

Hello,

In preparation for the [mm, yyyy] quarterly reporting deadline for activities in support of CDC-RFA-OT21-2103 from Month DD, YYYY through Month DD, YYYY, the following **reporting forms are now available in REDCap:**

- Quarterly Workplan Progress Reporting fields (reported at the activity level)
- Quarterly Performance Measures Report (reported at the strategy level)
- Quarterly Financial Report (reported at the grant level)
- Funding Allocation Table (reported at the strategy level)

Performance Measures will be used to monitor implementation and progress toward achieving intended outcomes, demonstrate accountability to interested parties (e.g. funders, the public) by showing how funds are being spent, and maximize learning opportunities associated with the implementation and impacts of this grant. We ask all recipients to enter data each quarter using The Performance Measures Report in REDCap. No personally identifiable or sensitive information is included in these measures and reported data are stored and secured in the CDC's REDCap system. We estimate each recipient will spend around 35 hours each quarter (140 hours annually) on performance measures reporting. This estimate includes time to collect and aggregate data from partners, build and manage reporting systems in jurisdictions, and enter data into REDCap.

The OT21-2103 Program is providing you with several resources to support you as you prepare for this reporting cycle. These resources include:

- o Job aids with updated screen shots and simple instructions for navigating the reporting forms in REDCap (see attached PDF).
- o Updated offline copies of the reporting forms that can be shared with partners, contractors, etc. to aid in collaboration (see attached Word document). **Note: only data entered into REDCap will be accepted by CDC.**
- o Office hours and 1:1 support with members of the OT21-2103 support team July 26 & 28, 2022 (see attached calendar invites; open and save the invites to your calendar).
- o Performance Measures Guidance v1.1 saved [HERE](#).

[Instrument Name] Guidance Update:
