Patient Safety Component—Annual Facility Survey for IRF

Instructions for this form are available at: http://www.cdc.gov/nhsn/forms/instr/TOI-57.151-IRF.pdf

*required for saving | Tracking #:

Facility ID: | *Survey Year:

Facility Characteristics (completed by Infection Preventionist)

*Ownership (check one):

☐ For profit ☐ Not for profit, including church ☐ Government ☐ Veterans Affairs

*Affiliation (check one): ☐ Independent ☐ Multi-facility organization (specialty network) ☐ Hospital system

*How would you describe your licensed inpatient rehabilitation facility? (check one)

☐ Free-standing ☐ Healthcare facility based

In the previous calendar year, indicate the following counts for the Rehabilitation Facility:

*Total number of rehab beds: _____

*Average daily census: _____

*Number of patient days: _____

*Average length of stay: _____

*Indicate the number of admissions with the primary diagnosis for each of the following rehabilitation categories (*must sum to the total number of admissions listed below*)

a. Traumatic spinal cord dysfunction: _____

b. Non-traumatic spinal cord dysfunction: _____

c. Stroke: _____

d. Brain dysfunction (non-traumatic or traumatic): _____

e. Other neurologic conditions (for example, multiple sclerosis, Parkinson's disease, etc.): _____

f. Orthopedic conditions (incl. fracture, joint replacement, other): _____

g. All other admissions: _____

*Total number of admissions: _____

*Number of admissions on a ventilator: _____

*Number of pediatric (≤ 18 years old) admissions: _____

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Facility Microbiology Laboratory Practices (completed with input from Microbiology Laboratory Lead)

*1. Does your facility have its own on-site laboratory that performs antimicrobial bacterial susceptibility testing? ☐ Yes ☐ No

1a. If No, where is your facility's antimicrobial susceptibility testing performed? (check one)

☐ Affiliated medical center ☐ Commercial referral laboratory ☐ Other local/regional, non-affiliated reference laboratory

*2. For the following organisms indicate which methods are used for:

(1) Primary susceptibility testing and

(2) Secondary, supplemental, or confirmatory testing (if performed).

If your laboratory does not perform susceptibility testing, indicate the methods used at the outside laboratory.

Use the testing codes listed below the table.

Pathogen	(1) Primary	(2) Secondary	Comments
Staphylococcus aureus	_____	_____	_____
Enterobacterales	_____	_____	_____

1 = Kirby-Bauer disk diffusion
2 = Vitek (Legacy)
2.1 = Vitek 2
3.1 = BD Phoenix
4 = Sensititre
5.1 = MicroScan WalkAway
5.2 = MicroScan autoSCAN
6 = Other broth microdilution method
7 = Agar dilution method
10 = E test
12 = Vancomycin agar screen (BHI + vancomycin)
13 = Other (describe in Comments section)

*3. Has the laboratory implemented revised breakpoints recommended by CLSI for the following:

a. Cephalosporin and monobactam breakpoints for *Enterobacterales* in 2010 ☐ Yes ☐ No
b. Carbapenem breakpoints for *Enterobacterales* in 2010 ☐ Yes ☐ No
c. Ertapenem breakpoints for *Enterobacterales* in 2012 ☐ Yes ☐ No
d. Carbapenem breakpoints for *Pseudomonas aeruginosa* in 2012 ☐ Yes ☐ No
e. Fluroquinolone breakpoints for *Pseudomonas aeruginosa* in 2019 ☐ Yes ☐ No
f. Fluroquinolone breakpoints for *Enterobacterales* in 2019 ☐ Yes ☐ No

*4. Does the laboratory test isolates for presence of carbapenemase? (this does not include automated testing instrument expert rules) ☐ Yes ☐ No

4a. If Yes, indicate what is done if carbapenemase production is detected: (check one)

☐ Change susceptible carbapenem results to resistant

☐ Report carbapenem MIC results without an interpretation

☐ No changes are made in the interpretation of carbapenems, the test is used for epidemiological or infection control practices

4b. If Yes, which test is routinely performed to detect carbapenemase: (check all that apply)

☐ PCR ☐ Cepheid, BioFire array
☐ Modified Hodge Test ☐ MBL Screen ☐ Other (specify): _____
☐ mCIM/CIM ☐ Carba NP
☐ E test ☐ Rapid CARB Blue

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Facility Microbiology Laboratory Practices (continued)

4c. If Yes, which of the following are routinely tested for the presence of carbapenemases: (check all that apply)

☐ *Enterobacterales* spp. ☐ *Pseudomonas aeruginosa* ☐ *Acinetobacter baumannii*

*5. Does your facility perform extended-spectrum beta-lactamase (ESBL) testing for *E. coli* or *Klebsiella* spp. either routinely or using a testing algorithm?

