

DELTA Ahead Prevention Infrastructure Questionnaire

Welcome to the Coalition Prevention Infrastructure Questionnaire

Form Approve

OMB No: xxxx-xxxx

Exp. Date: xx-xx-xxxx

Public Reporting burden of this collection of information is estimated at 30 minutes including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NW, MS D-74, Atlanta, GA 30333; Attn: PRA (xxxx-xxxx).

Please note that the term "Coalition" refers to your State Domestic Violence Coalition (SDVC). This survey has been sent to you as the primary DELTA Impact contact at the Coalition. However, you may complete the survey with any other Coalition staff that you feel would be appropriate. Please submit only ONE survey per Coalition.

Primary Prevention refers to activities and strategies that keep intimate partner violence (IPV) or domestic violence (DV) from first occurring.

Community and Societal Level IPV Prevention refers to prevention strategies that are designed to impact characteristics of the settings (e.g., school, workplace, and neighborhood) in which social relationships occur, or social and physical environment factors such as reducing social isolation, improving economic and housing opportunities, and improving climate within school and workplace settings. This is different from individual level strategies (usually designed to promote attitudes, beliefs, skills, and behaviors) and relationship level strategies (focused on parenting, family, mentoring, or peers to reduce conflict, foster problem solving skills, promote healthy relationships, and address factors related to the social circle, peers, partners, family members and other adult allies who influence an individual behavior and experience).

Program staff refers to any staff at your coalition that work on any programs, practices or policy efforts of the coalition including response. It would not include staff that are only involved in administrative or operational tasks at the Coalition.

Protective factors are characteristics that decrease the likelihood of a person becoming a victim or perpetrator of violence because they provide a buffer against risk. Factors associated with lower chances of perpetrating or experiencing IPV include high empathy, good grades, high verbal IQ, a positive relationship with one's mother, and attachment to school. Community and societal factors such as lower alcohol density, community norms that are intolerant of IPV, and increased economic opportunities may also be protective against IPV.

Risk factor refers to a characteristic that increases the likelihood of a person becoming a victim or perpetrator of violence. Factors that put individuals at risk for perpetrating IPV include (but are not limited to) demographic factors such as age, low income, low educational attainment, and unemployment; childhood history factors such as exposure to violence between parents, experiencing poor parenting, and experiencing child abuse and neglect. Relationship level factors include hostility or conflict in the relationship, aversive family communication and relationships, and having friends who perpetrate/experience IPV. Community and societal level factors include poverty, low social capital, low collective efficacy in neighborhoods, and harmful gender norms in societies.

Health Equity refers to the attainment of the highest possible standard of health for all people and giving special attention to the needs of those at greatest risk of poor health, based on social conditions. Health equity is the state in which everyone has a fair and just opportunity to attain their highest level of health (CDC). Achieving health equity means valuing everyone equally with focused efforts to address avoidable inequities, historical and contemporary injustices, and the elimination of health and healthcare disparities.

Social Determinants of Health refers to the conditions in the environments in which people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks. Healthy People 2030 groups social determinants of health into 5 domains: economic stability, education access and quality, health care access and quality, neighborhood and built environment, and social and community context.

It should take you about 30 minutes to complete this survey.

CDC estimates the average public reporting burden for this collection of information as 60 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (#).

In what state is your SDVC? _____

Expertise and Knowledge

At this point in time, how knowledgeable would you rate your Coalition program staff overall about preventing domestic violence from first occurring (primary prevention)? (1=lowest, 5=highest)

- 1
- 2
- 3
- 4
- 5

How well do Coalition program staff understand the difference between the primary prevention of IPV and the secondary prevention of IPV (response and advocacy after IPV has occurred)? (1=lowest, 5=highest)

- 1
- 2
- 3
- 4
- 5

In general, how knowledgeable is Coalition program staff about primary prevention at the community and societal level? (1=lowest, 5=highest)

- 1
- 2
- 3
- 4
- 5

How well do Coalition program staff understand the difference between primary prevention approaches at the individual/relationship level and at the community/societal level? (1=lowest, 5=highest)

- 1
- 2
- 3
- 4
- 5

In general, how knowledgeable is program staff about the risk and protective factors that IPV shares with other types of violence? (1=lowest, 5=highest)

- 1
- 2
- 3
- 4
- 5

What % of your program staff have previous experience planning and implementing community and societal level primary prevention?

