Establishing an eLandings Account [🔗](#)

Before a person/company can access **eLandings** to report fishery harvest, the primary User must establish an Operation in eLandings which will need to be approved for use by interagency staff.

NOTE: If for any reason you cannot follow the registration steps to completion (i.e. printing out the form, signing it and faxing it in) or if you've lost your original form, please contact elandings@alaska.gov for assistance.
