Standard Operating Procedures

In sections 1-6, please describe your standard operating procedures (SOPs) that address each regulatory requirement for importing nonhuman primates under a Lab-to-Lab registration. Please attach copies of your SOPs.

		Section 1: D	ocumentation
	Regulation 4	12 CFR §71.53 (h)	Standard Operating Procedure Meeting Regulation
1.	the intended purpose NHP. The purpose mu regulatory permitted	ures to collect or create a record of of importation for each imported ast comply with one of the purposes (science, education, or d in 42 CFR§71.53 (a).	
2.	Describe how you will demonstrating that to continue to be used for three transfer of the NHP. It identity of any recipite each NHP in each shipment or sale distribution or transfer An importer must may organized manner, eit location that is at or facility to allow HHS/during HHS/CDC site or within one hour of maintained electronic manner than cannot	I ensure that written certifications he NHPs and their offspring will or permitted purposes are years after the distribution or Each record must include the ents, the number and identity of oment or sale, and the dates of e, for three years after the	
3.	Explain how, before distributing or transferring an imported NHP, you	i. Communicate to the recipients of NHPs, in writing, the restrictions and definitions of permitted purposes; and	
	will:	ii. Obtain written certifications	

Public reporting burden of this collection of information is estimated to average 60 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30329; ATTN: PRA 0920-XXXX.

from the intended recipient that	
the NHPs will be used and	
distributed only for permitted	
purposes.	

		Section 2: Worker Protection Plan	and Personal Protective Equipment
		Regulation 42 CFR §71.53 (i)	Standard Operating Procedure Meeting Regulation
	this se	: In addition to complying with the requirements of ection, an importer must comply with all relevant	
		al and state requirements relating to occupational h and safety.	
1.	Pleas	se verify that you have a written worker protection for anyone whose duties may result in exposure to	
	meas	s, including procedures for appropriate response sures in the event of an emergency. An importer	
	each	adhere to the plan and SOPs and must ensure that worker covered under the plan also adheres to it all pertinent SOPs.	
2.	telepl	nporter must contact HHS/CDC immediately by hone, text, or email, as specified in the importer's	
	zoond	to report any instance of a worker exposed to a otic illness and must include instructions for	
		acting HHS/CDC in its worker protection plan. se describe your procedures to contact CDC.	
3.		ribe the elements of your worker protection plan address the following:	
	i.	Procedures to protect and train transport	
		workers in how to avoid and respond to	
		zoonotic disease exposures associated with	
		NHPs, including procedures for appropriate	
		responses in the event of a vehicle crash or	
		other emergency during transport;	
	ii.	An infection-prevention program, including	
		infection-prevention methods requiring, at a	
		minimum, PPE and workplace practices for	
		preventing infection among workers whose duties may result in exposure to NHPs and;	
		A. SOPs that include requirements for	
		preventing workplace infection from	
		potentially contaminated needles or	
		other sharp instruments and that, at a	
		minimum, prohibit workers from	
		recapping used needles by hand;	
		removing needles by hand; or otherwise	
		bending, breaking, or manipulating used	
		needles by hand.	
		B. SOPs requiring that used disposable	
		syringes and needles, scalpel blades,	
		and other sharp items be placed in	
		puncture-resistant containers kept as	
		close to the work site as practical and	