☐ Yes ☐ No

5a. If Yes, indicate what is done if ESBL is detected: (check one)

☐ Change susceptible Cefotaxime/Ceftriaxone/Cefepime results to resistant

☐ No changes are made in the interpretation of cephalosporins with a note of ESBL

☐ Suppress cephalosporin susceptibility results

*6. Where is yeast identification performed for specimens collected at your facility? (check one)

☐ On-site laboratory

☐ Affiliated medical center

☐ Commercial referral laboratory

☐ Other local/regional, non-affiliated reference laboratory

☐ Yeast identification not available (specifically, yeast identification is not performed onsite or at any affiliate/commercial/other laboratory) [If checked, skip questions 8-13)

Answer questions 7–12 for the laboratory that ***performs yeast identification for your facility***:

*7. Which of the following methods are used for yeast identification? (check all that apply)

☐ MALDI-TOF MS System (Vitek MS)
☐ MALDI-TOF MS System (Bruker Biotyper)
☐ Vitek-2
☐ BD Phoenix
☐ MicroScan
☐ Non-automated Manual Kit (for example, API 20C, RapID, Germ Tube, PNA-FISH, etc.)
☐ DNA sequencing
☐ Other (specify) _____

*8. Does the laboratory routinely use Chromagar for the identification or differentiation of *Candida* isolates?

☐ Yes ☐ No ☐ Unknown

*9. *Candida* isolated from which of the following body sites are usually fully identified to the species level? (check all that apply)

☐ Blood
☐ Other normally sterile body site (for example, CSF)
☐ Urine
☐ Respiratory
☐ Other (specify): _____
☐ None are fully identified to the species level

*10. Does the laboratory employ any culture-independent diagnostic tests (CIDTs) to identify *Candida* from blood specimens?

☐ Yes ☐ No ☐ Unknown

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Facility Microbiology Laboratory Practices (continued)

10a. If yes, which culture-independent diagnostic tests (CIDTs) are used to identify *Candida* from blood specimens? (check all that apply)

- ☐ T2Candida Panel
- ☐ BioFire
- ☐ Other, specify: _____
- ☐ Unknown

*11. Are any culture-independent diagnostic tests (CIDTs) used to specifically identify *Candida auris* from clinical specimens?

☐ Yes ☐ No ☐ Unknown

11a. If yes, which culture-independent diagnostic tests (CIDTs) are used to identify *Candida auris* from clinical specimens? (check all that apply)

- ☐ T2Cauris Panel
- ☐ PCR
- ☐ Other, specify: _____
- ☐ Unknown

*12. Where is antifungal susceptibility testing (AFST) performed for specimens collected at your facility? (check one)

- ☐ On-site laboratory
- ☐ Affiliated medical center
- ☐ Commercial referral laboratory
- ☐ Other local/regional, non-affiliated reference laboratory
- ☐ AFST not available (specifically, AFST is not performed onsite or at any affiliate/commercial/other laboratory) [if selected, skip questions 14-16]

Answer questions 13–17 for the laboratory that ***performs AFST for your facility***:

*13. What method is used for antifungal susceptibility testing (AFST***), excluding Amphotericin B***? (check all that apply)

☐ Broth microdilution ☐ YeastOne colorimetric microdilution ☐ E test ☐ Vitek 2 card
☐ Disk diffusion ☐ Other (specify): _____ ☐ Unknown

*14. What method is used for antifungal susceptibility testing (AFST) of ***Amphotericin B***? (check all that apply)

☐ Broth microdilution ☐ YeastOne colorimetric microdilution ☐ E test ☐ Vitek 2 card
☐ Disk diffusion ☐ Other (specify): _____ ☐ Unknown

15. If Vitek is used for AFST, which *Candida* species do you test with it? (check all that apply)

- ☐ *C. albicans*
- ☐ *C. glabrata*
- ☐ *C. parapsilosis*
- ☐ Other *Candida* spp.