- none
- less than 25%
- between 25% and 50%
- between 51%-75%
- more than 75%

What % of your program staff have previous experience evaluating community and societal level primary prevention?

- none
- less than 25%
- between 25% and 50%
- between 51%-75%
- more than 75%

What percentage of your program staff has expertise or knowledge in the area of social norms change (efforts to change group-level beliefs and expectations for behavior)?

- none
- less than 25%
- between 25% and 50%
- between 51%-75%
- more than 75%

What percentage of your program staff has expertise or knowledge in the area of environmental change (a physical or material change to the social or physical environment)?

- none
- less than 25%
- between 25% and 50%
- between 51%-75%
- more than 75%

What percentage of your program staff has expertise or knowledge around policy change related to IPV prevention (this includes analyzing data to identify areas where policy change may be needed, analyzing and understanding policy options, collaborating with stakeholders to educate about policy issues, providing evidence and education to key stakeholders and policymakers, educating the public about existing policies, or evaluating the impact of policy efforts or policies)?

- none
- less than 25%
- between 25% and 50%
- between 51%-75%
- more than 75%

Is there anything else you would like us to know about the expertise of your Coalition staff as it relates to Community and Societal Level Primary Prevention

Training Opportunities

To what extent is information or training about community and societal level primary prevention included in new program staff orientation/onboarding?

- Not included at all
- We have started discussing this kind of change, but no formal changes to training yet
- Community and societal level primary prevention is included in trainings, but not as much of a focus as other areas of training
- Community and societal level primary prevention is included above or at the same level as other areas of training
- N/A - We do not have a new staff orientation or onboarding process

If this information included in new staff orientation or onboarding, is it only provided to program staff that will be directly involved with Community or Societal Level Primary Prevention?

- It is provided only to staff who will be working directly on community or societal level primary prevention
- It is provided to staff working on any kind of prevention
- It is provided to all staff regardless of if they are working on prevention or response
- N/A - Information is not included in new staff orientation or onboarding

To what extent is ongoing training or professional development related to community and societal level primary prevention offered to coalition program staff?

- Not offered at all
- We have started discussions, but no formal training opportunities offered yet
- Community and societal level primary prevention is included in trainings, but is not as much as other areas of professional development/training
- Community and societal level primary prevention is included above or at the same level as other areas of professional development/training

Are these training opportunities only available to program staff that are directly involved with Community or Societal Level Primary Prevention?

- It is offered only to staff who are working directly on community or societal level primary prevention
- It is offered to staff working on any kind of prevention
- It is offered to all staff regardless of if they are working on prevention or response
- N/A - Training opportunities are not offered

Is there anything else you would like us to know about training or professional development as it relates to Community and Societal Level Primary Prevention at your Coalition?

 About equal

Across all staff at your Coalition, approximately what percentage of program staff work on primary prevention (versus response) at any level (individual, relationship, community or societal)?

- none
 between 51%-75%
 less than 25%
 more than 75%
 between 25% and 50%

Across staff at your Coalition, approximately what percentage of program staff work on primary prevention at the community and societal levels?

- none
 between 51%-75%
 less than 25%
 more than 75%
 between 25% and 50%

What percentage of the total programs or policy efforts that the Coalition funds or implements focus on primary prevention?

- None
 between 51%-75%
 less than 25%
 more than 75%
 between 25% and 50%

Of the primary prevention programs or policy efforts that the Coalition funds or implements, what percentage focus on community and societal levels (versus individual/relationship level)?

