI-TOF MS System (Bruker Biotyper)	
\square Automated Instrument (for example, Vitek, MicroScan, Phoenix, OmniLog, Sherlock, e	etc.)
\square Non-automated Manual Kit (for example, API, Crystal, RapID, etc.)	
\square Rapid Identification (for example, Verigene, BioFire FilmArray, PNA-FISH, Gene Xper	t, etc.)
☐ 16S rRNA Sequencing	
☐ Other (specify):	
□ None	
Infection Control Practices (completed with input from Hospital Epidemiologist and Coordinator)	d/or Quality Improvement
*22. Number or fraction of infection preventionists (IPs) in facility:	
a. Total hours per week performing surveillance:	
b. Total hours per week for infection control activities other than surveillance:	
·	
*23. Number or fraction of full-time employees (FTEs) for a designated hospital epidemiologist (or equivalent role) affiliated with your facility:	
*24. Is it a policy in your facility that patients infected or colonized with MRSA are routinely while these patients are in your facility? (check one)	placed in contact precautions
☐ Yes ☐ No ☐ Not applicable: my facility n	ever admits these patients
Infection Control Practices (continued)	

24a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

	3
☐ All infected and all colonized patie	ents
☐ Only all infected patients	
\square Only infected or colonized patient	s with certain characteristics (check all that apply)
\square Patients admitted to hi	gh risk settings
\square Patients at high risk fo	rtransmission
*25. Is it a policy in your facility that patients infected or col while these patients are in your facility? (check one)	onized with VRE are routinely placed in contact precautions
☐ Yes ☐ No	\square Not applicable: my facility never admits these patients
25a. If Yes, check the type of patients that are routine one):	ly placed in contact precautions while in your facility (check
\square All infected and all colonized patients	
\square Only all infected patients	
\square Only infected or colonized patients with certain cha	racteristics (check all that apply)
\square Patients admitted to high risk settings	
\square Patients at high risk for transmission	
one) Yes	onized with CRE (regardless of confirmatory testing for precautions while these patients are in your facility? (check
□ No	
☐ Not applicable: my facility never admits these patients	
26a. If Yes, check the type of patients that are routine one):	ly placed in contact precautions while in your facility (check
\square All infected and all colonized patients	
\square Only all infected patients	
\square Only infected or colonized patients with certain cha	racteristics (check all that apply)
\square Patients admitted to high risk settings	
\square Patients at high risk for transmission	
*27. Is it a policy in your facility that patients infected or col extended spectrum cephalosporin resistant <i>Enterobacteral</i> patients are in your facility? (check one)	
☐ Yes	
□ No	
\square Not applicable: my facility never admits these patients	
Infection Control Practices (continued)	

27a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

on Ellinet work		www.cac.gov/iiiioii
\square All infected and all colonized patients		
\square Only all infected patients		
\square Only infected or colonized patients with certain characteristics (check all that appl	ly)	
\square Patients admitted to high-risk settings		
\square Patients at high risk for transmission		
*28. Does the facility routinely perform screening testing (culture or non-culture) for CRE? patients at your facility performed by public health laboratories and commercial laboratories		es screening for
	☐ Yes	□ No
28a. If Yes, in which situations does the facility routinely perform screening testing for C	RE? (check a	all that apply)
\square Surveillance testing at admission for all patients		
\square Surveillance testing of epidemiologically-linked patients of newly identified CRE p	atients (for e	xample, roommates)
\square Surveillance testing at admission of high-risk patients (check all that apply)		
\square Patients admitted from long-term acute care (LTAC) or long-term care facility	/ (LTCF)	
\square Patients with recent (for example, within 6 months) overnight hospital stay or	utside the Un	ited States
\square Patients admitted to high-risk settings (for example, ICU)		
\square Other high-risk patients (specify):		
☐ Other (specify):		
*29. Does the facility routinely perform screening testing (culture or non-culture) for Candi screening for patients at your facility performed by public health laboratories and commercial	cial laborator	
☐ Yes ☐ No

35i. If a pharmacist i		program, is there at least one pharmac	ist responsible for
		□Yes	□No
36. Our facility has the fo	ollowing priority antibiotic stewardship	interventions: (Check all that apply)	
36a. If Prospective au categories of antimicro	obials, whether or not they are on for	ch categories of antimicrobials? Answe	er for the following
	dime, or piperacillin/tazobactam		
☐ Vancomycin (intra	•		
·	enem/cilastatin, or meropenem		
∐ Ceftazidime/aviba cefiderocol	ıctam, ceftolozane/tazobactam, mero	penem/vaborbactam, imipenem-cilasta	atin/relebactam, or
Antibiotic Stewardship	Practices (continued)		
☐ Fluoroquinolones			
☐ Daptomycin, linez	zolid, or other newer anti-MRSA agen	ts	