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Facility Microbiology Laboratory Practices (continued)

*16. AFST is performed for which of the following antifungal drugs? (check all that apply)

- ☐ Fluconazole
- ☐ Voriconazole
- ☐ Itraconazole
- ☐ Posaconazole
- ☐ Micafungin
- ☐ Anidulafungin
- ☐ Caspofungin
- ☐ Amphotericin B
- ☐ Flucytosine
- ☐ Other, specify: _____
- ☐ Unknown

*17. AFST is performed on fungal isolates in which of the following situations? (check only one box per row)

	Performed automatically	Performed with a clinician's order	Not performed	Unknown
Blood	☐	☐	☐	☐
Other normally sterile body site (for example, CSF)	☐	☐	☐	☐
Urine	☐	☐	☐	☐
Respiratory	☐	☐	☐	☐
Other (specify): _____	☐	☐	☐	☐

*18. What is the primary testing method for *C. difficile* used most often by your facility's laboratory or the outside laboratory where your facility's testing is performed? (check one)

- ☐ Enzyme immunoassay (EIA) for toxin
- ☐ Cell cytotoxicity neutralization assay
- ☐ Nucleic acid amplification test (NAAT) (for example, PCR, LAMP)
- ☐ NAAT plus EIA, if NAAT positive (2-step algorithm)
- ☐ Glutamate dehydrogenase (GDH) antigen plus EIA for toxin (2-step algorithm)
- ☐ GDH plus NAAT (2-step algorithm)
- ☐ GDH plus EIA for toxin, followed by NAAT for discrepant results
- ☐ Toxigenic culture (*C. difficile* culture followed by detection of toxins)
- ☐ Other (specify): _____

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Facility Microbiology Laboratory Practices (continued)

*19. Indicate the primary and definitive method used to identify microbes from blood cultures collected in your facility. (check one)

☐ MALDI-TOF MS System (Vitek MS)

☐ MALDI-TOF MS System (Bruker Biotyper)

☐ Automated Instrument (for example, Vitek, MicroScan, Phoenix, OmniLog, Sherlock, etc.)

☐ Non-automated Manual Kit (for example, API, Crystal, RapID, etc.)

☐ Rapid Identification (for example, Verigene, BioFire FilmArray, PNA-FISH, Gene Xpert, etc.)

☐ 16S rRNA Sequencing

☐ Other (specify): _____

☐ None

*20. Indicate any additional secondary methods used for microbe identification from blood cultures collected in your facility (for example, a rapid method that is confirmed with the primary method, a secondary method if the primary method fails to give an identification, or a method that is used in conjunction with the primary method). (check all that apply)

☐ MALDI-TOF MS System (Vitek MS)

☐ MALDI-TOF MS System (Bruker Biotyper)

☐ Automated Instrument (for example, Vitek, MicroScan, Phoenix, OmniLog, Sherlock, etc.)

☐ Non-automated Manual Kit (for example, API, Crystal, RapID, etc.)

☐ Rapid Identification (for example, Verigene, BioFire FilmArray, PNA-FISH, Gene Xpert, etc.)

☐ 16S rRNA Sequencing

☐ Other (specify): _____

☐ None

Infection Control Practices
(Completed with input from Hospital Epidemiologist and/or Quality Improvement Coordinator)

*21. Number or fraction of infection preventionists (IPs) in facility:

a. Total hours per week performing surveillance: _____

b. Total hours per week for infection control activities other than surveillance: _____

*22. Number or fraction of full-time employees (FTEs) for a designated hospital epidemiologist (or equivalent role) affiliated with your facility: _____

*23. Is it a policy in your facility that patients infected or colonized with MRSA are routinely placed in contact precautions while these patients are in your facility? (check one)

☐ Yes

☐ No

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

☐ Not applicable: my facility never admits these patients

Infection Control Practices (continued)

23a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

☐ All infected and all colonized patients

☐ Only all infected patients

☐ Only infected or colonized patients with certain characteristics (check all that apply)

☐ Patients admitted to high risk settings

☐ Patients at high risk for transmission

*24. Is it a policy in your facility that patients infected or colonized with VRE are routinely placed in contact precautions while these patients are in your facility? (check one)

