II. Discussion

Pursuant to section 50.75 of title 10 of the *Code of Federal Regulations*, “Reporting and recordkeeping for decommissioning planning,” the NRC requires nuclear power reactor licensees to adjust annually, in current year dollars, their estimate of the cost to decommission their plants. The annual updates are part of the process for providing reasonable assurance that adequate funds for decommissioning will be available when needed.

Revision 19 of NUREG-1307, “Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities,” modifies the previous revision to this report issued in January 2021 (ADAMS Accession No. ML21027A302) and incorporates updates to the adjustment factor and to the labor, energy, and waste burial escalation factors of the NRC minimum decommissioning fund formula. The minimum decommissioning fund formula amounts calculated by licensees using the Barnwell low-level waste disposal facility will be impacted by a significant increase in low-level waste burial charge pricing at that site. Additionally, at the nation’s three other low-level waste disposal facilities, both moderate increases in some, and decreases in other, low-level waste burial charges, coupled with moderate increases in

labor rates and near doubling of energy rates for all licensees, likely will result in higher formula amounts for all licensees. Thus, based on revised low-level waste burial factors presented in this report and increases in labor and energy rates, the minimum decommissioning fund formula amounts calculated by licensees will likely reflect moderate to more substantial increases when compared to those previously reported by licensees in 2021.
