

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, last week's additional questions are removed; non-substantive additions include questions to gauge knowledge of and reaction to the pause in administration of the J&J vaccine. This survey will also gauge response to five messaging statements related to the event. This request does not impact the total burden hours proposed for the CET in the initial submission.