☐ Yes

☐ No

☐ Not applicable: my facility never admits these patients

24a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

☐ All infected and all colonized patients

☐ Only all infected patients

☐ Only infected or colonized patients with certain characteristics (check all that apply)

☐ Patients admitted to high risk settings

☐ Patients at high risk for transmission

*25. Is it a policy in your facility that patients infected or colonized with CRE (regardless of confirmatory testing for carbapenemase production) are routinely placed in contact precautions while these patients are in your facility? (check one)

☐ Yes

☐ No

☐ Not applicable: my facility never admits these patients

25a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

☐ All infected and all colonized patients

☐ Only all infected patients

☐ Only infected or colonized patients with certain characteristics (check all that apply)

☐ Patients admitted to high risk settings

☐ Patients at high risk for transmission

*26. Is it a policy in your facility that patients infected or colonized with suspected or confirmed ESBL-producing or extended spectrum cephalosporin resistant *Enterobacterales* are routinely placed in contact precautions while these patients are in your facility? (check one)

☐ Yes

☐ No

☐ Not applicable: my facility never admits these patients

Infection Control Practices (continued)

26a. If Yes, check the type of patients that are routinely placed in contact precautions while in your facility (check one):

☐ All infected and all colonized patients

☐ Only all infected patients

☐ Only infected or colonized patients with certain characteristics (check all that apply)

☐ Patients admitted to high risk settings

☐ Patients at high risk for transmission

*27. Does the facility routinely perform screening testing (culture or non-culture) for CRE? *This includes screening for patients at your facility performed by public health laboratories and commercial laboratories*

☐ Yes ☐ No

27a. If Yes, in which situations does the facility routinely perform screening testing for CRE? (check all that apply)

☐ Surveillance testing at admission for all patients

☐ Surveillance testing of epidemiologically-linked patients of newly identified CRE patients (for example, roommates)

☐ Surveillance testing at admission of high-risk patients (for example, admitted from LTAC or LTCF)

☐ Surveillance testing at admission of patients admitted to high-risk settings (for example, ICU)

☐ Other (specify): _____

*28. Does the facility routinely perform screening testing (culture or non-culture) for *Candida auris*? *This includes screening for patients at your facility performed by public health laboratories and commercial laboratories.*

☐ Yes ☐ No

28a. If Yes, in which situations does the facility routinely perform screening testing for Candida auris? (check all that apply)

☐ Surveillance testing at admission for all patients

☐ Surveillance testing of epidemiologically-linked patients of newly identified *Candida auris* patients (for example, roommates)

☐ Surveillance testing at admission of high-risk patients (check all that apply)

☐ Patients admitted from long-term acute care (LTAC) or long-term care facility (LTCF

☐ Patients with recent (for example, within 6 months) overnight hospital stay outside the United States

☐ Patients admitted to high-risk settings (for example, ICU)

☐ Other high-risk patients (specify): _____

☐ Other (specify): _____

28b. If Yes, what method is routinely used by the lab conducting *Candida auris* testing of screening swabs from your facility?

☐ Culture-based methods

☐ PCR

☐ Other (specify): _____

*29. Does the facility routinely perform screening testing (culture or non-culture) for MRSA for any patients admitted?

☐ Yes ☐ No

Infection Control Practices (continued)

29a. If yes, in which situations does the facility routinely perform screening testing for MRSA? (check all that apply)

☐ Surveillance testing at admission for all patients

☐ Surveillance testing at admission of high-risk patients (for example, admitted from long-term acute care [LTAC] or long-term care facility [LTCF])

☐ Surveillance testing at admission of patients admitted to high-risk settings (for example, ICU)

☐ Surveillance testing of pre-operative patients to prevent surgical site infections

☐ Other (specify): _____

*30. Does your facility have a policy to routinely use chlorhexidine bathing for any adult patients to prevent infection or transmission of MDROs at your facility? ☐ Yes ☐ No

*31. Does the facility have a policy to routinely use a combination of topical chlorhexidine AND an intranasal anti-staphylococcal agent (mupirocin, iodophor, or an alcohol based intranasal agent) for any adult patients to prevent healthcare-associated infections or reduce transmission of resistant pathogens? ☐ Yes ☐ No

Antibiotic Stewardship Practices

(completed with input from Physician and Pharmacist Stewardship Leaders)

*32. Did the antibiotic stewardship leader(s) participate in responding to these questions? (Check one.)

