

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave re-fields questions on the COVID-19 public health emergency ending, COVID risk and testing, and pandemic goals. New or modified questions include those on natural immunity beliefs, updated vaccine likelihood, pandemic assessment, opinions of the public health emergency, personal COVID risk, and testing new messages.
