

Justification for Additional Organizational Type Category to OMB Collection Number 0412-0623 Instruments 1, 2, 3, 4, and 5. A “Government, non-US” organizational-type category was previously omitted from the drop-down menu of the surveys. This organizational-type category is needed because among the Board for International Food and Agricultural Development’s global event participants some are affiliated with regional, national, and municipal governments. This organizational category is needed to differentiate these participants from the US Government at USAID and other US government agencies. The disaggregation category is consistent with the approved monitoring evaluation and learning plan for the BIFAD activity.