\square Eravacycline or omadacycline		
\square Lefamulin		
☐ Aminoglycosides		
☐ Colistin or polymyxin B		
\square Anidulafungin, caspofungin, or micafungin		
\square Isavuconazole, posaconazole, or voriconazole		
\square Amphotericin B and/or lipid-based amphotericin B		
\square None of the above		
36b. If Prospective audit and feedback is selected: Our antibiotic stewardship program and feedback interventions (for example, by tracking antibiotic use, types of intervention recommendations).		ive audit
	□Yes	\square No
☐ Preauthorization for specific antibiotic agents. 36c. If Preauthorization is selected: For which categories of antimicrobials? Only answ antimicrobials that are <i>on formulary</i> . (Check all that apply)	er for categories o	f
\square Cefepime, ceftazidime, or piperacillin/tazobactam		
\square Vancomycin (intravenous)		
\square Ertapenem, imipenem/cilastatin, or meropenem		
$\hfill\Box$ Ceftazidime/avibactam, ceftolozane/tazobactam, meropenem/vaborbactam, imipe cefiderocol	nem-cilastatin/relel	bactam, or
☐ Fluoroquinolones		
\square Daptomycin, linezolid, or other newer anti-MRSA agents		
\square Eravacycline or omadacycline		
□ Lefamulin		
☐ Aminoglycosides		
☐ Colistin or polymyxin B		
\square Anidulafungin, caspofungin, or micafungin		
\square Isavuconazole, posaconazole, or voriconazole		
\square Amphotericin B and/or lipid-based amphotericin B		
\square None of the above		

Antibiotic Stewardship Practices (continued)

36d. If Preauthorization is selected: Our antibiotic stewardship program monitors preauthorization interventions (for example, by tracking which agents are requested for which conditions).

	☐Yes	\square No
☐ Facility-specific treatment recommendations, based on national guidelines and local pathogassist with antibiotic selection for common clinical conditions (for example, community-acquirinfection, skin and soft tissue infection).		
36e. If Facility-specific treatment recommendations is selected: For which common clinica Community-acquired pneumonia	l conditions?	
☐ Urinary tract infection		
☐ Skin and soft tissue infection		
\square None of the above		
36f. If Facility-specific treatment recommendations is selected: Our stewardship program facility's treatment recommendations for antibiotic selection for common clinical conditions acquired pneumonia, urinary tract infection, skin and soft tissue infection).

Antibiotic Stewardship Practices (continued)		
*38. Our facility has in place the following specific 'pharmacy-based' interventions: (Check all the	nat apply)	

\Box Pharmacy-driven changes from intravenous to oral antibiotics without a physician's order (for example, hospital-approved protocol)	
\Box Alerts to providers about potentially duplicative antibiotic spectra (for example, multiple antibiotics to treat anaerobes)	
\square Automatic antibiotic stop orders in specific situations (for example, surgical prophylaxis)	
\square None of the above	
*39. Our stewardship program has engaged bedside nurses in actions to optimize antibiotic use.	
Yes No 39a. If Yes is selected: Our facility has in place the following specific 'nursing-based' interventions: (Check all that apply.)	
\square Nurses receive training on appropriate criteria for sending urine and/or respiratory cultures.	
\square Nurses initiate discussions with the treating team on switching from intravenous to oral antibiotics.	
\square Nurses initiate antibiotic time-out discussions with the treating team.	
\square Nurses track antibiotic duration of therapy	
\square None of the above	
39b. If 'Nurses track antibiotic duration of therapy' is selected: Is that information available at the bedside (for example, on a whiteboard in the room)?	
□ Yes □ No	
*40. Our stewardship program monitors: (Check all that apply.)	
\square Antibiotic resistance patterns (either facility- or region-specific), at least annually	
\square Clostridioides difficile infections (or C. difficile LabID events), at least annually	
\square Antibiotic use in days of therapy (DOT) per 1000 patient days or days present, at least quarterly	
\square Antibiotic use in defined daily doses (DDD) per 1000 patient days, at least quarterly	
\square Antibiotic expenditures (specifically, purchasing costs), at least quarterly	
\square Antibiotic use in some other way, at least annually (specify):	
□ None of the above	
*41. Our stewardship team provides the following antibiotic use reports to prescribers, at least annually: (Check all that apply.)	
☐ Individual, prescriber-level reports	
☐ Unit- or service-specific reports	
□ None of the above	
41a. If 'Individual, prescriber-level reports' or 'Unit- or service-specific reports' is selected: Our stewardship program uses these reports to target feedback to prescribers about how they can improve their antibiotic prescribing, at least annually.	
☐ Yes ☐ No
