

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, last week's additional questions are removed; non-substantive additions include new questions on persuasive message testing about political and long-term COVID-19 side effects, concerns about the Delta variant, self-reported behaviors over the 4<sup>th</sup> of July weekend, and the effect of FDA approval on confidence in safety and effectiveness of vaccines. This request does not impact the total burden hours proposed for the CET in the initial submission.