		disinfected and/or disposed of as	
		hazardous waste.	
		C. SOPs requiring that removable,	
		disposable PPE be autoclaved,	
		incinerated, or otherwise disposed of as	
		biohazardous waste.	
		D. Nondisposable clothing worn in the	
		quarantine facility must be disinfected	
		on site before laundering. Please	
		provide a detailed description of how	
		quarantine laundry is handled.	
		E. Describe your infection-prevention	
		program that requires NHP handlers to	
		cleanse all bites, scratches, and/or	
		mucosal surfaces or abraded skin	
		exposed to blood or body fluids	
	L	immediately and thoroughly.	
		F. Describe your infection-prevention	
		procedures that require workers to	
		immediately flush their eyes with water	
		for at least 15 minutes following an	
		exposure of blood or body fluids to the	
		eye.	
	iii.	Describe your post-exposure procedures that	
		provide potentially exposed workers with	
		direct and rapid access to a medical	
		consultant including:	
		 A. Procedures ensuring that exposed 	
		workers have direct and immediate	
		access to a medical consultant who has	
		been previously identified in the SOPs to	
		HHS/CDC.	
		B. For potential exposures to herpes B	
		virus, post-exposure procedures that	
		require the routing of diagnostic	
		specimens to the National B Virus	
		Resource Center located at Georgia	
		State University in Atlanta, Georgia, or	
		another location as specified by	
		HHS/CDC.	
	iv.	How do you document worker training, including for those working in the quarantine	
		facility?	
	٧.	What is the frequency of quarantine worker	
	٧.	training?	
4.	Descrik	pe how your worker protection program	
		ses hazard evaluation and worker	
		unication procedures that include the following:	
	i.	A description of the known zoonotic disease	
	••	and injury hazards associated with handling	
		NHPs	
	ii.	The need for PPE when handling NHPs and	
			·

		training in proper use of PPE, including re-
		training and reinforcement of appropriate
		use
	iii.	Procedures for monitoring workers for signs
		of zoonotic illness, including procedures that
		ensure reporting to HHS/CDC by telephone,
		text, or email within 24 hours of the
		occurrence of illness in any worker suspected
		of having a zoonotic disease
	iv.	Procedures for disinfection of garments,
		supplies, equipment, and waste.
5.		t of your worker protection plan, you must
		y the PPE required for each task or working area.
		describe your procedures for ensuring the
		ing (be sure to describe in detail the steps for ng, doffing, and discarding or disinfecting PPE):
\neg	i.	Any required PPE must be available to
	1.	workers when needed
	ii.	Workers in direct contact with NHPs must
		wear the following
		A. Gloves of sufficient thickness to reduce
		the risk of cuts, scratches, and punctures
		B. At a minimum, disposable NIOSH-
		approved N95 respirators, in compliance
		with OSHA 29 CFR §1910.134, which
		requires a respiratory protection
		program
		C. Face shields or eye protection
		D. Outer protective clothing when opening
		crates, removing foreign materials from
		crates, feeding NHPs, removing dead
		NHPs, or handling bedding materials
	iii.	Workers handling crates or pallets
		containing NHPs must wear the following
		A. Elbow-length, reinforced leather gloves
		or equivalent gloves that prevent penetration of splinters, other crating
		materials, or debris
		B. Outer protective clothing
	-	C. Waterproof shoes or boots
		D. NIOSH-approved respiratory protection
		that is compliant with OSHA regulations
		at 29 CFR 1910.134
		E. Face shields or eye protection
	iv.	Workers whose faces may come within 5 feet
		of an NHP must wear disposable NIOSH-
		approved N95 respirators and either face
		shields or eye protection to protect against
		aerosol or droplet transmission of
		pathogens;

V.	Workers must remove disposable PPE and	
	discard as a biohazard	
vi.	. Workers must not drink, eat, or smoke while	
	physically handling NHPs or cages, crates, or	
	other materials from such NHPs	
6. Desc	cribe your procedures for ensuring that each item	
	ed below regarding tuberculosis (TB) is addressed:	
i.	Workers in a facility housing NHPs must have	
	a baseline evaluation for TB prior to working	
	with NHPs and an evaluation at least	
	annually	
ii.		
	consultant who is capable of performing the	
	evaluation and maintaining records for such	
	tests	
iii.		
""	confirmed TB, any worker who had	
	previously entered any room where a	
	confirmed NHP has been housed must	
	promptly undergo a post-exposure TB	
	evaluation and	
	A. If that test is negative, the worker must	
	undergo another TB evaluation 3	
	months later; and	
	B. If either test is reactive, the worker	
	must be referred for medical	
	evaluation; and	
	C. The HHS/CDC must be immediately	
	notified of the results of the medical	
	evaluation by telephone, text, or email	
	as specified in the importer's SOPs	
iv.	. Describe how you will ensure compliance	
	with exposure-control planning elements	
	under <u>29 CFR 1910.1030</u> for workers who will	
	have parenteral and other contact with	
	blood or other potentially infectious material	
	from NHPs.	
V.	Describe how you will ensure compliance	
	with the respiratory protection requirements	
	in <u>29 CFR 1910.134</u> .	
7. For i	importation of macaques, an importer must	
	elop, implement and adhere to a written PPE	
	gram to prevent herpes B virus transmission. The	
	gram must be based on a thorough hazard	
	essment of all work procedures, potential routes of	
	osure (e.g., bites, scratches, or mucosal exposures),	
	potential adverse health outcomes. If you intend to	
	ort macaques during the 2-year registration period,	
	ase provide a description of your program addressing	
	pes B.	
	cribe how you will ensure the following	
requ	uirements are met:	

