

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, there are no removals; non-substantive additions include a knowledge battery to explore misinformation; vaccine prioritization perception questions, that is, “fairness” of distribution; and the impact and influence of witnessing vaccinations on individual behavior. This request does not impact the total burden hours proposed for the CET in the initial submission.
