Demographic Analysis

Program Guidance:

Use data from the most recent decennial Census. To obtain demographic information from the 2010 Census, go to www.factfinder.census.gov. Click on 'advanced search' and then 'show me all.' Type in 'QT-P3' into the 'topic or table name' field and select 'Race and Hispanic or Latino Origin: 2010.' From the data set "2010 SF1 100% Data" Use the "Geographies" option to run this report based on your project's census tract, city, and county. Note that the Census Bureau refers to cities as "places."

Utilizing current resident and applicant data (if applicable) as well as census data for the census tract, city, and county, complete the below table utilizing percentages.

Table 1 Demographic Analysis

Demographic Characteristics	Project's Residents	Project's Applicant Data	Project's Census Tract	Housing Market Area	Expanded Housing Market Area

Targeted Marketing Activities—Groups Least Likely to Apply Without Special Outreach Efforts

Program Guidance:

Based on the above information indicate which demographic groups are least likely to apply for housing at your project without special outreach efforts (check all that apply). “Least likely to apply” means there is an identifiable presence of a specific demographic group, but members of the group are not likely to apply for the housing without targeted outreach (because of language barriers, insufficient information about the property, etc.).

Example 1: If the **demographic analysis section above** indicates that the Expanded Housing Market Area consists of 20% African Americans who would qualify otherwise (e.g. are age and income qualified, and need assistance with activities of daily living) for the housing and only 2% currently reside in the facility, this group would be listed as “least likely to apply.”

Example 2: If the **demographic analysis section above** indicates that the Housing Market Area consists of 80% white, 15% African American and 5% Hispanic who would qualify otherwise (e.g. are age and income qualified, and need assistance with activities of daily living) for the housing and only 3% African American and Hispanic persons currently reside in the census tract, both African American and Hispanic would be listed as “least likely to apply.”

Program Guidance:

The Market Area is comprised of both the Primary Market Area (PMA) and Secondary Market Area (SMA).

The PMA is the area that a majority of the project's demand will be drawn from considering physical barriers, density of population, linkages and the location of competing facilities. This is typically where 80% of the project's residents would reside before moving to the residential care facility.

The SMA is the area that the rest of the project's residents would reside before moving to the residential care facility.

Include a map(s) showing the Market Area with hospital locations noted. This information can be obtained from an appraisal, market study, or resident origin list.

Market Area

<<Describe primary market area, pay close attention to the area from which the existing competitors are drawing their residents.>>

Insert Market Area Map(s) with hospital locations noted.

Program Guidance:

Identify all hospitals in the Primary Market Area (PMA) and Secondary Market Area (SMA). The project should utilize all hospitals in the PMA and SMA for referrals to assure they are reaching out to the maximum number of potential residents. If a project has chosen not to reach out to all hospitals in the area, please explain reasons why.

Include the name of the discharge planner and/or key physicians (indicate specialty). Only one email address, phone and mailing address is needed for each referral source.
