INTER-AMERICAN FOUNDATION

60-Day Notice for the “IAF Grant Application Concept Note”

AGENCY: Inter-American Foundation.

ACTION: Notice.

SUMMARY: The Inter-American Foundation (IAF), as part of its continuing efforts to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps ensure that requested data is provided in the desired format; reporting burden (time and financial resources) is minimized; collection instruments are clearly understood; and the impact of collection requirements on respondents is properly assessed. Currently, the IAF is soliciting comments concerning the information collection of the grant application concept note. The purpose of this form is to reduce the time needed to submit and review a proposal for IAF grant funds. Proponents spend a lot of time completing a proposal for grant funds, and IAF Foundation Representatives spend a lot of time reviewing proposals. Internal staff members are not able to read through all the proposals received each year as a result of the volume of submissions and the length of the materials. Given the high proportion of proposals that do not progress to the “pre-selected” phase of the review process, there is an opportunity to streamline the initial application requirements to only require the key information a Foundation Representative needs to decide whether or not a project is viable for IAF to fund.

DATES: Written comments must be submitted to the office listed in the address section below within 60 days from the date of this publication in the **Federal Register**.

ADDRESSES: Send comments to Natalia Mandrus, Inter-American Foundation, via email to nmandrus@iaf.gov.

SUPPLEMENTARY INFORMATION: The IAF is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency’s estimate of the burden of the

- proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Can help the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Nicole Stinson,

Associate General Counsel.

SUPPLEMENTARY INFORMATION:

I. Background

On May 22, 2007, OMB issued Memorandum M–07–16, Safeguarding Against and Responding to the Breach of Personally Identifiable Information, which required Federal agencies to publish a routine use for their systems of records specifically applying to the

disclosure of information in connection with response and remedial efforts in the event of a breach of personally identifiable information. FWS published a notice in the Federal Register in 2008 to modify all FWS system of records by adding a routine use in their “ROUTINE USES” section to address the limited disclosure of records related to a suspected or confirmed breach within DOI consistent with OMB M–07–16. In 2015, FWS published a modified system of records notice for the INTERIOR/FWS–26, Migratory Bird and Harvest Survey, system of records, which erroneously omitted the breach routine use required by OMB M–07–16.

On January 3, 2017, OMB issued Memorandum M–17–12, Preparing for and Responding to a Breach of Personally Identifiable Information, which rescinded and replaced OMB M–07–16. This memorandum requires agencies to publish two routine uses for their systems of records specifically applying to the disclosure of information in connection with response and remedial efforts in the event of a breach of PII. Specifically, OMB M–17–12 requires that agency Senior Agency Officials for Privacy ensure that their agency SORNs include routine uses for the disclosure of information necessary to respond to that agency’s breach of PII. Additionally, OMB M–17–12 requires that a breach

routine use be added to all agency SORNs to ensure that agencies are able to disclose records in their systems of records to another Federal agency that may reasonably be needed by that agency to respond to a breach of PII.

FWS is publishing this notice to modify the SORNs identified below to revise the existing breach routine use to address the limited disclosure of records related to a suspected or confirmed breach within DOI and to correct the omission of the original breach routine use in the INTERIOR/FWS–26, Migratory Birds and Harvesting Survey, SORN published in 2015. This notice also adds a new breach routine use for the limited disclosure of records that may reasonably be needed by another agency to respond to a breach in accordance with OMB M–17–12. These modifications will ensure FWS can respond to a suspected or confirmed breach within DOI and assist other agencies in responding to a confirmed or suspected breach, as appropriate, pursuant to OMB M–17–12. Moving forward all new and significantly modified SORNs published by FWS will include the breach response routine uses consistent with the requirements outlined in OMB M–17–12. This notice hereby adds the two routine uses required by OMB M–17–12 to the system notices listed below.

1	INTERIOR/FWS–4, Tort Claims Records	64 FR 29055 (May 28, 1999); modification published 73 FR 31877 (June 4, 2008).

a risk of harm to individuals, DOI (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DOI’s efforts to respond to the suspected or confirmed breach or

to prevent, minimize, or remedy such harm.

To another Federal agency or Federal entity, when DOI determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or

remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

Notice of Availability of the Record of Decision for the Whitewater River Groundwater Replenishment Facility, Riverside County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Land Policy and Management Act of 1976, as amended, the Bureau of Land Management (BLM) has prepared the Record of Decision (ROD) for the Whitewater River Groundwater Replenishment Facility located in the Palm Springs-South Coast Field Office.

The ROD constitutes the decision of the BLM.

DATES: The Palm Springs-South Coast Field Manager signed the ROD on March 14, 2023. Issuance of the ROD initiates a 30-day appeal period ending April 17, 2023.

ADDRESSES: The ROD is available via the internet at <https://go.usa.gov/x6KsM>. Copies of the Whitewater River Groundwater Replenishment Facility ROD are available at the Palm Springs South Coast Field Office at 1201 Bird Center Drive, Palm Springs, CA 92262. Appeals must be submitted to this address, in accordance with the regulations contained in 43 CFR part 4.

FOR FURTHER INFORMATION CONTACT:

Brandon G. Anderson, Assistant District Manager, telephone: (760) 422-9120; email: bganderson@blm.gov; address Bureau of Land Management, 1201 Bird Center Drive, Palm Springs, CA 92262. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Coachella Valley Water District (CVWD) applied for a right-of-way (ROW) grant from the BLM for its existing groundwater replenishment facility in North Palm Springs that is partially located on public lands managed by the BLM. The BLM issued the Final Environmental Impact Statement on August 12, 2022. After careful consideration of the environmental impacts, the BLM selects Alternative 1: Proposed Action (Selected Alternative). Consistent with 43 CFR 2801.10, this decision remains in effect pending appeal. The Selected Alternative would issue CVWD a ROW grant for existing water control berms, intake structures, conveyance structures, and 19 infiltration ponds over approximately 690 acres of BLM-managed public lands. The facility also includes 1,480 acres of lands held by CVWD. The Selected Alternative increases water recharge volumes to 511,000-acre feet per year of water, which represents the full annual capacity of the facility.

This decision may be appealed to the Interior Board of Land Appeals (IBLA), Office of the Secretary, in accordance with the regulations contained in 43 CFR part 4. If an appeal is filed, your notice of appeal must be filed as noted in the **ADDRESSES** section within 30 days from receipt of this decision. The
