

Attachment 17: NRMN Annual Follow-up Survey

Public reporting burden for this collection of information is estimated to average 25 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. **An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.** Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0747). Do not return the completed form to this address.

Because of your involvement with NRMN programs, you have been selected to be a part of the Enhance Diversity Study, a national study on experiences and career choices of researchers and scientists. The National Research Mentoring Networks (NRMN) is part of this study, through the Diversity Program Consortium, a major national initiative funded by the National Institutes of Health. This effort is seeking to understand what programs and strategies can benefit those interested in biomedical, behavioral, clinical, and social science fields.

The Coordination and Evaluation Center at the University of California, Los Angeles, serves as the coordinating center for this national effort and is in charge of collecting information about these programs in order to evaluate the extent to which these efforts are successful in improving outcomes for students and faculty. If we can show benefits, this can increase the likelihood of continuation and expansion of these efforts.

NRMN has provided the CEC at UCLA your name and contact information because you have participated in activities that are part of the NIH Diversity Program Consortium's work. Only with the continued participation and support from participants such as yourself will we be able to determine the value of the various programs offered to help students and faculty succeed.

All of the information you provide will be protected and secured to the extent permitted by law.

In this survey, we will gain an understanding of your professional activities during this past year, including any mentoring/coaching practices, research, scholarly productivity, and other academic activities. You will have the option to upload a document that includes information about publications or grants (such as a resume or CV) instead of entering this information directly for each publication or grant in the survey.

Note: The system will log you out if it has been idle for 20 minutes. Responses are automatically saved as you navigate from page to page.
