

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave re-fields questions on vaccine costs. New or modified questions include familiarity with vaccines for children under five, awareness and perceptions of vaccines for children under five, children's vaccine status, parents' perceptions and concerns, preference for children's vaccine type, COVID testing beliefs, and vaccine-induced immunity beliefs.
