Occurrence Reporting & Processing System

## Occurrence Reporting & Processing System

The Department of Energy's Occurrence Reporting Program provides timely notification to the DOE complex of events that could adversely affect: public or DOE worker health and safety, the environment, national security, DOE's safeguards and security interests, functioning of DOE facilities, or the Department's reputation.

DOE analyzes aggregate occurrence information for generic implications and operational improvements. The Occurrence Reporting Program directives are DOE Order 232.2A, *Occurrence Reporting and Processing of Operations Information*, and DOE Standard DOE-STD-1197-2011, *Occurrence Reporting Causal Analysis*. Contact Ross Natoli (Ross.Natoli@hq.doe.gov) for information and assistance on policy and requirements concerning Occurrence Reporting and Processing of Operations Information.
