

## 2025 Potato Production Practices Report Respondent Booklet

Every year the U.S. Department of Agriculture (USDA) conducts the Agricultural Resource Management Survey. The survey gathers information on production practices, nutrient and fertilizer use, tillage practices, and pest management practices for different commodities each year.

Your participation is important. By responding to this survey, you are helping USDA compile an accurate picture of farming in the United States. This will ensure that the decisions impacting the well-being of farms are based on timely information.

A representative from the National Association of State Departments of Agriculture will work with you to complete your survey by telephone. To protect the health of producers, partners, and employees, NASS has suspended most in-person data collection efforts this year.

During the interview, our representative will ask you detailed questions about the types of pesticides you use on your crops. To make the interview process faster, please have your spray records available. If you used a commercial chemical company, please help our representative by having those records accessible.

The enclosed booklet will help you and our representative find and record the correct pesticide products. The booklet lists registered label names of products with their Environmental Protection Agency registration number. If you do not find the correct product listed in this booklet, record where the product was purchased or as much information about the product as possible.

Your survey response is confidential. The information you provide will be used for statistical purposes only. In accordance with federal law, your responses will not be published in identifiable form.

Thank you for your participation and support of our programs and U.S. agriculture. If you have any questions, please contact us at 888-424-7828 or visit [nass.usda.gov/go/arms](https://nass.usda.gov/go/arms).

Sincerely,

Joseph L. Parsons  
Chair, Agricultural Statistics Board

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number is 0535-0218. The time required to complete this information collection is estimated to average 35 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