a.	An importer must keep records of all serious	
	febrile illnesses (fever greater than 101.3	
	degrees Fahrenheit [38.5 degrees Celsius] for	
	more than 48 hours) in workers having	
	exposure to NHPs in transit or in quarantine.	
	The record must be kept by the importer as	
	part of the worker's administrative records.	

- b. The importer must promptly notify HHS/CDC by telephone, text, or email if such an illness occurs.
- 9. An importer must ensure that the medical consultant providing care is informed that the patient works with and/or has been exposed to NHPs.

Section 3: Crating, Caging, and Transport				
	Regulation 42 CFR §71.53 (j)	Standard Operating Procedure Meeting Regulation		
Equipmen	nt standards for crating, caging, and transporting live NHPs			
must be ir	n accordance with <u>USDA Animal Welfare</u> regulation			
standards	s (9 CFR parts 1, 2, and 3) and <u>International Air Transport</u>			
	on standards. Additionally, importers must establish,			
	nt, maintain, and adhere to SOPs that ensure the items listed			
	e met. Describe the elements of your SOPs that will ensure			
the follow	-			
	Any crate used to transport NHPs must be free of sharp			
-	projections that could scratch or otherwise injure workers or			
	NHPs			
	Glass items must not be used for feeding or watering NHPs			
	during transport.			
	NHPs must only be removed from crates in an approved			
	quarantine facility under the supervision of a licensed			
	veterinarian.			
	NHPs must not be removed from crates during transport			
	Upon arrival into the United States, only an importer or an			
	authorized representative may receive the NHPs from a			
	conveyance (e.g., airplane, ship). The importer must establish			
	an emergency contingency plan in the unlikely event they are			
	unable to meet the shipment.			
	All reusable items must be decontaminated between uses.			
	At all times during transport, crates containing NHPs must be			
	separated by a physical barrier from workers, other			
	ndividuals, and all other animals and cargo, or by a spatial			
	parrier greater than 5 feet, that prevents contamination of			
	cargo or individuals with bodily fluids, feces, or soiled			
	pedding.			
	At all times during transport, individuals traveling with the			
	shipment must be protected from shared air of NHPs to			
-	prevent the transmission of zoonotic diseases. Airflow must			
	be unidirectional from NHP transport workers to NHPs or, if			
C	any air is recirculated to the NHP transport workers, it must			

	be HEPA-filtered. If a ventilation system is not in place, all	
	NHP transport workers must wear respiratory protection.	
9.	If traveling by plane, crates containing NHPs should be loaded	
	in the cargo hold last and removed first, must be placed on	
	plastic that prevents spillage onto the deck of the plane, and	
	must be placed on pallets or double crated to ensure	
	separation from other cargo.	
10.	Workers, as well as NHPs, must be protected from	
	communicable disease exposures at any facility used en	
	route, including transportation holding facilities. An importer	
	must maintain a description of any transportation holding	
	facilities and document the communicable disease prevention	
	measures taken to protect workers at facilities used en route	
11.	For each import, documentation must be made of the	
	communicable disease-prevention procedures to be carried	
	out in every step of the chain of custody, from the time of	
	embarkation of the NHPs at the country of origin until arrival	
	at the quarantine facility.	
12.	Procedures to ensure that aircraft, ship, vehicles, and related	
	equipment are decontaminated following transport.	
13.	Used PPE, bedding, and other potentially contaminated	
	material must be removed from the ground transport vehicle	
	upon arrival at the quarantine facility and disposed of as	
	biohazardous waste.	

