Read only permissions allow a user to view a data type (adults, youth groups, staff – including recalls, questionnaires, and reports), but not to add, edit, or delete that data type. For example, a user with Adult Read Only permissions can print One Day Recalls or Questionnaire Diagnostic Reports, but cannot make changes to any Adults, Recalls, or Questionnaires. It should be noted that read only permissions override any options selected above to add, edit, or delete that data type so it's important to make selections carefully.
