INTERVIEWER: READ OR PARAPHRASE

For many people with spinal cord injury or brain injury, seeking employment after injury is an important goal. There are services available to help people with disabilities. However, the best ways to coordinate and deliver these services are not yet known. This project will compare two ways of coordinating and delivering services that are designed to help people with spinal cord injury or brain injury obtain employment.

The Social Security Administration, Kessler Foundation, and Mathematica, a research organization, are working together on this project. As part of this study, we will interview Kessler Institute for Rehabilitation patients with spinal cord injuries or brain injuries.

Thank you for agreeing to participate in this survey. Participation is voluntary but very important. The survey takes about 15 minutes to complete. Your responses will be kept private and used only for research purposes. You may skip any question you do not wish to answer. Your responses will be combined and reported with other responses in total; no individual names or responses will be reported.

If you have any questions about the survey, please contact Mathematica at 1-8XX-XXXX (this is a toll-free call) or email us: XXX@mathematica-mpr.com.