- none
 between 51%-75%
 less than 25%
 more than 75%
 between 25% and 50%

Is there anything else you would like us to know about prioritization of Community and Societal Level Primary Prevention at your Coalition?

Structures and Processes

Does your Coalition mission statement include primary prevention?

- Yes
- No

To what extent does your Coalition's strategic plan (or equivalent document) include discussion of primary prevention?

- Not at all
- We have started discussions, but no formal changes yet
- Prevention is included, but is not as much of a focus as other work of our coalition
- Prevention is included at the same level of focus as every other focus of our coalition
- Prevention is included more than other focus areas of our coalition
- Unsure

Does the strategic plan include specific goals or action steps related to primary prevention at the community and societal level?

- No
- We have started discussions but no specific goals or action steps at this time
- Yes
- Unsure

Is a shared risk and protective factor framework used when planning the Coalition's work?

- No
- Yes
- Unsure

To what extent is your Coalition's strategic plan aligned with the state-level priorities identified in the State Action Plan (SAP)?

- No alignment
- Our plan is aligned with a few of the SAP priorities
- Our plan is aligned with many of the SAP priorities
- Our plan is aligned with all of the SAP priorities
- Unsure

Please mark whether your state domestic violence coalition has done any of the following IN THE PAST YEAR: (check all that apply)

- | | |
|--|--|
| <input type="checkbox"/> Included primary prevention messages in promotion materials (e.g., newsletter, web site) | <input type="checkbox"/> Implemented or coordinated a statewide or regional primary prevention campaign |
| <input type="checkbox"/> Made primary prevention resources available (e.g., curricula or materials in resource library, web site) | <input type="checkbox"/> Implemented or coordinated regional trainings specific to the primary prevention of IPV |
| <input type="checkbox"/> Distributed written materials specific to primary prevention to your membership agencies | <input type="checkbox"/> Initiated and/or participated in a campaign to secure more state resources or influence statewide policies to promote primary prevention of IPV |
| <input type="checkbox"/> Trained local programs (e.g., victim service providers) on primary prevention | <input type="checkbox"/> Served as IPV prevention representative/expert on state task forces or committees |
| <input type="checkbox"/> Provided technical assistance to local programs related to primary prevention | <input type="checkbox"/> Added questions concerning IPV risk and protective factors to statewide health survey |
| <input type="checkbox"/> Implemented or coordinated online trainings specific to primary prevention of IPV (e.g., webinars, web conferences) | |

To what extent does your Coalition use data (such as publicly available data, surveys, interviews, reports, focus groups) in planning prevention efforts?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent does your Coalition track risk and protective factors related to IPV at the state and/or local level?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent does your Coalition collect information about the outcomes of the primary prevention programs or activities it implements?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent do Coalition staff have adequate access to data needed for planning community and societal level IPV primary prevention activities?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

Is there anything else you would like us to know about the structure and processes related to primary prevention at your Coalition?

Health Equity

To what extent do coalition staff have a clear understanding of health equity concepts?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent do coalition staff have a clear understanding of the social determinants of health that impact intimate partner violence?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent do coalition staff have experience with providing programming or services for populations disproportionately impacted by violence?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

To what extent is coalition leadership committed to advancing health equity?

- To no extent
- To little extent
- To some extent
- To a large extent
- To a very large extent

How, if at all, does your coalition provide training to staff on health equity?

Is achieving health equity an explicit goal of your coalition (e.g., is included in the mission statement or strategic plan)?

- No
- Yes
- Unsure

Does the coalition currently have a dedicated arm for health equity (such as a health equity team, advisory group, etc.)?

- Yes
- No
- Unsure

Summary

What do you see as the major barriers or challenges to increasing capacity, resources and prioritization of community and societal level primary prevention of IPV?

Is there anything else you would like to share with us?

Thank you for taking the time to complete this questionnaire! Please let us know if you have any questions!
