GENERAL INFORMATION

The LIHWAP Forecast Form identifies both current and future rates of expenditures for grant recipients Low Income Household Water Assistance Program (LIHWAP). Current expenditure rates are identified in Section I of the form. Section I is prepopulated by Federal LIHWAP staff. Sections II and III, as well as remarks are completed by LIHWAP grant recipient staff. Sections II and III forecast expenditure rates for the funds remaining under each of the two funding streams that make up the total LIHWAP award (Consolidated Appropriations Act and American Rescue Plan Act). In Sections II and III, grant recipients should identify the anticipated amount of each funding stream that will be spent during each month of the remaining LIHWAP project period. The forecasted expenditure rates should only include the portion of the LIHWAP budget that has not yet been expended at the time the form is completed.