☐ Yes, pharmacist lead

☐ Yes, physician lead

☐ Yes, both pharmacist and physician leads

☐ Yes, other lead

☐ No

*33. Facility leadership has demonstrated commitment to antibiotic stewardship efforts by: (Check all that apply.)

☐ Providing stewardship program leader(s) dedicated time to manage the program and conduct daily stewardship interventions.

☐ Allocating resources (for example, IT support, training for stewardship team) to support antibiotic stewardship efforts.

☐ Having a senior executive that serves as a point of contact or “champion” to help ensure the program has resources and support to accomplish its mission.

☐ Presenting information on stewardship activities and outcomes to facility leadership and/or board at least annually.

☐ Ensuring the stewardship program has an opportunity to discuss resource needs with facility leadership and/or board at least annually.

☐ Communicating to staff about stewardship activities, via email, newsletters, events, or other avenues.

☐ Providing opportunities for hospital staff training and development on antibiotic stewardship.

☐ Providing a formal statement of support for antibiotic stewardship (for example, a written policy or statement approved by the board).

☐ Ensuring that staff from key support departments and groups (for example, IT and hospital medicine) are

contributing to stewardship activities.

☐ None of the above

Antibiotic Stewardship Practices (continued)

*34. Our facility has a leader or co-leaders responsible for antibiotic stewardship program management and outcomes. ☐ Yes ☐ No

34a. If Yes, what is the position of this leader? (Check one.)

☐ Physician

☐ Pharmacist

☐ Co-led by both Pharmacist and Physician

☐ Other (for example, RN, PA, NP, etc.; specify): _____

34b. If Physician or Co-led is selected, which of the following describes your antibiotic stewardship **physician** leader? (Check all that apply.)

☐ Has antibiotic stewardship responsibilities in their contract, job description or performance review

☐ Is physically on-site in your facility (either part-time or full-time)

☐ Completed an ID fellowship

☐ Completed a certificate program on antibiotic stewardship

☐ Completed other training(s) (for example, conferences or online modules) on antibiotic stewardship

☐ None of the above

34c. If 'Has antibiotic stewardship responsibilities in their contract or job description' is selected (for physician (co) leader): What percent time for antibiotic stewardship activities is specified in the **physician** (co) leader's **contract or job description**? (Check one.)

☐ 1-10%
☐ 11-25%
☐ 26-50%
☐ 51-75%
☐ 76-100%
☐ Not specified

34d. If Physician or Co-led is selected: **In an average week**, what percentage of time does the **physician** (co) leader **spend** on antibiotic stewardship activities in your facility? (Check one.)

☐ 1-10%
☐ 11-25%
☐ 26-50%
☐ 51-75%
☐ 76-100%
☐ Not specified

34e. If Pharmacist or Co-led is selected, which of the following describes your antibiotic stewardship **pharmacist** leader? (Check all that apply.)

☐ Has antibiotic stewardship responsibilities in their contract, job description or performance review

☐ Is physically on-site in your facility (either part-time or full-time)

☐ Completed a PGY2 ID residency and/or ID fellowship

☐ Completed a certificate program on antibiotic stewardship

☐ Completed other training(s) (for example, conferences or online modules) on antibiotic stewardship

☐ None of the above

Antibiotic Stewardship Practices (continued)

34f. If 'Has antibiotic stewardship responsibilities in their contract or job description' is selected (for pharmacist (co) leader): What percent time for antibiotic stewardship activities is specified in the **pharmacist** (co) leader's **contract or job description**? (Check one)

☐ 1-10%
☐ 11-25%
☐ 26-50%
☐ 51-75%
☐ 76-100%

34g. If 'Pharmacist' or 'Co-led' is selected: **In an average week**, what percentage of time does the **pharmacist** (co) leader **spend** on antibiotic stewardship activities in your facility? (Check one)

☐ 1-10%
☐ 11-25%
☐ 26-50%
☐ 51-75%
☐ 76-100%

34h. If Pharmacist or Other is selected: Does your facility have a designated physician who can serve as a point of contact and support for the non-physician leader?

