

Sample Email sent to the respondent.

The Tulsa District is looking at potential navigation benefits on the Red River from Denison Dam to Index, AR. This survey will assist in analyzing how businesses in the region currently transport their commodities and how the option of a navigable waterway would affect these movements. The primary question to be answered is what the commodities are currently being shipped, what modes of transport do regional shippers use, and if waterway transport were available would shippers use a waterway and to what degree.

We would appreciate you completing the Navigation Survey located at:
