

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, we removed last week's new questions. We are re-fielding the parents module, perceived frustrations module, and question regarding importance of vaccinating to protect others. We are asking new or updated questions relating to boosters, social impact, if any, of a respondent vaccinating or not vaccinating, and trusted messengers.
