## REGISTRATION INFORMATION

### Why do we need your information?

We request your name, DAU ID or SSN, Date of Birth (DoB), and other verifiable data as determined by the program manager during the registration process only to authenticate who you are. Your information will be stored with your account when it is created and is shared with agencies and organizations involved in the documentation of the training event. Optionally, once your student profile is established, you can add a photograph.

Is it safe?

Security during transmission is ensured using a 128-bit Secure Socket Layer (SSL) connection. This is the highest industry standard and establishes an encrypted session between your computer and the SIS site services. We use the same technology that other major companies operating on the World Wide Web (WWW) use to protect personal information and guard against identity theft. Look for the little yellow padlock at the bottom of your browser window to ensure that you have established a secure connection. There are no alternate means of registration as this is the most secure method of protecting your information.
