

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave refields questions on trusted information sources, booster hesitancy, and parents' preferred vaccine location for their child as well as the under 5 perceptions battery. New or modified questions include those on about vaccine side effects experienced, date of booster shot (first if respondent received more than one), and children's booster uptake to accommodate expanded eligibility.
