Drinking Water Information Collection Form for Environmental Protection Agencies

Form Approved
OMB No. 0923-00xx
Exp. Date xx/xx/20xx

1. Is the site served by a public water supply?

If yes, the following information will be requested from the water purveyor:

- List of residences served by the water purveyor
 - O Name of person and street address
- Distribution system characteristics
 - o Specifically, whether the PFAS concentrations can be assumed to be relatively uniform throughout the system or whether the system had specific areas with substantially higher or lower PFAS concentrations.
 - O Sources of drinking water (e.g., supply wells, reservoir)
 - O Any interconnections between water systems; if so, then frequency of use of the interconnection and the amount of water supplied by the interconnection when in use
- If distribution system characteristics indicate supply wells, the following information will be requested
 - 0 Historical and current supply well information
 - Monthly/Daily production logs
 - Dates of operation
- Results from all relevant PFAS sampling

If no, please proceed to question 2.

2. Does the site have contaminated private wells?

If yes, the following information will be requested from state and/or local health and environmental agencies:

- List of residences with a contaminated private well
 - O Name of person and street address
- Results from all relevant PFAS sampling of private wells