☐ Yes ☐ No

34i. If a pharmacist is **not** the leader or co-leader for the program, is there at least one pharmacist responsible for improving antibiotic use at your facility?

☐ Yes ☐ No

*35. Our facility has the following priority antibiotic stewardship interventions: (Check all that apply)

☐ Prospective audit and feedback for specific antibiotic agents

35a. If Prospective audit and feedback is selected: For which categories of antimicrobials? Answer for the following categories of antimicrobials, *whether or not* they are on formulary. (Check all that apply)

☐ Cefepime, ceftazidime, or piperacillin/tazobactam
☐ Vancomycin (intravenous)
☐ Ceftazidime/avibactam, ceftolozane/tazobactam, meropenem/vaborbactam, imipenem-cilastatin/relebactam, or cefiderocol
☐ Fluoroquinolones
☐ Daptomycin, linezolid, or other newer anti-MRSA agents
☐ Ertapenem, imipenem/cilastatin, or meropenem
☐ Eravacycline or omadacycline
☐ Lefamulin
☐ Aminoglycosides
☐ Colistin or polymyxin B
☐ Anidulafungin, caspofungin, or micafungin
☐ Isavuconazole, posaconazole, or voriconazole

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

☐ Amphotericin B and/or lipid-based amphotericin B

☐ None of the above

Antibiotic Stewardship Practices (continued)

35b. If Prospective audit and feedback is selected: Our antibiotic stewardship program monitors prospective audit and feedback interventions (for example, by tracking antibiotic use, types of interventions, acceptance of recommendations).

☐ Yes ☐ No

☐ Preauthorization for specific antibiotic agents.

35c. If Preauthorization is selected: For which categories of antimicrobials? Only answer for categories of antimicrobials that are *on formulary*. (Check all that apply)

☐ Cefepime, ceftazidime, or piperacillin/tazobactam

☐ Vancomycin (intravenous)

☐ Ertapenem, imipenem/cilastatin, or meropenem

☐ Ceftazidime/avibactam, ceftolozane/tazobactam, meropenem/vaborbactam, imipenem-cilastatin/relebactam, or cefiderocol

☐ Fluoroquinolones

☐ Daptomycin, linezolid, or other newer anti-MRSA agents

☐ Eravacycline or omadacycline

☐ Lefamulin

☐ Aminoglycosides

☐ Colistin or polymyxin B

☐ Anidulafungin, caspofungin, or micafungin

☐ Isavuconazole, posaconazole, or voriconazole

☐ Amphotericin B and/or lipid-based amphotericin B

☐ None of the above

35d. If Preauthorization is selected: Our antibiotic stewardship program monitors preauthorization interventions (for example, by tracking which agents are requested for which conditions).

☐ Yes ☐ No

☐ Facility-specific treatment recommendations, based on national guidelines and local pathogen susceptibilities, to assist with antibiotic selection for common clinical conditions (for example, community-acquired pneumonia, urinary tract infection, skin and soft tissue infection).

35e. If Facility-specific treatment recommendations is selected: For which common clinical conditions?

☐ Community-acquired pneumonia

☐ Urinary Tract infection

☐ Skin and soft tissue infection

☐ None of the above

35f. If Facility-specific treatment recommendations is selected: Our stewardship program monitors adherence to our facility's treatment recommendations for antibiotic selection for common clinical conditions (for example, community-acquired pneumonia, urinary tract infection, skin and soft tissue infection).

☐ Yes ☐ No

35g. If Yes: For which common clinical conditions?

☐ Community-acquired pneumonia

☐ Urinary tract infection

☐ Skin and soft tissue infection

☐None of the above

☐ None of the above

Antibiotic Stewardship Practices (continued)

*36. Our facility has a policy or formal procedure for other interventions to ensure optimal use of antibiotics: (Check all that apply.)

☐ Early administration of effective antibiotics to optimize the treatment of sepsis

☐ Treatment protocols for *Staphylococcus aureus* bloodstream infection

☐ Stopping unnecessary antibiotic(s) in new cases of *Clostridioides difficile* infection (CDI)

☐ Review of culture-proven invasive (for example, bloodstream) infections

☐ Review of planned outpatient parenteral antibiotic therapy (OPAT)

☐ The treating team to review antibiotics 48-72 hours after initial order (specifically, antibiotic time-out).

