Introduction to FPRS

The primary function of the Food Programs Reporting System (FPRS) is to support the submission and management of the United States Department of Agriculture Food and Nutrition Service (FNS) forms.

FNS forms contain data reported by various State Agencies (SA), Indian Tribal Organizations (ITO), U.S. territories, and FNS Regional Offices (RO) that participate in FNS programs.

FPRS provides the primary collection point for program performance statistics and financial data from each of the participating entities.
