<b>TOTAL LABOR BURDEN AND COST (rounded) °</b>			
<b>Capital and O&amp;M Cost (rounded): °</b>			
<b>TOTAL COST (rounded): °</b>			

**Assumptions:**

- <sup>a</sup> We have assumed that the average number of respondents potentially subject to this rule is 352. Of the 352 facilities, 152 the three-year period of this ICR.
- <sup>b</sup> This ICR uses the following labor rates: \$157.61 (\$75.05 + 110%) per hour for Executive, Administrative, and Managerial labor; \$75.05 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, September 1997, column 1, "Total compensation." The rates have been increased by 110 percent to account for varying industry wage rates and benefits, including business expenses associated with hiring, training, and equipping their employees.
- <sup>c</sup> We have assumed that all facilities will take 4 hours to read and review instructions.
- <sup>d</sup> We have assumed that there will be no new sources during the three-year period of this ICR.
- <sup>e</sup> We have assumed that 30 percent of the 152 major source respondents (46 facilities) will be required to maintain, adjust, or replace equipment.
- <sup>f</sup> We have assumed that 20 percent of the 152 major source respondents (30 facilities) will have startup, shutdown, malfunction, or maintenance events.
- <sup>g</sup> We have assumed that 46 facilities are fitted with CMS control, and an additional 30 facilities that may encounter excess emissions events.
- <sup>h</sup> We have assumed that 105 facilities do not have CMS installed in them.
- <sup>i</sup> We have assumed that 20 percent of respondents (major source) will enter information on startup, shutdown, malfunction, or maintenance events.
- <sup>j</sup> We have assumed that 46 respondents (major source) will enter information on CMS operations.
- <sup>k</sup> We have assumed that 105 facilities do not have CMS installed in them.
- <sup>l</sup> We have assumed that 2 existing facilities will be required to enter information on records of materials used by incidental sources.
- <sup>m</sup> We have assumed that 200 area sources, which includes products and packaging rotogravure and wide-web flexographic printing, will enter a monthly record of HAP usage to show that they are meeting the limit.
- <sup>n</sup> We have assumed that it will take each respondent 0.5 hours to record HAP usage.
- <sup>o</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

<b>TOTAL ANNUAL BURDEN AND COST (rounded) <sup>f</sup></b>			

**Assumptions:**

<sup>a</sup> We have assumed that the average number of respondents potentially subject to this rule is 352. Of the 352 facilities, 152 are major sources over the three-year period of this ICR.

<sup>b</sup> This cost is based on the following hourly labor rates: \$70.56 (GS-13, Step 5, \$44.10 + 60%) for Managerial, \$52.37 (GS-11, Step 5, \$31.42 + 60%) Clerical. These rates are from the Office of Personnel Management (OPM), 2022 General Schedule, which exclude benefit packages available to government employees.

<sup>c</sup> We have assumed that there will be no new sources during the three-year period of this ICR.

<sup>d</sup> We have assumed that 46 facilities are fitted with CMS control, and an additional 30 facilities that may encounter excess emissions.

<sup>e</sup> We have assumed that 20 percent of 152 major sources (30 facilities) will be required to submit periodic startup, shutdown, and malfunction reports.

<sup>f</sup> Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