Section 4: Ground Transport Vehicles		
Regulation 42 CFR §71.53 (k)	Standard Operating Procedure Meeting Regulation	
An importer must establish, implement, maintain, and adhere to SOPs		
for ground transport vehicles transporting NHPs that meet the		
following requirements. Provide a description of ground transport		
vehicles you intend to use for transportation of imported NHPs under		
CDC-mandated quarantine. You may also attach diagrams or photographs.		
Ground transport vehicles must have a separate cargo compartment with separate heating, ventilation, and airconditioning systems.		
The interior surfaces of ground transport vehicle cargo compartments must be of smooth construction, easy to clean and disinfect.		
 Ground transport vehicle cargo compartments must be large enough to allow safe stowage of NHP crates in a manner that allows ready access to each NHP during transit without unloading any crates. 		
4. Verify that used PPE, bedding, and other potentially contaminated material will be removed from the ground transport vehicle upon arrival at the quarantine facility and disposed of as biohazardous waste by a licensed facility.		
5. Describe procedures to notify HHS/CDC in writing, text message, or email, after transport of the NHP shipment from the port of entry to the quarantine facility. Notification must occur within 48 hours of the time the shipment arrived at the		

	quarantine facility.	
6.	As part of the notification of arrival in number five (5) above,	
	an importer must inform HHS/CDC whether suspected or	
	confirmed transmission or spread of communicable disease	
	occurred during transport, including notification of NHPs that	
	died, became ill, or were injured during transport, or	
	malfunctions associated with disease-mitigation procedures	
	or equipment. Please describe your SOPs to ensure this	
	notification occurs.	

Section 5: Health Reporting for NHPs	
Regulation 42 CFR §71.53 (m)	Standard Operating Procedure Meeting Regulation
An importer must notify HHS/CDC of the events listed in this section	
(Section 5) by telephone, text, or email. Please provide elements of	
your SOPs that ensure the following:	
1. An importer must notify HHS/CDC within 24 hours of the	
occurrence of any morbidity or mortality of NHPs in	
quarantine facilities, or following a zoo-to-zoo or laboratory-	
to-laboratory transfer.	
2. An importer must notify HHS/CDC within 24 hours if any NHP	
tests positive for filovirus virus antigen or antibody.	
3. An importer must report to HHS/CDC within 24 hours, any	
positive or suspicious TST results, necropsy findings, or	
laboratory results. Any report required under this section	
must include a copy or summary of the individual NHP's	
health records.	

Section 6: Laboratory to Laboratory Transfers	
Regulation 42 CFR §71.53 (q)	Standard Operating Procedure Meeting Regulation
In addition to the requirements listed in Sections 1-5 above, if a lab is	
receiving one or more NHPs for purposes related to an ongoing	
research project from another established research facility outside the	
United States, the recipient facility must, before the transfer, submit	
the following to HHS/CDC for approval:	
1. A copy of each NHP's veterinary medical records, including	
regular testing for TB from the previous lab for HHS/CDC's	
approval. The medical record should include a positive	
identification of the NHP, such as a tattoo, microchip, or	
photograph.	
2. A copy of a current health certificate(s), including	
documentation of a negative TST, signed by a state-licensed	
veterinarian within 14 days of the transfer stating that the	
NHP(s) appear healthy and are free from communicable	
diseases; and	
3. Documentation of the ongoing IACUC-approved research	
project and the reason the NHP needs to be transported to	
the U.S. laboratory facility.	
4. A specific itinerary with names, dates, flights, times, airports,	

seaports, and responsible parties to contact at every step of	
travel, including all ground transportation. This must be	
provided in writing (by email) to HHS/CDC at least 7 days	
before shipment arrival.	

Note: Only laboratories transferring NHPs on established research protocols from their foreign-based facilities to their U.S.-based laboratories are eligible to apply to transfer NHPs from lab to lab under 42 CFR §71.53 (q).
