

Center to Support Research and Evaluation Capacity of CCDF Lead Agencies (CSRE): Feedback from Grant Participants

The purpose of this voluntary information collection is to solicit feedback from participants of monthly web meetings, annual hybrid meetings, and other occasional virtual meetings run by the Center to Support Research and Evaluation Capacity of CCDF Lead Agencies (CSRE). The participants are ACF grant team members participating in one or more Communities of Practice (CoPs) aiming to support cross-project support and collaboration. Participant feedback will be collected during or between grantee meetings through a Zoom poll, a link to an online survey, or group discussion. This feedback will help the government understand the grant recipients' experiences and preferences and will be used to improve future meetings and other supports for these grant recipients.

NOTE: This document includes a universe or bank of sample questions. We plan to ask an average of 3-4 questions or 5 minutes of burden each time feedback is requested. ACF will administer the poll up to 16 times over the next 24 months.

Many questions have brackets with information that will be identified based on Community of Practice discussions, planning needs, and feedback. A question may be asked more than once, using alternate versions of the information in brackets. We also may make additional small tweaks in wording to fit the circumstances. Many of the questions are drawn from previously approved polls for the individual Communities of Practice over the past 3-4 years (i.e., the CCDBG, CCPRP-2019, PROSPR, or CCPRP-2022 Community of Practice) but approval to use them has lapsed or they are only allowed to be used for one Community of Practice.