☐ Assess and clarify documented penicillin allergy

☐ Using the shortest effective duration of antibiotics at discharge for common clinical conditions (for example, community-acquired pneumonia, urinary tract infections, skin and soft tissue infections)

☐ None of the above

36a. If 'Using the shortest effective duration of antibiotics at discharge for common clinical conditions' is selected: Our stewardship program monitors adherence in using the shortest effective duration of antibiotics at discharge for common clinical conditions (for example, community-acquired pneumonia, urinary tract infections, skin and soft tissue infections), at least annually.

☐ Yes ☐ No

*37. Our facility has in place the following specific 'pharmacy-based' interventions: (Check all that apply)

☐ Pharmacy-driven changes from intravenous to oral antibiotics without a physician's order (for example, hospital-approved protocol)

☐ Alerts to providers about potentially duplicative antibiotic spectra (for example, multiple antibiotics to treat anaerobes)

☐ Automatic antibiotic stop orders in specific situations (for example, surgical prophylaxis)

☐ None of the above

*38. Our stewardship program has engaged bedside nurses in actions to optimize antibiotic use.

☐ Yes ☐ No

38a. If Yes is selected: Our facility has in place the following specific 'nursing-based' interventions: (Check all that apply.)

☐ Nurses receive training on appropriate criteria for sending urine and/or respiratory cultures.

☐ Nurses initiate discussions with the treating team on switching from intravenous to oral antibiotics.

☐ Nurses initiate antibiotic time-out discussions with the treating team.

☐ Nurses track antibiotic duration of therapy

☐ None of the above

38b. If 'Nurses track antibiotic duration of therapy' is selected: Is that information available at the bedside (for example, on a whiteboard in the room)? ☐ Yes ☐ No

Form Approved
OMB No. 0920-0666
Exp. Date: 12/31/22
www.cdc.gov/nhsn

Antibiotic Stewardship Practices (continued)

*39. Our stewardship program monitors: (Check all that apply.)

- ☐ Antibiotic resistance patterns (either facility- or region-specific), at least annually
- ☐ *Clostridioides difficile* infections (or *C. difficile* LabID events), at least annually
- ☐ Antibiotic use in days of therapy (DOT) per 1000 patient days or days present, at least quarterly
- ☐ Antibiotic use in defined daily doses (DDD) per 1000 patient days, at least quarterly
- ☐ Antibiotic expenditures (specifically, purchasing costs), at least quarterly
- ☐ Antibiotic use in some other way, at least annually (specify): _____
- ☐ None of the above

*40. Our stewardship team provides the following antibiotic use reports to prescribers, at least annually: (Check all that apply.)

- ☐ Individual, prescriber-level reports
- ☐ Unit- or service-specific reports
- ☐ None of the above

40a. If 'Individual, prescriber-level reports' or 'Unit- or service-specific reports' is selected: Our stewardship program uses these reports to target feedback to prescribers about how they can improve their antibiotic prescribing, at least annually.

☐ Yes ☐ No

*41. Our facility distributes an antibiogram to prescribers, at least annually

☐ Yes ☐ No

*42. Information on antibiotic use, antibiotic resistance, and stewardship efforts is reported to hospital staff, at least annually.

☐ Yes ☐ No

*43. Which of the following groups receive education on optimal prescribing, adverse reactions from antibiotics, and antibiotic resistance (for example, Grand Rounds, in-service training, direct instruction) at least annually? (Check all that apply.)

- ☐ Prescribers
- ☐ Nursing staff
- ☐ Pharmacists
- ☐ None of the above

*44. Are patients provided education on important side effects of prescribed antibiotics?

☐ Yes ☐ No

44a. If 'Yes' is selected: How is education to patients on side effects shared? (Check all that apply.)

- ☐ Discharge paperwork
- ☐ Verbally by nurse
- ☐ Verbally by physician
- ☐ None of the above

☐ Verbally by pharmacist

Optional Antibiotic Stewardship Practices Questions

Responses to the following questions are not required to complete the annual survey.

Provide additional information about your facility's antibiotic stewardship activities and leadership.

