

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, last week's additional questions are removed; non-substantive additions include a question that examines perceptions of the pandemic and four questions regarding the Johnson & Johnson vaccine. Note that each respondent will only answer one randomly selected question from this group to determine which message correlates to higher vaccine uptake. This request does not impact the total burden hours proposed for the CET in the initial submission.