45. Antibiotic stewardship activities are integrated into quality improvement and/or patient safety initiatives.

☐ Yes ☐ No

46. Our facility accesses targeted remote stewardship expertise (for example, tele-stewardship to obtain facility-specific support for our antibiotic stewardship efforts

☐ Yes ☐ No

47. Our stewardship program works with the microbiology laboratory to implement the following interventions: (Check all that apply)

☐ Selective reporting of antimicrobial susceptibility testing results

☐ Placing comments in microbiology reports to improve prescribing

☐ None of the above

48. Which committees or leadership entities provide oversight of your facility's antibiotic stewardship efforts? (Check all that apply.)

☐ Pharmacy director
☐ Pharmacy & therapeutics
☐ Patient safety
☐ Quality improvement
☐ Executive leadership (for example, CEO, CMO)
☐ Hospital board
☐ Other (specify): _____
☐ None

Facility Water Management Program (WMP) (Completed with input from WMP team members.)

*49. Does your facility have a water management program (WMP) to prevent the growth and transmission of *Legionella* and other opportunistic waterborne pathogens (for example, *Pseudomonas, Acinetobacter, Burkholderia, Stenotrophomonas,* nontuberculous mycobacteria, and fungi)?

☐ Yes ☐ No

49a. If Yes, who is represented on your facility WMP team? (Check all that apply):

☐ Hospital Epidemiologist/Infection Preventionist
☐ Hospital Administrator/Leadership
☐ Facilities Manager/Engineer
☐ Maintenance Staff
☐ Equipment/Chemical Acquisition/Supplier
☐ Environmental Services
☐ Compliance/Safety Officer
☐ Risk/Quality Management Staff
☐ Infectious Disease Clinician
☐ Consultant
☐ Laboratory Staff
☐ Other (specify): _____

*50. Has your facility ever conducted an environmental assessment to identify where *Legionella* and other opportunistic waterborne pathogens for examplecould grow and spread in the facility water system (for example, piping infrastructure)? This may include a description of building water systems using text or basic diagram that maps all water supply sources, treatment systems, processing steps, control measures, and end-use points.

☐ Yes ☐ No

50a. If Yes, when was the most recent assessment conducted? (Check one)

☐ Within the most recent year (< 1 year ago) ☐ Between 1 and 3 years ago (≥ 1 year and ≤ 3 years) ☐ More than 3 years ago (> 3 years)

Facility Water Management Program (WMP) (continued)

*51. Has your facility ever conducted a water infection control risk assessment (WICRA) to evaluate water sources, modes of transmission, patient susceptibility, patient exposure, and/or program preparedness? An example WICRA tool can be accessed at https://www.cdc.gov/hai/pdfs/prevent/water-assessment-tool-508.pdf

☐ Yes ☐ No

51a. If Yes, when was the most recent assessment conducted? (Check one)

☐ Within the most recent year (< 1 year ago) ☐ Between 1 and 3 years ago (≥ 1 year and ≤ 3 years) ☐ More than 3 years ago (> 3 years)

*52. Does your facility regularly monitor the following parameters in the building water system(s)?

Disinfectant (such as residual chlorine):	☐ Yes	☐ No
52a. If Yes, does your facility have a plan for corrective actions when disinfectant(s) are not within acceptable limits as determined by the water management program?	☐ Yes	☐ No
Water temperature:	☐ Yes	☐ No
52b. If Yes, does your facility have a plan for corrective actions when water temperatures are not within acceptable limits as determined by the water management program?	☐ Yes	☐ No
Water pH:	☐ Yes	☐ No
52c. If Yes, does your facility have a plan for corrective actions when water pH is not within acceptable limits as determined by the water management program?	☐ Yes	☐ No
Heterotrophic plate count (HPC) testing:	☐ Yes	☐ No
52d. If Yes, does your facility have a plan for corrective actions when heterotrophic plate counts are not within acceptable limits as determined by the water management program?	☐ Yes	☐ No
Specific environmental *Legionella* testing:	☐ Yes	☐ No
52e. If Yes, does your facility have a plan for corrective actions when environmental testing for *Legionella* are not within acceptable limits as determined by the water management program?	☐ Yes	☐ No

any other aspect of this collection of information, including suggestions for reducing this burden to CDC, Reports Clearance Officer, 1600 Clifton Rd., MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0666).
